Preliminary note

The document shall be used as a reference document for content creation on the Corporate site.

Global layout

Main navigation

☐☐☐☐ The main navigation is accessible through the menu (top right) and from the footer part. The header contains some quick links to a few navigations

- **Main categories:** 6 main categories for corporate site
- **Your country:** link to other websites from the header page – also visible from the footer page and within the menu, allowing users to switch easily from one site to another
- **Search form:** direct search.
NB: advanced search is not implemented as the results page already presents results by type of contents.

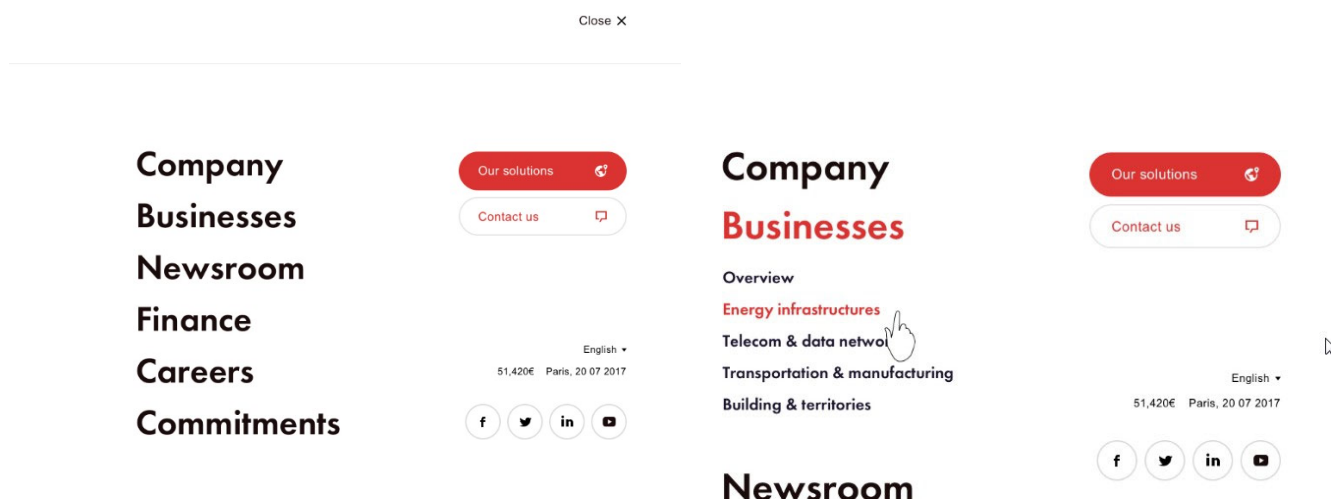

Header: quick links to few entries and menu button on the right-hand side

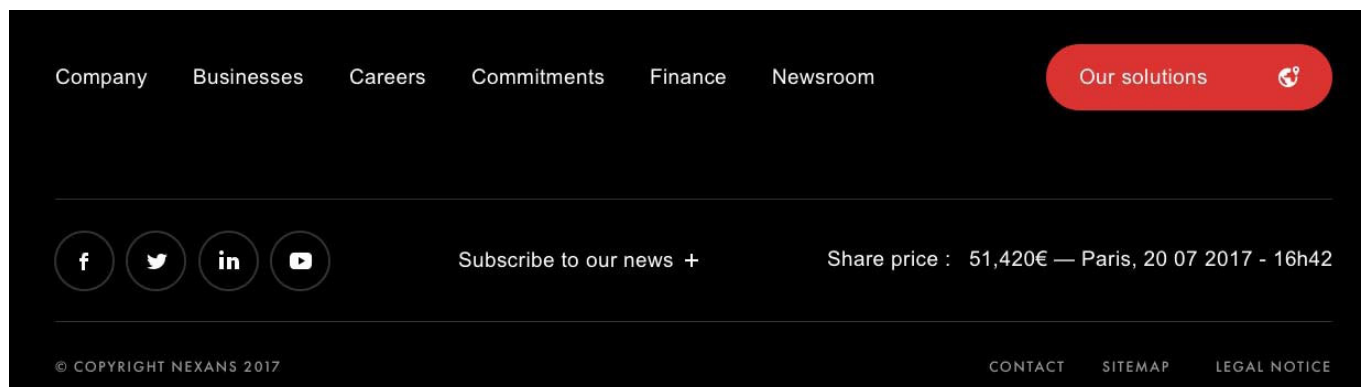

Menu opening: Sub-categories (level 2) are displayed when clicking over categories titles (Level 1).

A roll-over style (see graphic guidelines) highlights the sub-category title. The user can click on:

- Category title (level 1), to open the menu
- Sub-category title (level 2) to access the corresponding page (Top level menu can be accessed by adding a “fake” 2nd level corresponding to the main entrance page)

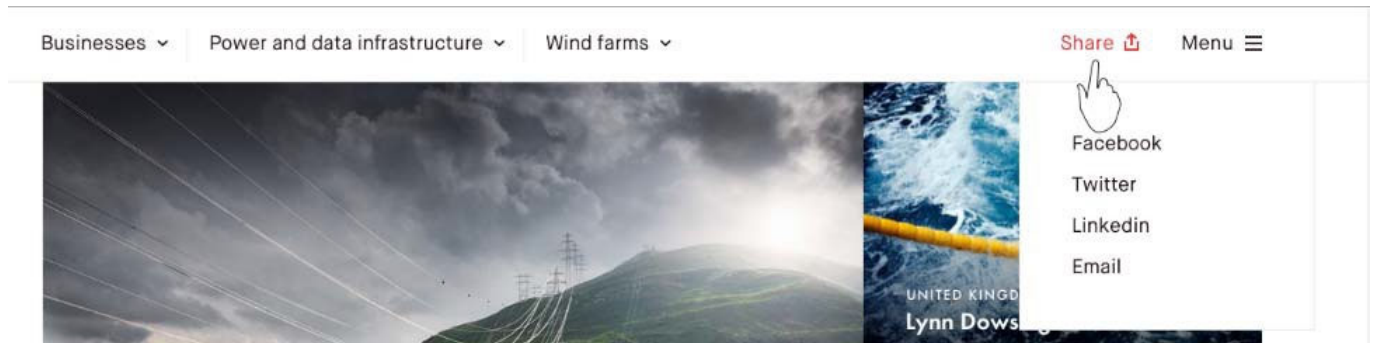

Footer

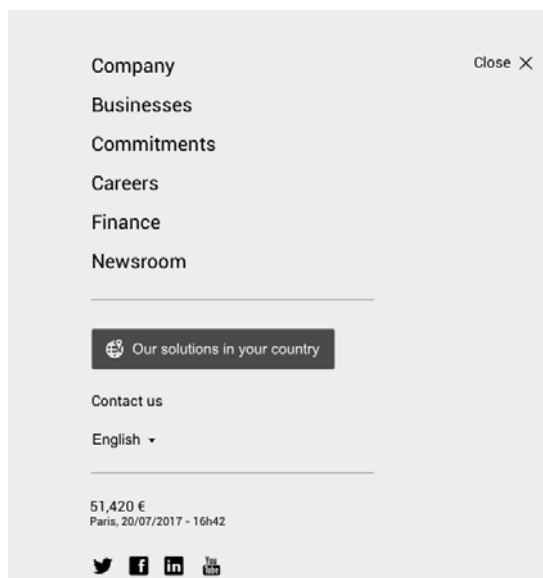

NB: “home” tab is not placed within the navigation bar, as the link to site homepage is accessible both through Nexans’ logo and bread crumb trail.

No left navigation will show within the inner pages. When scrolling down the pages, the breadcrumb will be showing as a smart breadcrumb allowing users to move up or down if needed

The Menu button will also be accessible from this smart menu, and share buttons as well

NB: pages titles must be exactly similar in the navigation bar, breadcrumb trail and title of the page.

Corporate arborescence (level 1)

Secondary navigation

The secondary navigation is only visible from the smart breadcrumb (menu bar) that accompanies the user along the scroll

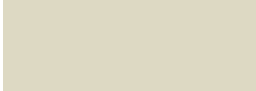

Principles of construction are similar in all categories:

- **1** Title¹ – fixed value accessible on all pages, clickable, depending on the level of active page:
 - Level 1 – name of the category,
 - Level 2 and further – name of the sub-category.

¹ Level 0 = site homepage, level 1 = category homepage, level 2 = sub-category page, level 3 = sub-sub-category page...

- 2 Active level only showing in the menu
- 3 3 levels are displayed at a maximum based on the place on the level of the active category - i.e.:

active level →

↓ displayed levels	1	2	3	4
1		-	-	-
2	Fully	Fully	Partially	Partially
3	-	Fully	Fully	Partially
4	-	-	Fully	Fully
5	-	-	-	Fully

Fully displayed: displays all the elements of the same level – **Partially displayed:** displays only the top hierarchical category.

ZONES

Header

The header is defined with 5 elements automatically displayed – for CORPORATE SITE:

- Quick links: 3 quick links that can be defined by user manually allowing quick access to information (only LEVEL 1 can be added to quick links)
- Company logo: Nexans logo is placed on top left with the baseline (when co-branding, baseline is not displayed),
- Your country: switch to country sites
- Search field
- Menu: allowing user to access the site map, switch sites, contact us link (linking to a form), switch language, view share price information, access social media channels from Nexans

Company

Businesses

Newsroom

Your country 

Search 

Menu 

External users can't register any longer on the .com site

Footer

The footer gathers 3 kind of information:

- **Menu:** showing level 1 of site navigations + Your country CTA button allowing to switch sites
- **Links (automatic):**
 - social media icon linking to Group's pages
 - subscribe to email alerts shortcuts (pop in allowing users to receive information based on defined lists of fields)
 - Share price information
- **Signature (automatic):** copyright, legal notice, site map and access to "Nexans only" (for internal users), contact us

Content zone

The content zone follows the following principles:

- Breadcrumb trails will hold the navigation information (no left-hand menu)
- Content will be displayed within blocks (in central column)

GLOBAL FUNCTIONS

The global functions are accessible through the smart bread crumb showing on all pages while users navigate on the site:

- **Share**

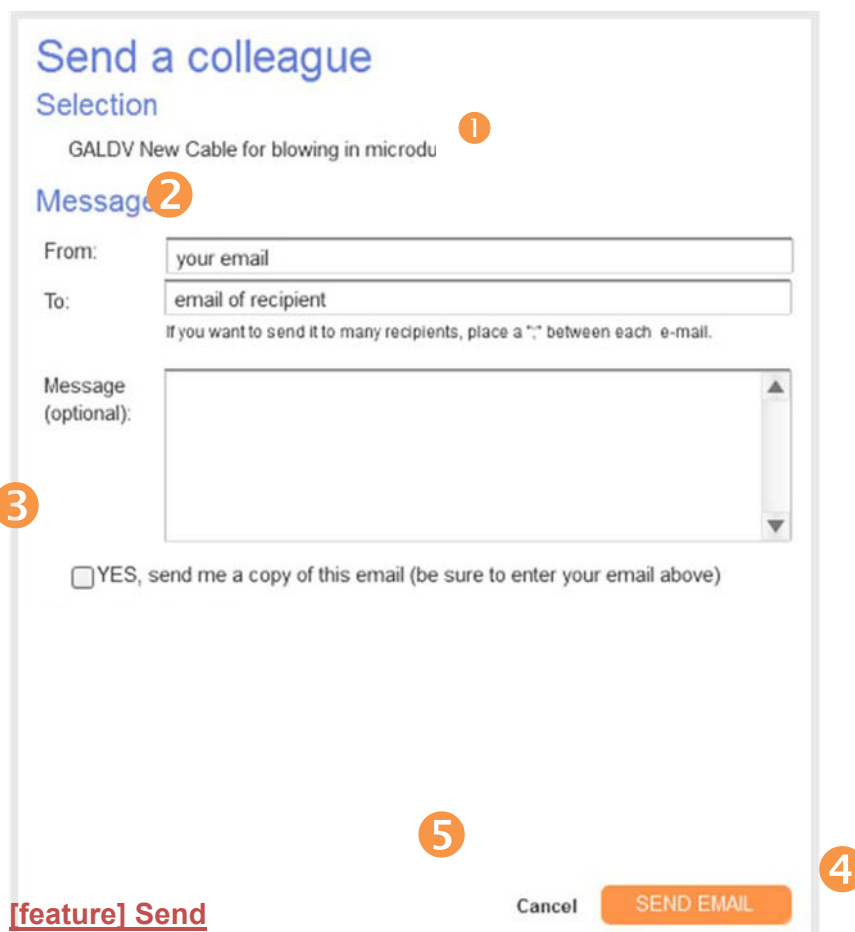

Share features: possibility to share on main social media channels from any page.

Share by email

Feature is accessible from the menu bar

When clicking on the link or on the icon, a pop-up is displayed:

The screenshot shows a pop-up form titled "Send a colleague". The form has the following elements:

- Selection:** A text field containing "GALDV New Cable for blowing in microdu" (labeled with an orange circle 1).
- Message:** A section with a "From:" field (containing "your email"), a "To:" field (containing "email of recipient" and a note "If you want to send it to many recipients, place a ',' between each e-mail."), and a "Message (optional):" text area (labeled with an orange circle 2).
- Checkbox:** A checkbox labeled "YES, send me a copy of this email (be sure to enter your email above)" (labeled with an orange circle 3).
- Buttons:** At the bottom, there are three buttons: "Cancel", "SEND EMAIL" (labeled with an orange circle 4), and a "Send" button (labeled with an orange circle 5).

At the bottom left of the form, there is a link "[feature] Send".

Contact form available from each page (main section) will be slightly different: no selection of topic will be possible considering the user is already on a specific page. The subject field will therefore be prefilled with the name of the page on which the user is located.

Contact forms can be customized in the back end and fields can be very specific depending on where the contact form will be positioned on the site. As in current system, it should be possible to use contact forms to collect information before downloading a document.

Page layout

OVERVIEW

GRID

The grid system is based on **fixed values** for each element, including gutters between the different elements.

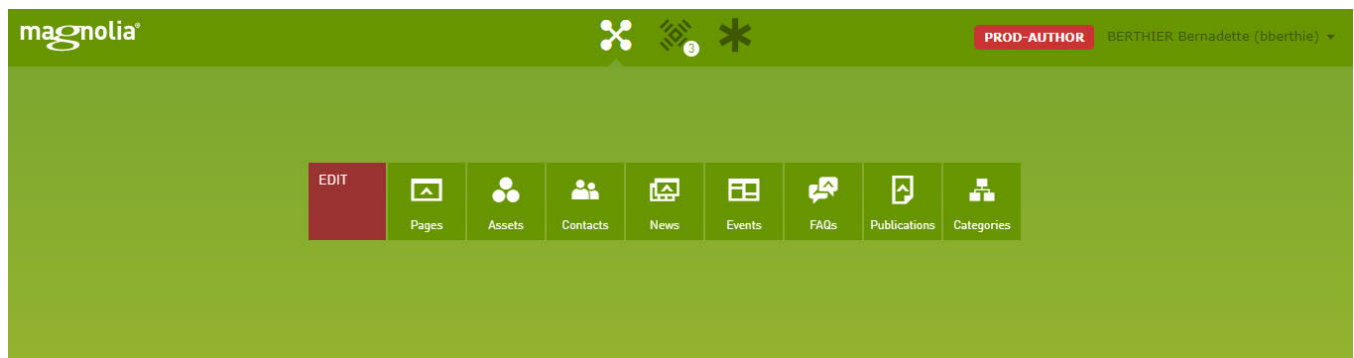

The content zone is based on a screen resolution of pixels. Total width of the page is: 1400 px. The website will be responsive so all elements will be adjusted accordingly.

Main principles

Content types

The site holds various content types managed through a publishing interface. To access the publishing interface, please go to

<http://s0101408wwwaap.nexansdomain.global:8080/magnoliaAuthor/.magnolia/admincentral#shell:applauncher>

Log in using your windows credentials and you'll then get the following screen – based on your access rights, you might see more or less information on the page

EDIT Menu (1st row): provides access to the relevant page types and contents. That is where the content creation will be handled.

The site is made up of the following content types

- Pages: access to several page templates (HR / FINANCE / COMPANY / BUSINESS / ..). From this entry, you'll be able to
 - o Create pages (new market for instance / new editorial page under a specific section). Page templates have been defined by section and can only belong to that section.
 - o Manage existing pages (adding / removing / updating content)

Pages are made up of one single column that will contain a series of blocks – some blocks are specific to some of the categories (ex: blocks that are used on the finance page)

6 categories will be available on the Corporate site

- Company profile
- Business
- Careers
- Finance
- Newsroom / Blogs
- CSR (use same template as Company profile template)

Each section contains a series of templates, specific or transversal, depending on the type of contents to be highlighted. Each template will then embed a series of blocks to display the content.

- News: news will be managed from the news room section and stored in a newslit. News can be made accessible from any section of the site using news list block but they will all be stored in the news section.
- Events: events will be managed from the newsroom section as well and stored in an event list. Events can be made accessible from any section of the site using event list block, but they will all be stored in the news section
- Publications: publications correspond to all documents (brochures; leaflets, reports) uploaded on the site (please note that documents attached to a specific news will not show in that section) and will be stored into a publications list – available from the newsroom section. Publications can be made accessible from any section of the site using publications list block but they will all be stored in the publications list section.
- FAQ: list of questions and answers and correspond to a specific page type. FAQ. The questions and answers will be created in the FAQ section, and can be grouped by topics. The relevant FAQs will then be pulled out from this pool of questions to show in the relevant sections
- Contacts: manage existing contacts on the site, create new ones ... contacts that will be allocated to the relevant pages of the site
- Assets (attachment library) access all assets uploaded on the site: pictures, documents..

CATEGORIES

The Categories allow you to create hierarchical categories and tag articles and content with them. When applied to content, categories create a taxonomy - a set of metadata that describes and classifies the content. Categories are displayed as links in the article header or as a weighted list known as a category cloud. By clicking category links, visitors can discover related content, resulting in more page views and longer stays on the site.

You can classify your content in unlimited number of ways and there is no "wrong" choice. Instead of belonging to only one category, an item may belong to several.

For each content / document / page / news ... one main category will be defined (and will show) but additional categories can then be applied as well (in case a content is to be found under several entries). However only the main category will show as a tag but the optional tags will be used to allow filtering and search.

The creation of category will be centrally managed by the administrator of the site.

To categorize content, edit the content item's properties and choose applicable categories.

FEATURES AND ASSETS

PAGES

Managing pages

The Pages entry displays your site hierarchy. Here you can add pages and move them around.

Site hierarchy

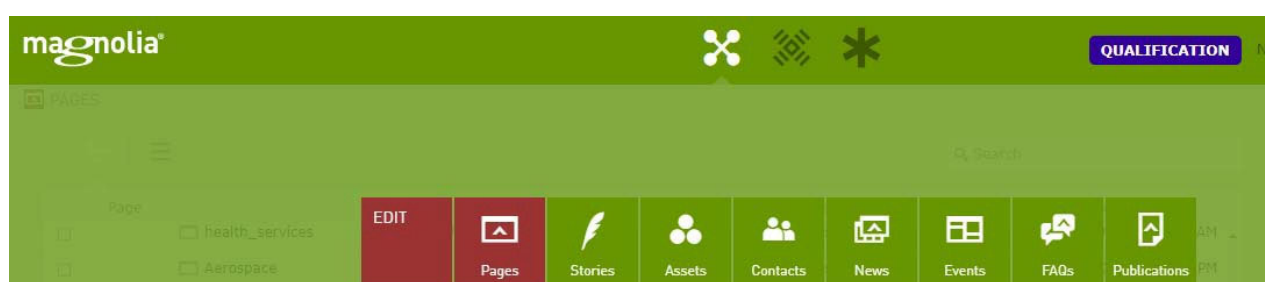

Pages on a site are displayed in a hierarchical tree. Each site tree has a root page (home page) and child pages.

Various page templates are available:

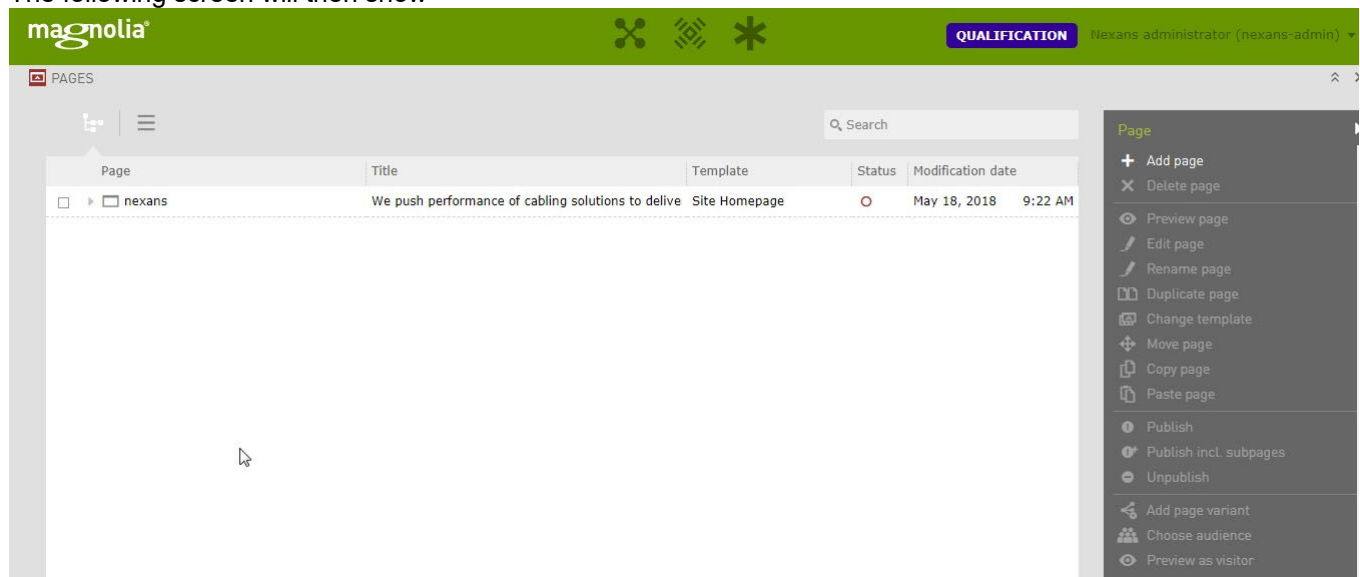

- ☐ Site Homepage
- ☐ Search results
- ☐ Business pages:
 - Business Homepage (main section)
 - Business Sector
 - Business Segment
 - Case Study
- ☐ HR/Career pages
 - Career Homepage (main section)
 - Testimonial
- ☐ Newsroom
 - Newsroom (main section)
 - News List
 - News Page
 - Event List
 - Event Page
 - Publication List
 - Digital magazine
- ☐ Blogs section (similar to newsroom)
 - Blog section
 - Blog Post list
 - Blog Post
- ☐ Company
 - Company Homepage (main section)
 - Locations
 - Governance
- ☐ Finance
 - Finance Homepage
 - Financial Results
 - Financial key figures
- ☐ Editorial page: modular page that can be created under many sections
- ☐ Blogs pages

Page templates follow specific rules and cannot be created from any position within the site. Moreover, each template will then allow the use of various block types.

To create / update pages, go to the entry PAGES

The following screen will then show

The page shows you all pages created on your site: by default only the first page (HOME PAGE) is showing, to view the full structure, just click on the arrow located next to the page name - same for sublevels under each section

For each page, the following information is available

Page	Title	Template	Status	Modification date
<input checked="" type="checkbox"/> ▾ nexans	We push performance of cabling solutions to delive	Site Homepage	○	May 18, 2018 9:22 AM
<input type="checkbox"/> ▾ company	Company	Company Homepage	○	May 18, 2018 9:24 AM
<input type="checkbox"/> ▾ business	We support your performance	Business Homepage	○	May 18, 2018 9:25 AM
<input type="checkbox"/> ▾ finance	Finance	Finance Homepage	○	May 18, 2018 9:23 AM
<input type="checkbox"/> ▾ careers	Careers	Career Homepage	○	May 24, 2018 10:50 AM
<input type="checkbox"/> ▾ newsroom	Newsroom	Newsroom	○	May 17, 2018 5:54 PM
<input type="checkbox"/> commitments	Commitments	Governance	○	May 14, 2018 11:17 AM

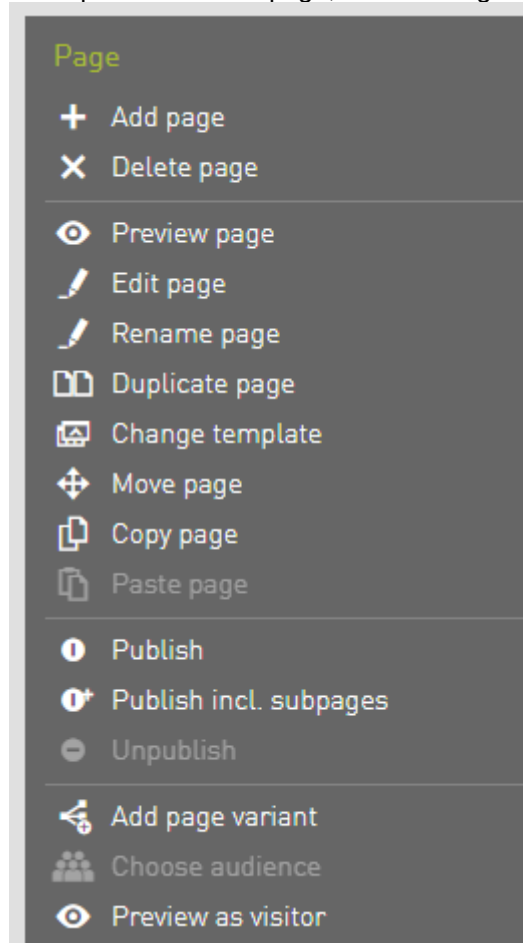

Columns:

- **PAGE:** corresponds to the page name when you created it. The page name is used in the URL. The convention is to use lower-case words separated by hyphens, for example standard-article and news-and-events
- **Title:** title showing in the navigation and on the page itself (in the cover for the main sections). Displayed to visitors. It may be different from the page name and can contain any character. The title string is used in the HTML title element, in the h1 heading on the page and in the navigation title.
- **Template:** the page template selected to create that page. Template assigned to the page
- **Status:** shows the publication status of the page - published or not published
 - Published (green, solid): Content was published from the author instance to the public instance. Identical content exists on both instances.
 - Modified (yellow/amber, two rings): Content was modified since publication. The author instance is not in sync with the public.
 - Unpublished (red, one ring): Content exists only on the author instance. It was never published.
- **Modification date:** Timestamp showing when the page was last modified.

All pages are based on Templating. The template assigned to a page is displayed in the Template column. The template determines what content is displayed and how.

From this screen, you can add a page (first level entry under the home page), or modify the existing home page.

Once positioned on a page, the following menu shows on the right-hand side

Depending on the page on which you are located, the following options will show:

- Add page: to add a new sub-level under the selected page
- Delete page: remove the page
- Preview page: preview the page in a new tab
- Edit page: edit the page to perform the changes
- Rename page: change name
- Duplicate page: copy the page to create a new one (if market for instance)
- Change template: if you created a page and wish to change the type. You can change a page template. However, the new template may not be able to render content entered using the previous template. If content cannot be rendered, you cannot edit it. The original content exists in the repository, however. If you change the template back to the original, the content is rendered again. If a template is able to render a component that was originally entered with a different template, the component may be displayed even if the current template does not offer it in the corresponding area. For example, if you enter a text component on a Travel Standard page and later change the page template to a custom template that also offers a text component, the component may still be displayed.
- Move page: change position of the page in the site tree. NB: a page's position in the site hierarchy determines its URL. When the page moves, the URL changes. This can have a negative SEO impact. Use a permanent redirect to tell search engines that the page was moved.
- Copy page: copy the selected page
- Paste page: paste your copied page
- Publish = validate the creation / changes performed on the page and make them available
- Publish including subpages: if you created a whole section, allows you to set all online and public
- Unpublish: undo
- Add page variant
- Choose audience
- Preview as visitor: before publishing, preview the page

This right-hand menu will adapt when editing a page allowing you to access the options of the page you are located on. When opening a page, the following panel will show

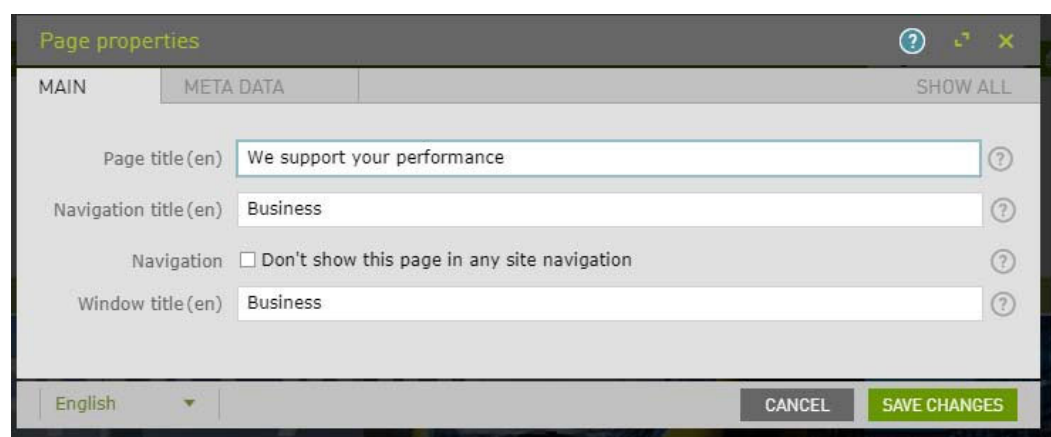

You can edit the page properties using the menu on the right-hand side allowing to update the information of the page. The information is split into two tabs: Main tab containing the main properties /data of the page and a META DATA tab holding the meta data you need to set for the page (SEO)

MAIN TAB

1. Page title: corresponds to the title showing on the page – on the cover
2. Navigation title: name of the navigation that will show in the navigation menu and the footer (if main section)
3. Windows title: corresponds to the name showing in the browser window

To update the information in French, just change language using the dropdown list below.

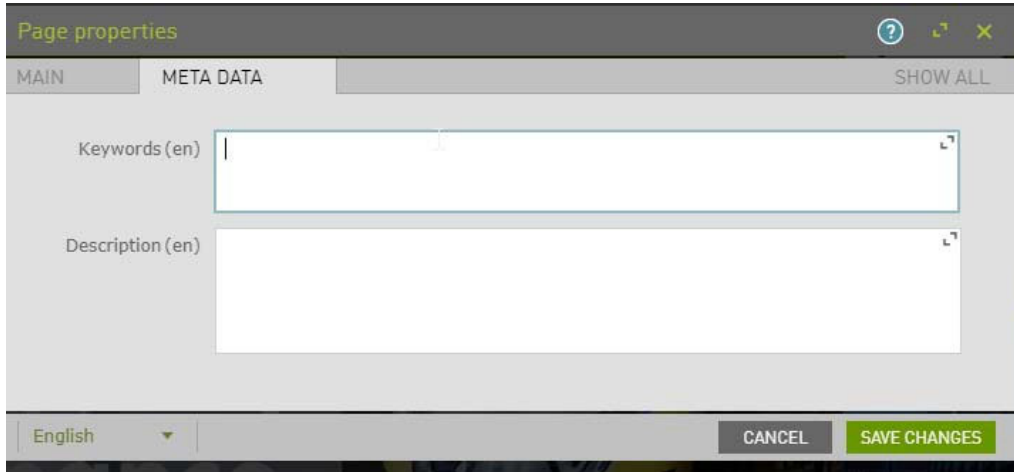

Once all changes have been applied, click on SAVE CHANGES

A help menu is showing next to the name of each field, should you have any doubt.

META DATA TAB

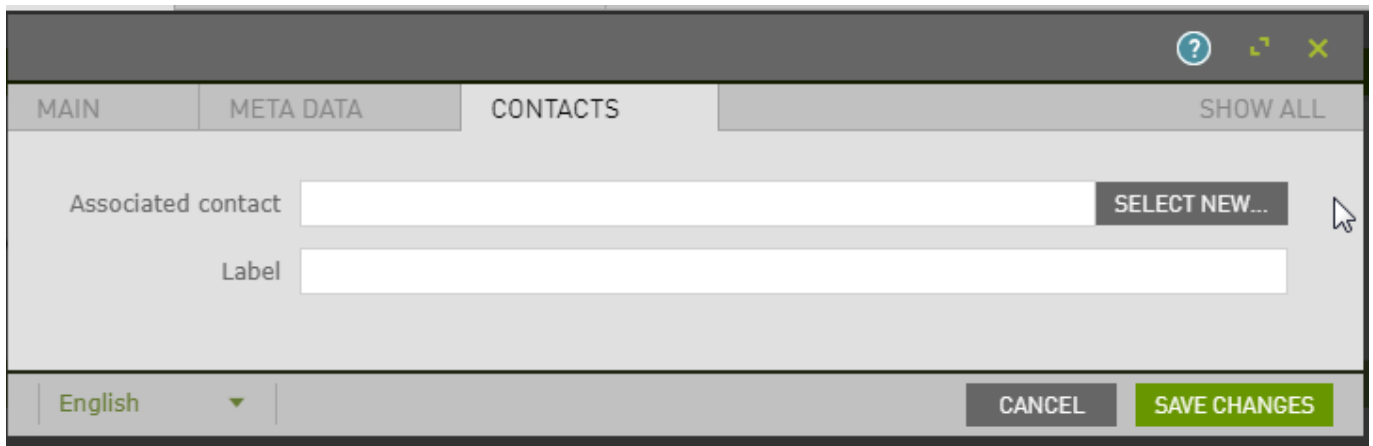

4. Keywords: fill in the keywords that make sense for this page and that will help users find your site
5. Description: enter a description for the page that will be used for the referencing

CONTACTS TAB

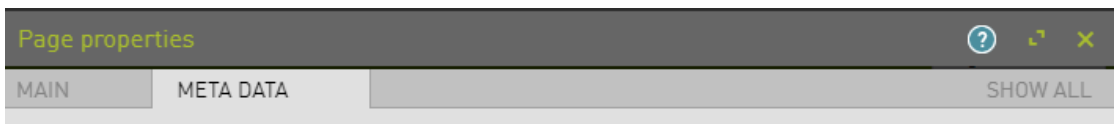

On sub-level pages, you can assign a dedicated contact that will then show in the cover

The contact shall be selected from the contact repository (managed from the contact entry – see dedicated section for contact management). Associate the right contacts to the page and enter a label (text showing up on the page next to the contact us button: Need help ? or Assistance required ?)

Don't forget to do it in both languages (switch language using the drop-down list at the bottom left) and click on SAVE CHANGES when done

TIP: you can display both tabs on the same screen, to do so just click on SHOW ALL at the top

Editing pages

Use the Pages app to create and edit pages. When you are done editing, publish the changes to public instances.

Toolbars

Green toolbars identify editable page elements:

- **Page bar** allows you to choose a content entry language.

- **Area bars** are containers. Click the bar to add a component in the area.

- **Component bars** allow you to edit and move page components.

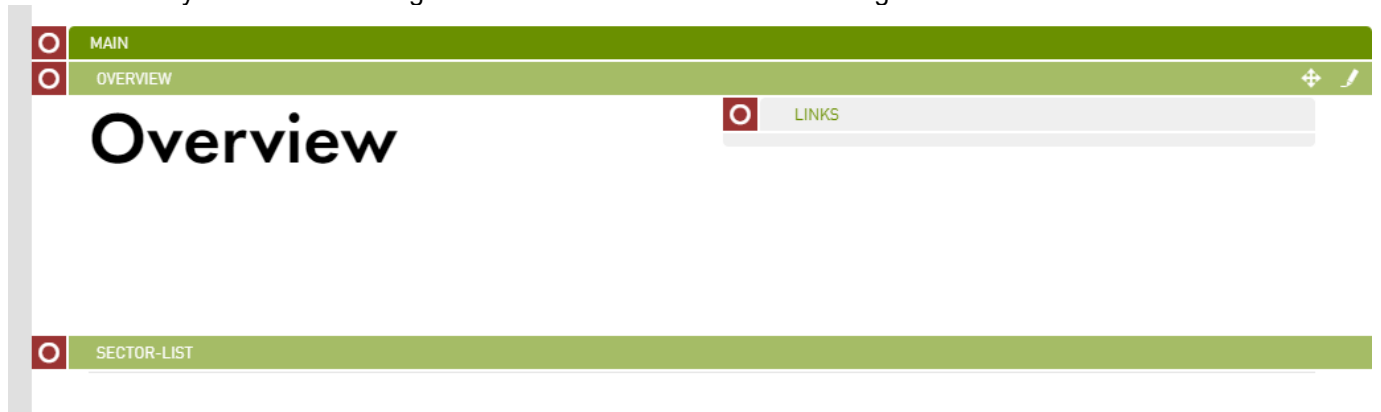

A dark green toolbar shows which element currently has the focus.

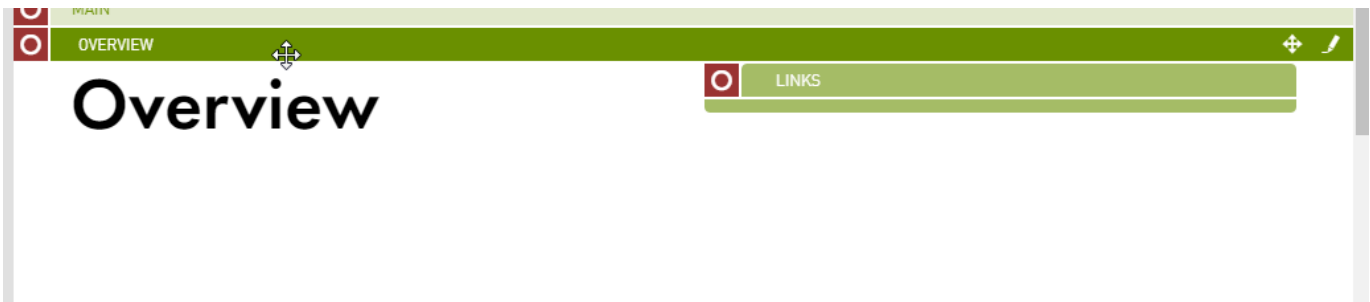

- In a freshly opened page all toolbars are light green. Nothing is selected so nothing is in focus.

- When you click an area it gets the focus. The area bar turns dark green.

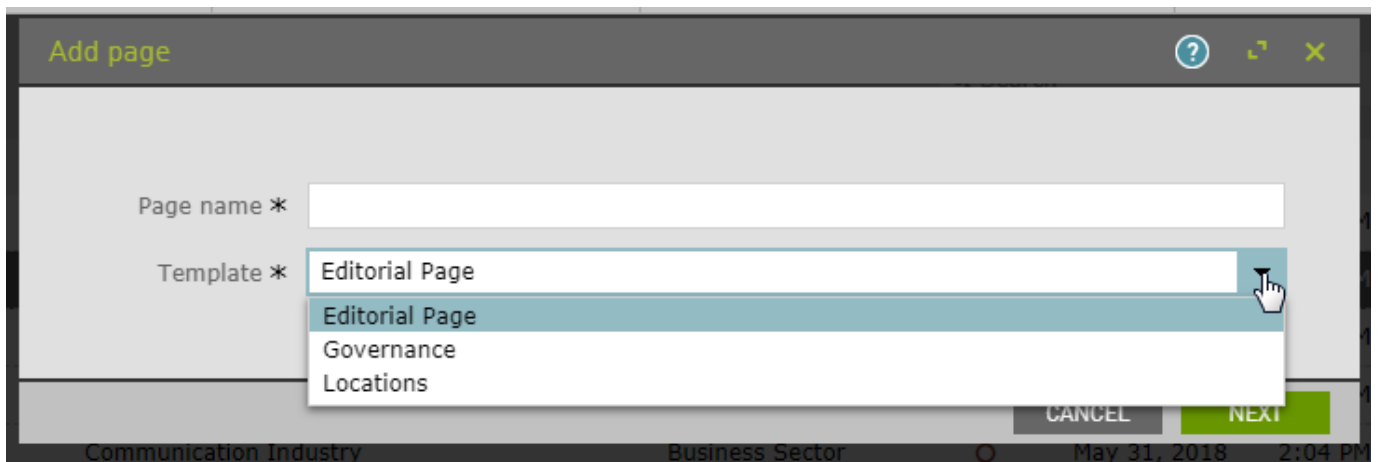

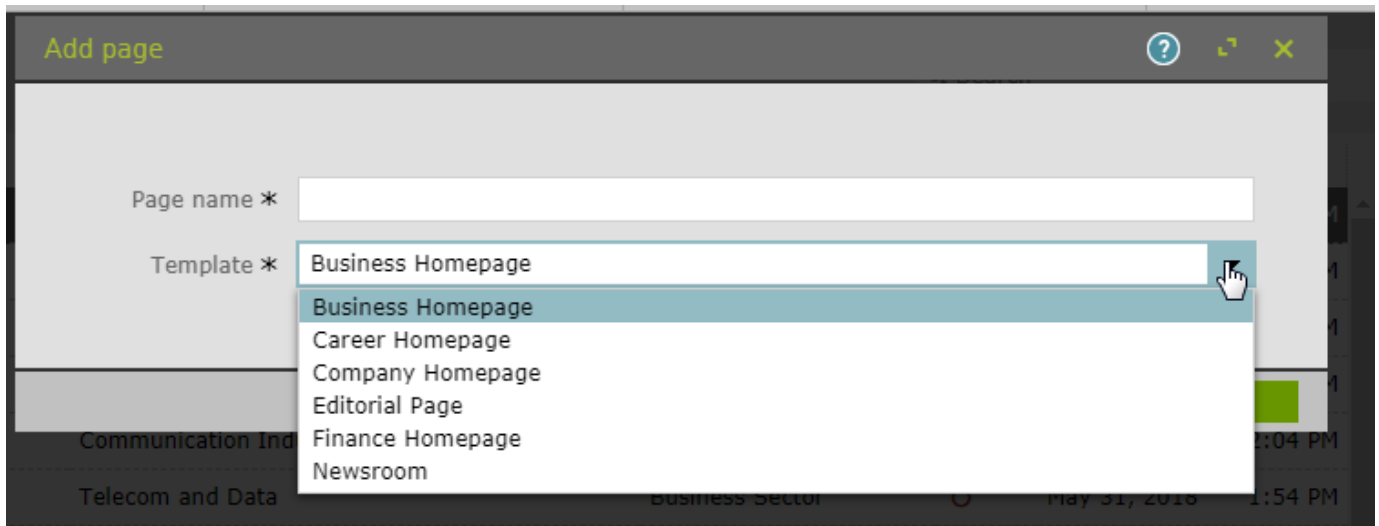

- When you click a component bar it gets the focus. The component bar turns dark green. The parent area is now light green.

Templates

Pages are based on templates. A template gives the page structure which is important for presenting content in the right order and building a consistent looking site. A template defines what components editors can create, edit and move on the page. They also define how many components are allowed in a particular area of the page. Without a template it would be difficult to keep the site design consistent.

Example: Choosing a template for a new page

Templates are divided into areas, each bearing its own set of components.

The division is done as follows

- COVER: top of the page

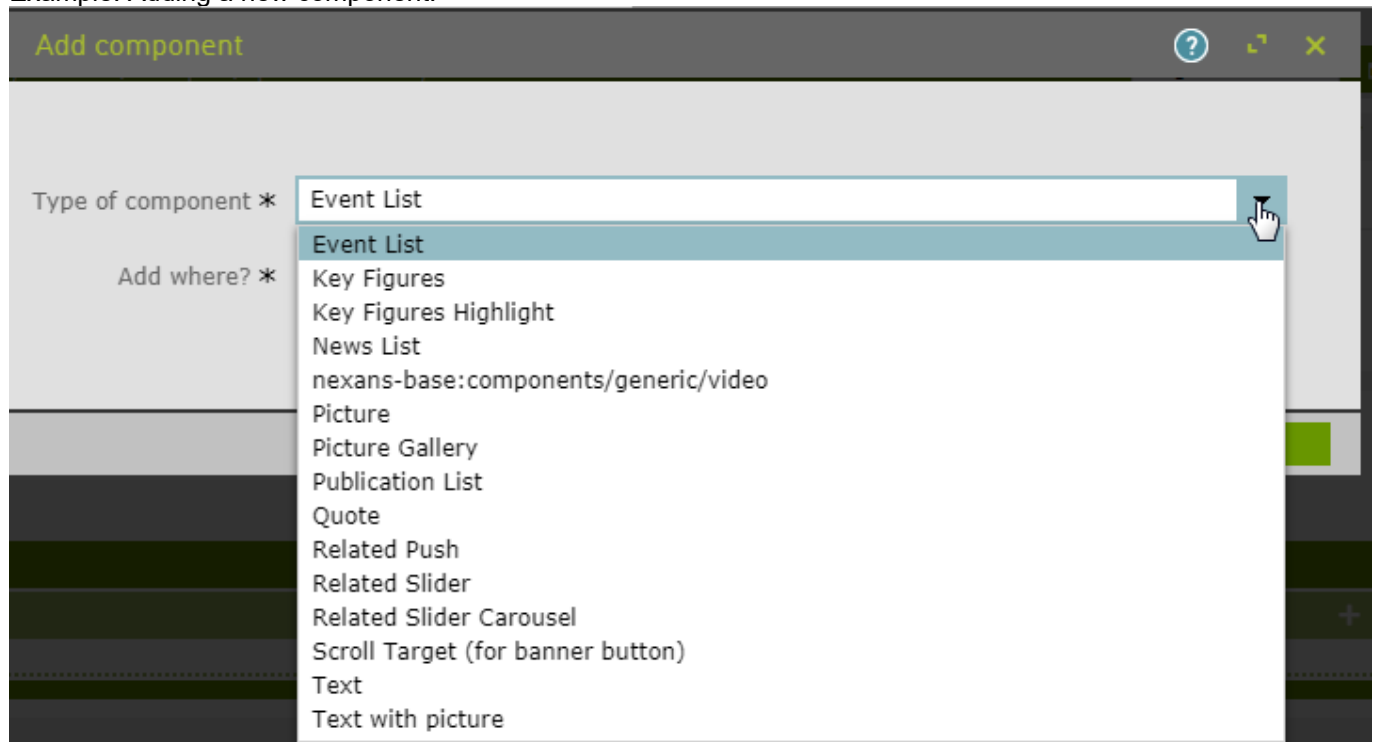

- MAIN: body bearing either mandatory blocks and/or free components (depending on the template=
- BOTTOM ZONE: this zone can be split into two
 - o a free zone where various components can be added (optional)
 - o bottom mandatory blocks
- RELATED: usually displayed at the bottom of the page, there are various types of related
 - o Related push
 - o Related market
 - o Transversal related blocks

Components

Components are the smallest blocks of editable content. At its simplest, a component consists of a heading and some text but can contain almost anything.

- To add a component, select an area first and click Add component in the action bar.
- To duplicate a component, select it and click Duplicate component in the action bar.
- To move a component, drag it above another component in the same area.
- To delete a component, select it and click Delete component in the action bar.
- To copy a component, select it and click Copy component in the action bar.
- To copy all components in an area, click on the area bar and click Copy components.
- To paste a component/s, copy the component/s, click on an area bar and click Paste component/s. You can paste the component multiple times by repeating the procedure.
- Note that if you copy a component from one area to another, the component must also be available in the target area for the paste operation to work.

Example: Adding a new component.

The component that has just been added to the page or duplicated in it will remain selected for further editorial actions.

Previewing pages

Click Preview page to see the page without toolbars

- Either click on the icon on the top right and the page will expand in a new tab
- Or use the right-hand menu: PREVIEW PAGE

Publication status

The page editor displays the publication status in the status bar at the bottom of the screen and on each component that has changed:

- Published (green, solid): Content was published from the author instance to the public instance. Identical content exists on both instances.
- Modified (yellow/amber, two rings): Content was modified since publication. The author instance is not in sync with the public.
- Unpublished (red, one ring): Content exists only on the author instance. It was never published.

Publishing means transferring content from a Magnolia author instance to public instances. The technical term for this process is activation.

Scheduled publishing

Publishing can be scheduled (activation) to a future date and include approval steps. Workflow is an Enterprise Edition feature. The editor who launches the publication workflow can add a comment for the reviewer and set a publication date.

Deleting and restoring

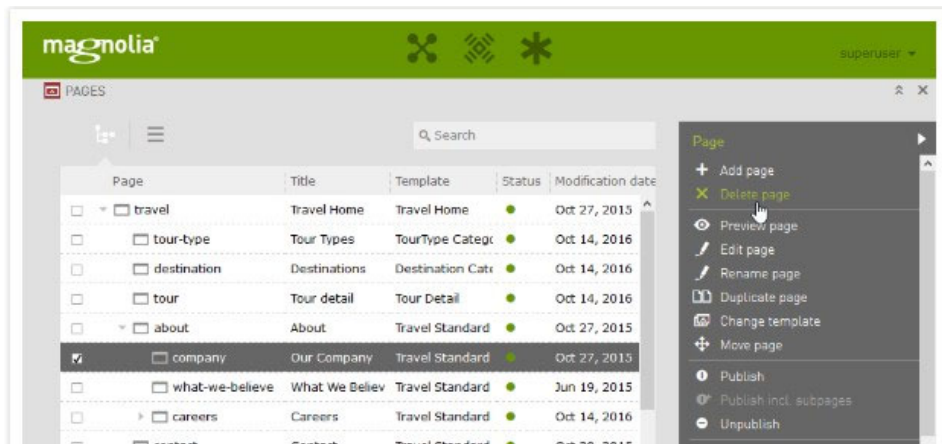

Editorial content is not deleted immediately. It is first marked for deletion. The deletion happens when the change is published. This provides an opportunity to restore content deleted in error. If workflow is enabled the deletion may be delayed until approved.

The principles and procedures in this section apply to all editorial content, including pages, assets, contacts, categories and any similar content type made available by a content app.

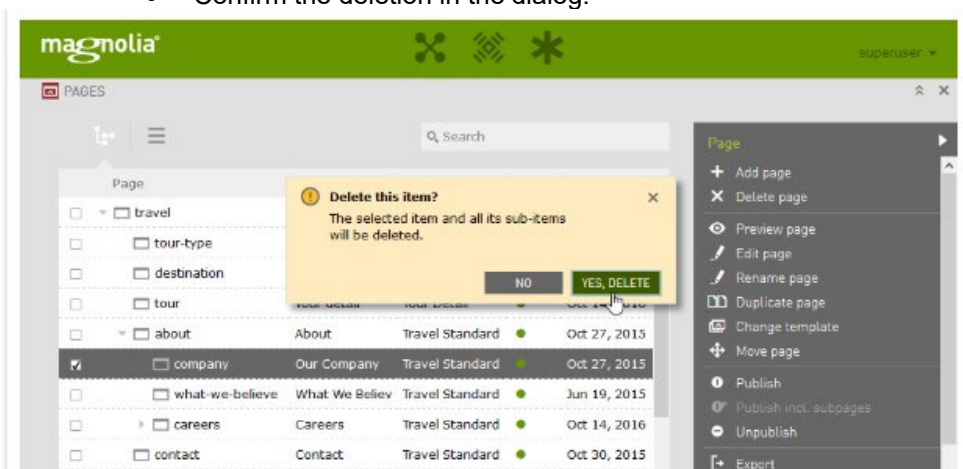

Deleting

When content is deleted it is permanently removed from both instances and cannot be restored.
To delete content:

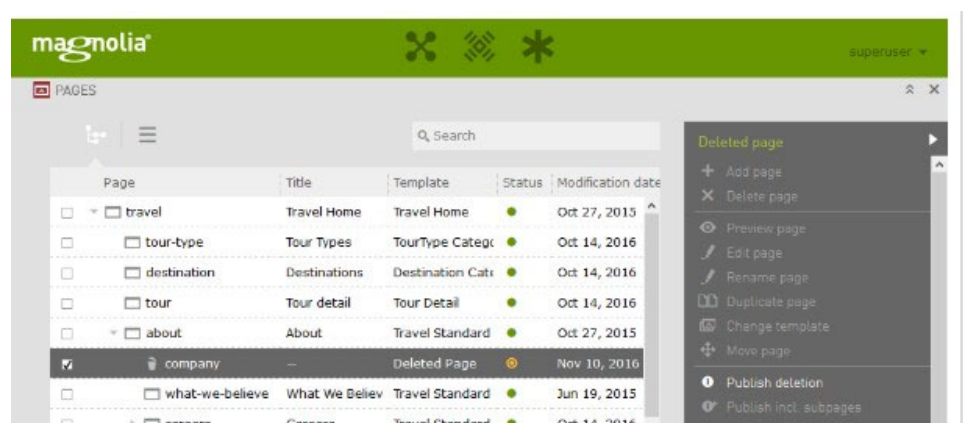

- Select the item and click Delete.

- Confirm the deletion in the dialog.

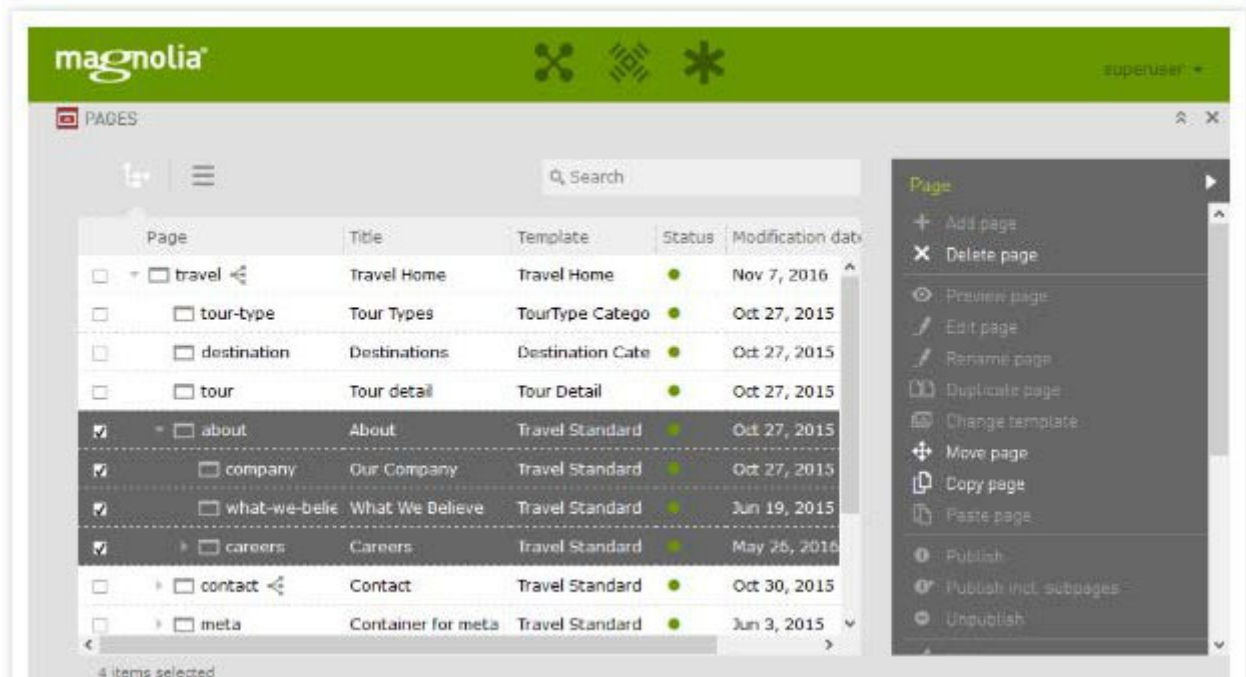

- The item is marked for deletion and the trash can icon renders next to the name. At this point in time:
A version is created.
You can still restore the item.

- Click Publish deletion to complete the deletion process.
If workflow is enabled the item is sent to a publisher for approval.
If workflow is not enabled, the item is removed from the tree.

Deleting multiple items

You can delete multiple items simultaneously by checking them and executing the Delete action once.

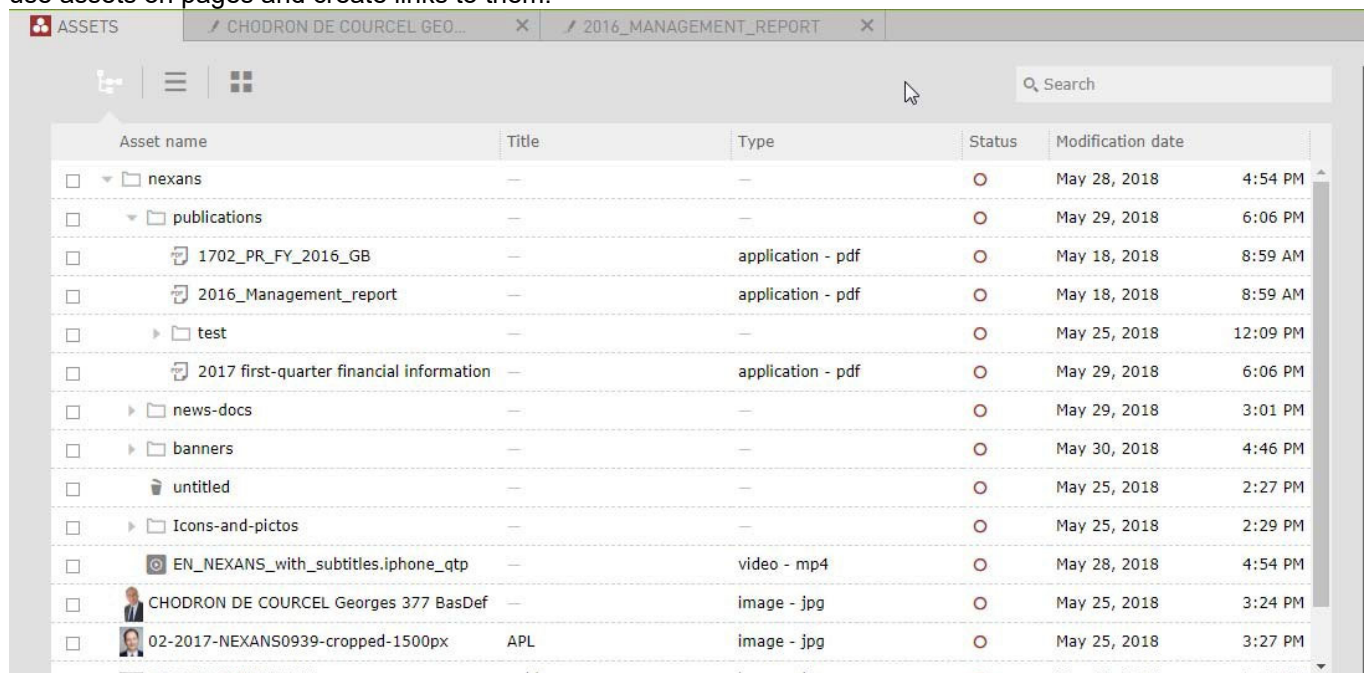

NB: make sure the content you are deleting doesn't contain any dependency. If you are trying to do so, you will get a warning message notifying you of the situation. If you decide to proceed you may have pages that will not be accessible or contain broken links

Restoring

The Restore previous version action restores an item to the state it had before deletion. You can only restore items that are marked for deletion. Once the deletion has been published you can no longer restore the item.

ASSETS

Assets are stored in one centralized location. You can view, manage and edit assets in the Assets app. You can use assets on pages and create links to them.

Assets stored can be used on Web pages, for example to display an image on the page or to link to a downloadable document.

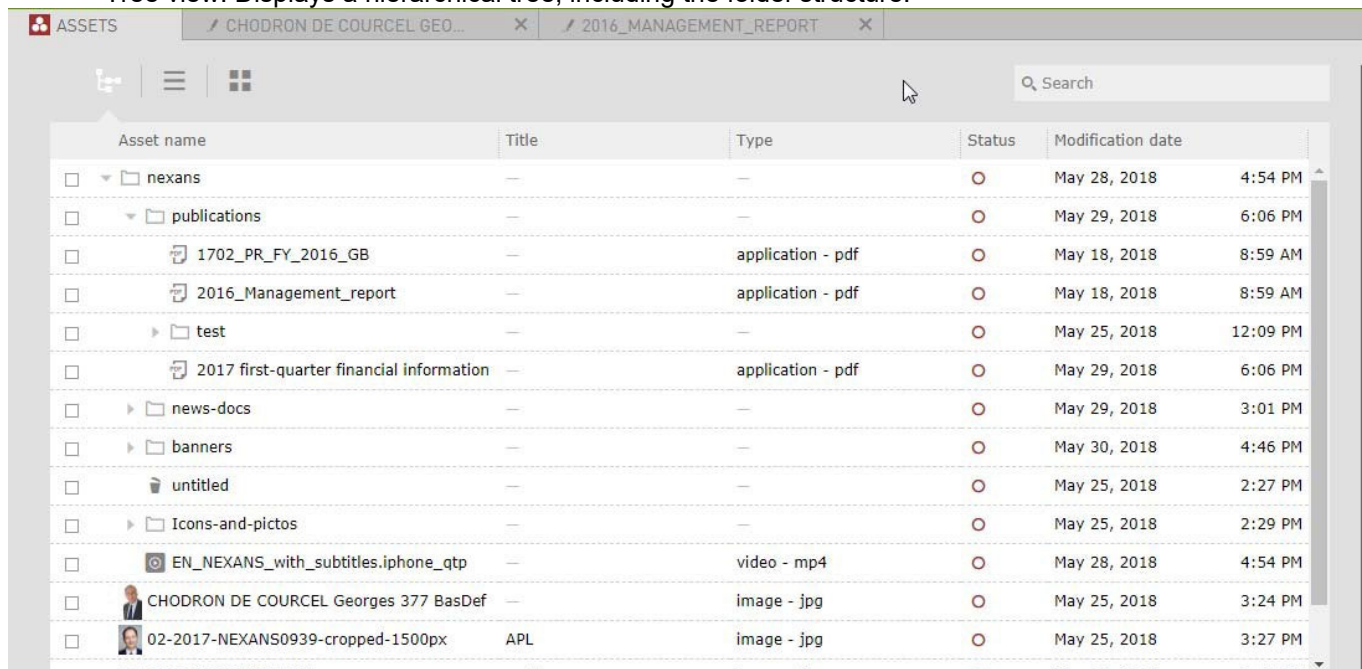

- Store all media types (image, video, audio, Flash, documents) in one place.
- Use assets on Web pages and in custom content types.
- Edit images.
- Metadata.
- Control access to assets and the editing functionality.

The Assets entry provides effective asset management and basic editing features. It is not intended to replace media tools that feature archiving and advanced edit functionality.

How to manage assets?

You can browse the Magnolia DAM in three views:

- Tree view: Displays a hierarchical tree, including the folder structure.

- Thumbnail view: Displays thumbnail images of the assets. There is a zoom control at the top for resizing.

The search box provides a simple search. Asset name, metadata and content of documents are indexed for search. The results display in list view. A Path column is included in the view to help you find the asset but the path not indexed in the default Jackrabbit/Lucene search configuration.

To upload an asset:

1. Select a parent folder or upload the image at the root level.
2. Click Upload asset.
3. Select a file to upload or drag and drop it into the Media field.

- Move asset
- Copy item
- Paste item
- Publish
- Unpublish

Preview

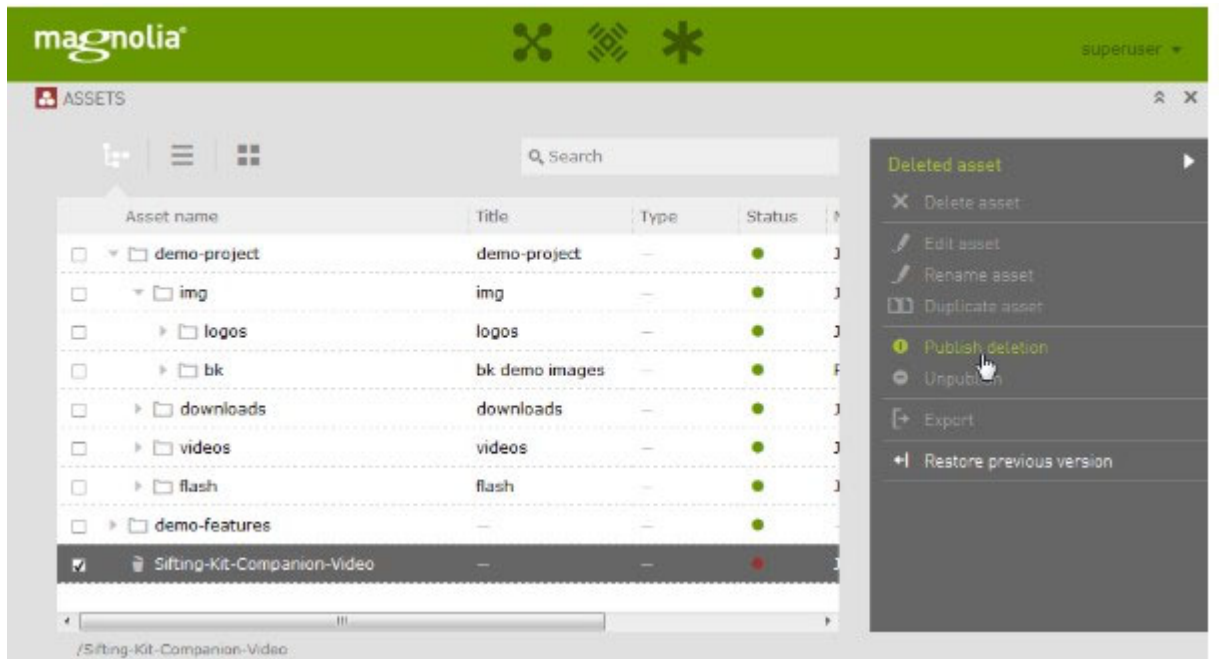

Deleting an asset

Versioning is enabled in the asset management entry. This allows you to restore previous versions of an asset or folder. The delete action marks the node for deletion and the deletion is completed on publication of the deletion.

To delete an asset or folder:

- Select an item.
- Click Delete folder/asset.
- Confirm your action in the dialog. This marks the node for deletion and creates a restorable version. The item icon (folder or node) is replaced with the trash bin.
- Click Publish deletion to complete the deletion. At this point you can cancel the deletion by clicking Restore previous version.

Images

A whole series of information is required when uploading images on the site which is called: asset metadata. The more you fill in the better it is when it comes to asset management.

Asset metadata

The metadata fields are located in the Asset dialog. You can set metadata when uploading or add/edit it by clicking Edit asset to open the dialog. **Please make sure the fields in red are filled in**

the system records certain data automatically and the content of these fields typically cannot be edited and are disabled. By default, the following fields cannot be edited (those marked with an * are not currently used) :

- **Asset name:** if not filled in, will be equal to the file name. Make sure you enter a proper name/description to retrieve it more easily afterwards
- **Caption:** will be displayed next to the asset name
- ***Identifier:** An unambiguous reference to the resource within a given context. An alphanumerical string is used to identify and reference the asset. Editors can move assets without breaking links in the DAM.

- *Type The nature or genre of the resource.
- Language: specify language of picture if any using standard code (en for ENGLISH and fr for FRENCH)
- Title: title of the picture
- Subject: topic of the picture / keywords, description...
- Coverage: Scope of the asset. Typically this refers to a place, period or jurisdiction.
- Description: Full description of the asset. Displayed, for example, when an image is zoomed in the Image Gallery component.
- * Creation Date: Date of upload.
- * Modification Date: Date of last modification.
- * Creator *: An entity primarily responsible for making the resource..
- Description: Full description of the asset. Displayed, for example, when an image is zoomed in the Image Gallery component.
- Publisher: Original publisher of the asset if being republished from another source.
- Contributor: Use to name asset contributors.
- Rights: Type of copyright ©
- Source: A related asset from which this asset is derived.
- Relation: Related assets.
- Document Type
- Category => tag

Setting alt attributes

The alt attribute of the img tag specifies alternative text for an image when that image cannot be displayed on a page. The standard rule is to use concise text that serves the same function as the image.

Editing images

The Asset management page provides basic image editing functionality. You can edit all images, i.e. uploaded images and duplicates. Images are edited in the image editor.

To open the image editor:

1. Select an image.
2. Click **Edit asset** in the action bar.
3. Click  or **Edit image** in the **Media** field.
4. The image editor opens in the same tab.

NOTE: If you edit an image directly after upload, the edited image will be stored in the asset management and you will not be able to revert to the uploaded version without re-uploading. To retain the uploaded version, save it directly after upload and edit a duplicate.

The image editor displays:

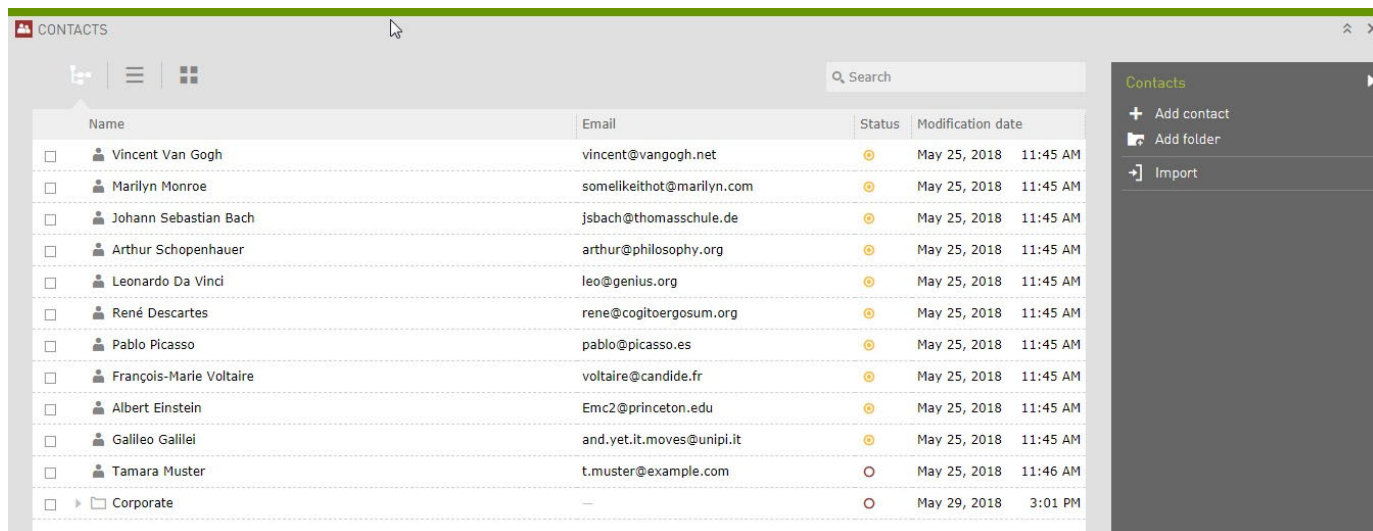

- Image in full size. If the image is larger than the available screen, scroll bars display to the right and below the image.
- Editing actions: Edits are executed sequentially, for example you can crop, then rotate, then crop again.
- Crop: Crops the image.
- Rotate: Rotates the image 90° to the right with each click.
- Flip: Flips the image either horizontally or vertically.
- Undo/Redo: Reverts to the state before the previous edit action, or re-executes the previous edit action. During the editing process the action names change dynamically to indicate what will be undone or redone, for example Undo crop image and Redo rotate right.
- Viewing actions:
- Zoom: Zooms the image to fit the window or to the actual image size. (warning) Once you have scaled to fit you can continue to resize your browser and the image will continue to adapt dynamically.
- Image size (in pixels) below the image.
- Cancel editing and Save changes. Both actions close the editor and return you to the Asset dialog. The button names change dynamically to Crop image and Cancel after executing a crop, but for other editing actions they retain their default state.

You can edit a number of images simultaneously by opening the image editor in multiple tabs. This is useful when making the same edits to many images, for example cropping to the same size or flipping.

CONTACTS

Contacts are stored in one centralized location. You can view, manage and edit assets in the Contacts entry. You can use contacts on pages and allocate therefore specific contacts to specific contents.

BLOG AUTHORS: authors on blog posts will be managed like contacts. Authors will be stored in a specific folder (associated with the corresponding blog on the site). Additional information is needed for blog posts (optional but still nice to have): picture and biography of the contacts. That information will be filled in the contact sheet.

NEWS

News are stored in one centralized location. You can view, manage and edit them in the News entry. News will be displayed in the NEWSROOM section under a news list. They can also be displayed on various pages of the site (manual selection / selection based on tags / latest news). News will bear tags (based on a predefined list of categories) to allow easier selection and filtering from the news page but also from any other page of the site.

Folder

- + Add page
- + Add folder
- ✕ Delete folder
- ✎ Rename Folder
- ⇅ Move folder
- Publish
- Unpublish
- ➦ Export
- ➦ Import

You can classify news in specific folders (Year / topics ...) to retrieve them more easily once created and should you need to pull them from various pages.

From this page, you can

- Add a page – detailed news page only
- Add a folder containing a list of news
- Delete a folder (be careful when doing so that this folder doesn't contain any news)
- Rename folder
- Move folder
- Publish content
- Export in specific formats
- Import

When selecting a news, you can

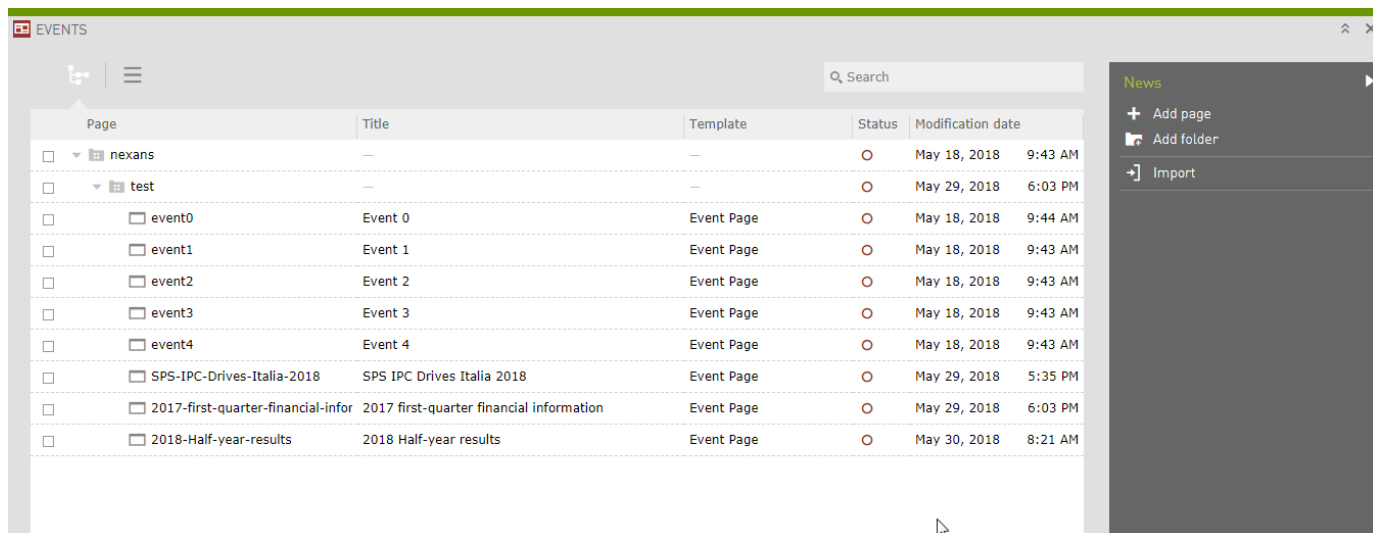

- Edit it to modify it
- Rename
- Delete
- Duplicate (to create new ones)
- Move the page
- Export / import

All news must be created in this entry. To create a news, just position your mouse on a folder and click on Add page. One single page template is available News page. Please refer to news section to get additional information about type of components you may use in this template.

EVENTS

Events are stored in one centralized location. You can view, manage and edit them in the Events entry. Events will be displayed in the NEWSROOM section under an event list. They can also be displayed on various pages of the site (manual selection / selection based on tags / latest events).

Events will be tagged just like the news to allow an easier selection and filtering. On top of the category, they will also be tagged per type of events – based on a predefined list.

PUBLICATIONS LIST

Publications are stored in one centralized location. You can view, manage and edit them in the Publications entry. Publications will be displayed in the NEWSROOM section under a publication list. They can also be displayed on various pages of the site (manual selection / selection based on tags / latest publications). Publications will be tagged just like the news to allow an easier selection and filtering. On top of the category, they will also be tagged per type of documents – based on a predefined list.

You can classify publications in specific folders (Year / topics ...) to retrieve them more easily once created and should you need to pull them from various pages of the site.

From this page, you can

- Add a publication
- Add a folder containing a list of publications
- Delete a folder (be careful when doing so that this folder doesn't contain any publication)
- Rename folder
- Move folder
- Publish content
- Export in specific formats
- Import

When selecting a publication, you can

- Edit it to amend
- Delete it

All publications must be created in this entry. To create a new publication, just position your mouse on a folder and click on Add publication.

You will need to fill in a series of elements

PUBLICATION	CATEGORIES	SHOW ALL
Name	2017-first-quarter-financial-information	
Title (en)	2017 first-quarter financial information	
Date	2017-03-31 	
Document (en)	<div>  <div> File info Title 1705_Nexans_CommuniqueQ12017_GB File size 300 KB File format pdf </div> </div>	
	<input type="text" value="/nexans/publications/1705_Nexans_CommuniqueQ12017_GB.pdf"/> SELECT NEW...	
Type	<input type="text"/> SELECT NEW...	

Publication tab

- Name: name of the file in the repository
- Title (en): title that will be displayed on the page in ENGLISH
- Date of the publication
- Upload the document (in English)
- Type: select the corresponding tag for the document type

Don't forget to do the same in FRENCH by switching language at the bottom of the window to proceed with the FRENCH versions

Categories tab: allocate one main categories and optional ones (if a document should be found under several categories for instance company + finance)

PUBLICATION	CATEGORIES	SHOW ALL
Select main category	<input type="text" value="/categories/company"/> SELECT NEW...	
Select optional categ...	<input type="button" value="ADD"/>	
<div> English ▼ CANCEL SAVE CHANGES </div>		

Select the main one in the list (the main one will be displayed on the page) and if needed optional ones (you can add as many as you need – they will be used for the search);

PUBLICATION SET

In order to ease the management of a great deal of documents of the site (for instance FINANCE), an alternative of the standard publication list is available which is called PUBLICATION SET.

Publication set templates will allow you to create publications list pages gathering some specific types of

publications.

This template is available from any page of the site;

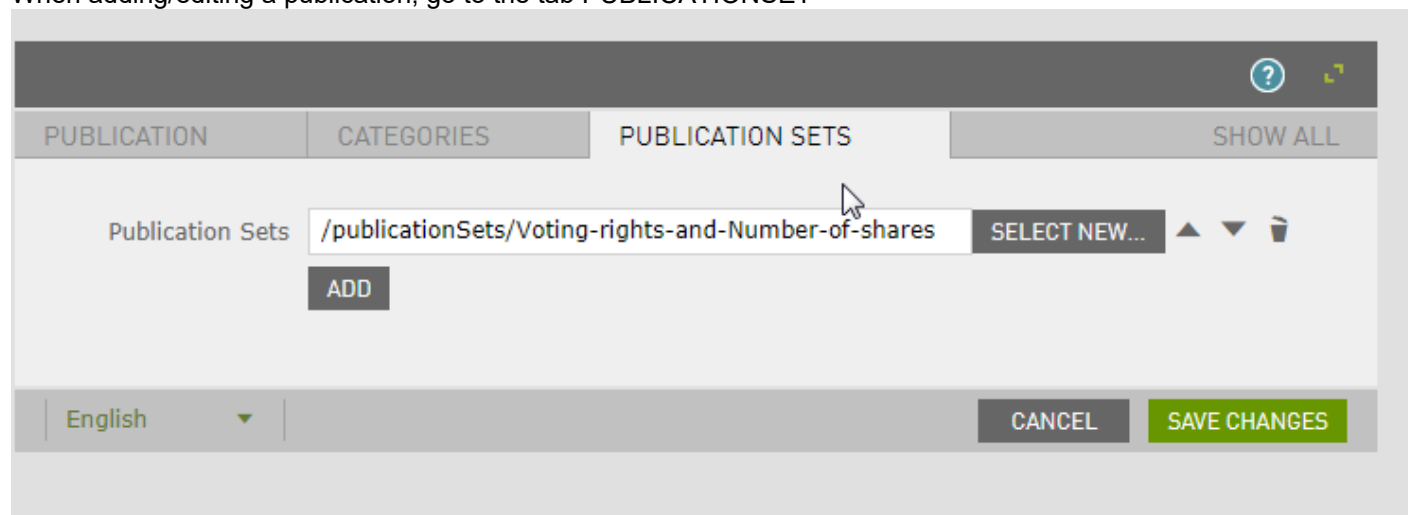

<input type="checkbox"/> Regulatory-information	Regulated Information	Editorial Page	●	Sep 18, 2018	4:20 PM
<input type="checkbox"/> Number-of-shares-and-votir	Number of shares and voting rights	Publication Set	●	Sep 18, 2018	1:29 PM
<input type="checkbox"/> Share-buyback	Share buyback	Publication Set	●	Sep 18, 2018	1:30 PM
<input type="checkbox"/> AMF-notes	AMF Notes	Publication Set	●	Sep 18, 2018	1:30 PM
<input type="checkbox"/> Inside-information	Inside Information	Publication Set	●	Sep 18, 2018	1:30 PM
<input type="checkbox"/> Statutory-information	Statutory Information	Publication Set	●	Sep 18, 2018	1:30 PM
<input type="checkbox"/> Quarterly-financial-informat	Quarterly Financial Information	Publication Set	●	Sep 18, 2018	1:30 PM

The publication set template picks up and displays publications that are tagged according to what you will set. Therefore, in order to retrieve publications within publication set templates, you'll have to make sure that the corresponding tags are set at publication level.

How to add a publication set?

Publications Sets are managed and created centrally. If you wish to add new values to the list / remove or amend existing ones, please contact the central support teams.

When adding/editing a publication, go to the tab PUBLICATIONSET

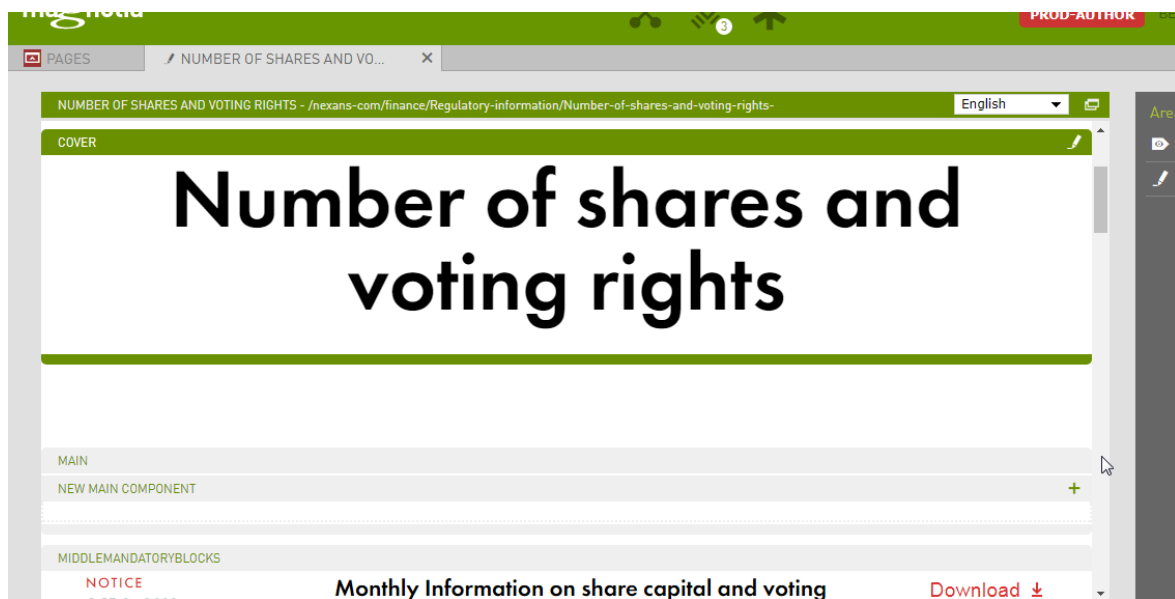

Select one or several publications sets from the predefined list.

Once defined, click on SAVE CHANGES.

Please note that this tag will not be visible to external users, it's purely used to manage the publication set templates.

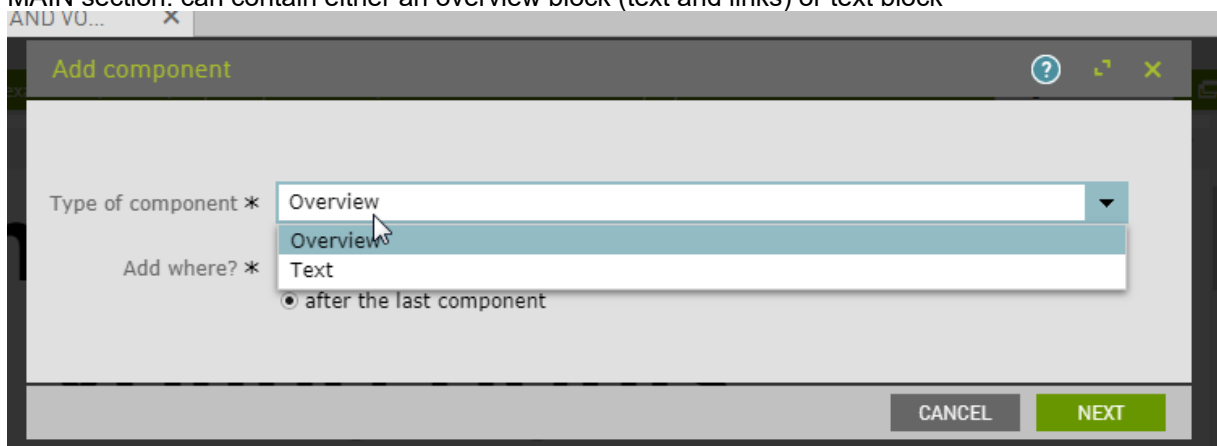

Once your publications are all tagged properly, you can create the corresponding publication set types of pages. The publication set pages are similar to publication list types, apart from the fact that they don't have any filters showing at the top of the page (considering they are already filtered, there is no need to add such filters).

Once the page has been added to the chosen section, edit the page:

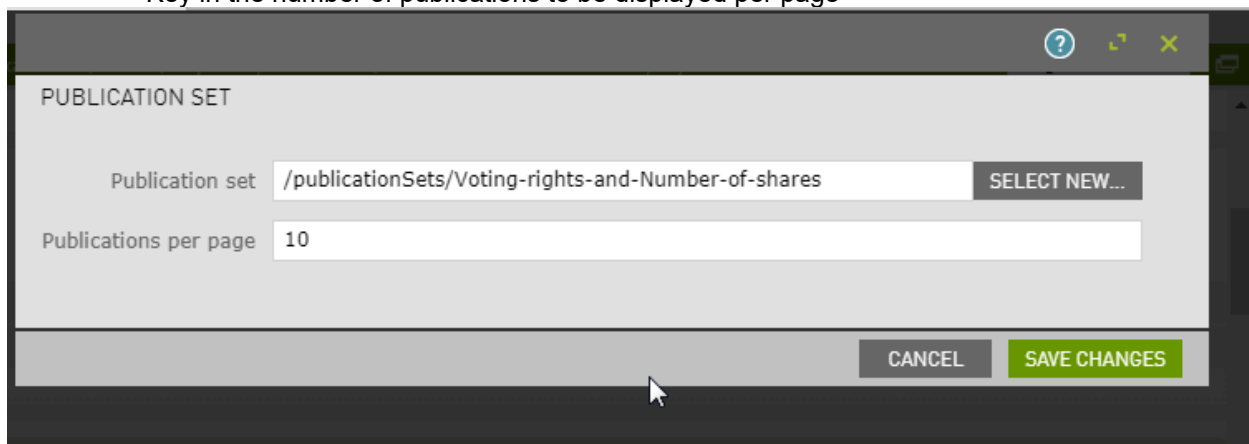

The page is made up of the following components

- COVER: made up of a title, introduction, image (optional), button text (optional – for cover image mostly).
- MAIN section: can contain either an overview block (text and links) or text block

- MIDDLE MANDATORY BLOCK: will hold the publication set component
 - Select the publication set in order to pick the corresponding publications
 - Key in the number of publications to be displayed per page

- BOTTOM MANDATORY BLOCKS: as on other pages, contain the RELATED TRANSVERSAL blocks

Don't forget to fill in the French version for each component as well.

Once done, you'll be able to publish your page

Share buyback

Download 

The publication set component can also be included within other pages of the site, like a section home page for example. This will allow you to pick up some specific publications from other pages of the site and then direct to the publication set pages where all the documents can be found.

Example: once your publication set type of page has been created, you will certainly want to direct people to that particular page. To do so, go to the section page where you'd like to highlight some of the documents.

Add a new component within the page PUBLICATION SET – instead of adding a standard publication list component.

The screenshot shows a configuration window titled "PUBLICATION SET". It contains the following fields and controls:

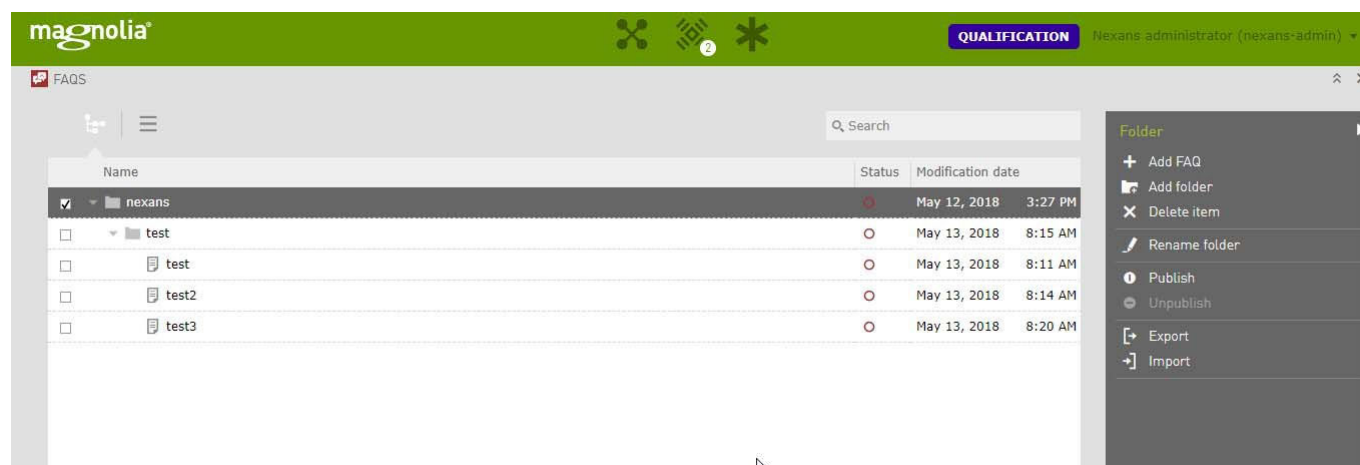

- Title (en):** A text input field containing "Inside information".
- Publication set:** A dropdown menu showing "/publicationSets/Inside-information" with a "SELECT NEW..." button to its right.
- View all page:** A dropdown menu showing "/nexans-com/finance/Regulatory-information/Inside-information" with a "SELECT NEW..." button to its right.
- Show thumbnails:** A checkbox labeled "show thumbnails" which is currently unchecked.
- Language:** A dropdown menu at the bottom left showing "English".
- Buttons:** "CANCEL" and "SAVE CHANGES" buttons at the bottom right.

- Key in the title and then select the publication set (tag you added at publications level) from the predefined list.
- Select the target page (the block will only show 3 publications, then the view all link will allow users to go to the page where all corresponding publications will show)
- You can decide to show thumbnails of the publications (cover image)

FAQ

FAQs are stored in one centralized location. You can view, manage and edit them in the FAQs entry. FAQ pages can be added in various sections of the site and may contain a selection of topics and their corresponding questions and answers that were created in the FAQ section.

It is highly recommended to classify FAQ in folders to be able to retrieve them up easily and pick the relevant ones from the corresponding pages (topics).

From this page, you can

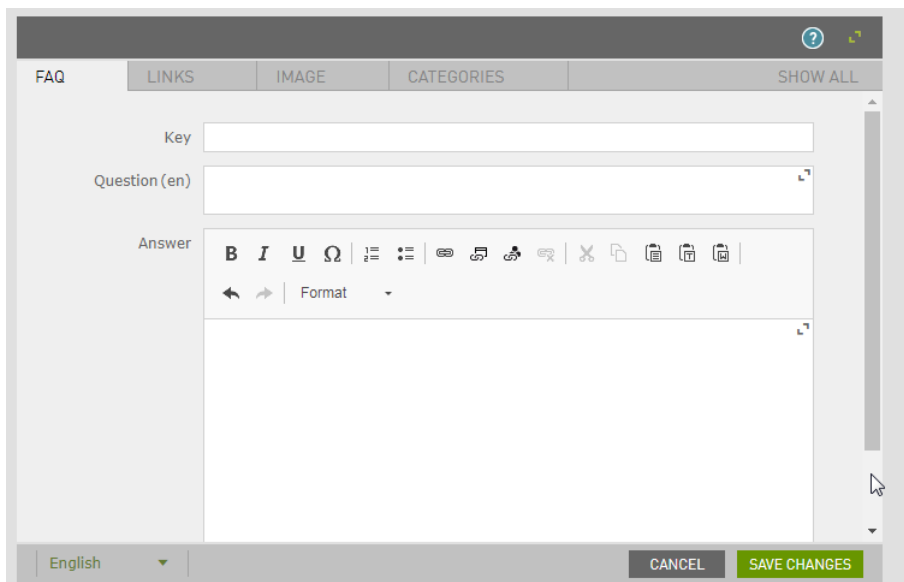

- Add a FAQ
- Add a folder
- Delete an item
- Rename folders
- Publish
- Export in specific formats
- Import

When selecting a FAQ, you can

- Edit it to modify it
- Delete

All FAQs must be created in this entry. To create a new FAQ, just position your mouse on a folder to add questions in a specific folder and click on ADD FAQ or at root level and click ADD FOLDER.

To create a FAQ, click on the corresponding folder and then click on ADD FAQ

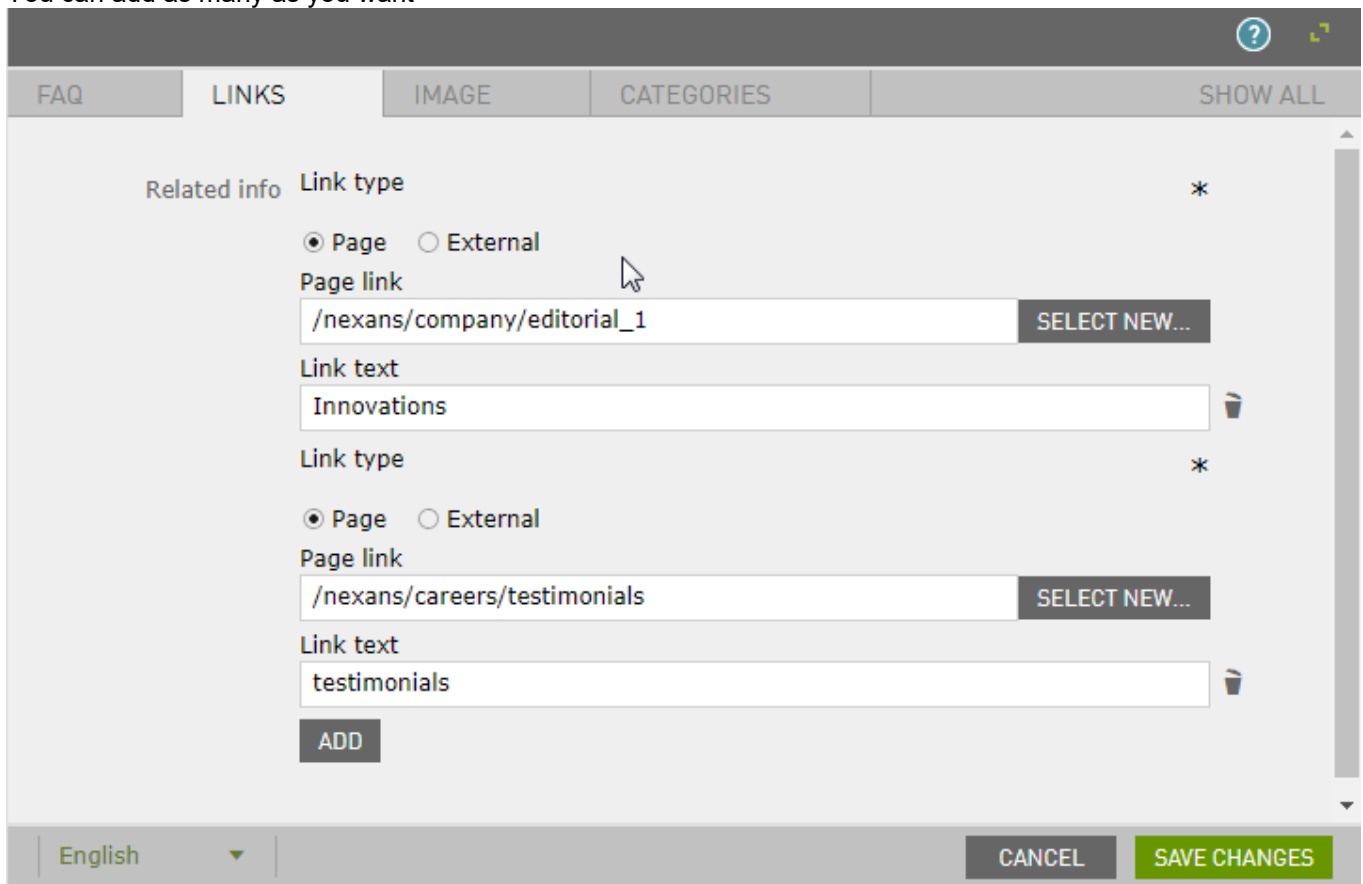

4 tabs are available

TAB FAQ: that's where the content is held

- KEY: internal reference to retrieve your FAQ afterwards from any page
- Question
- Answer

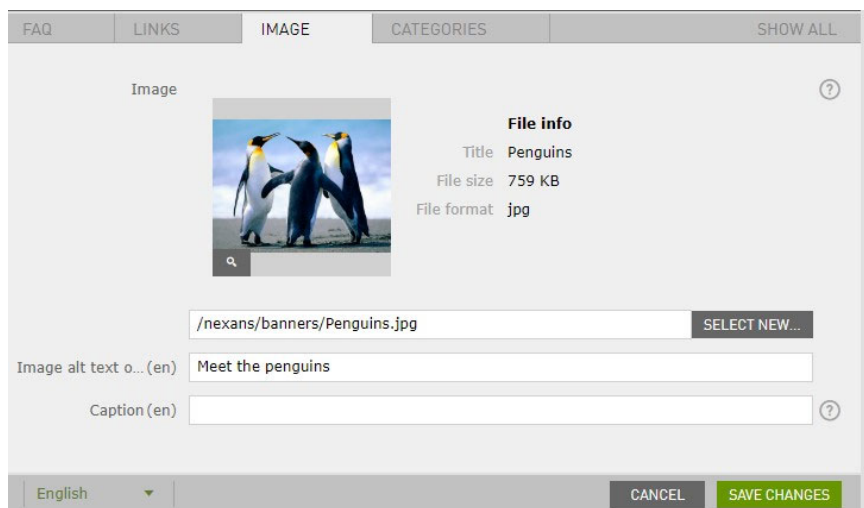

TAB LINKS: add related link within a FAQ to redirect users to a dedicated page of the site or to an external site. You can add as many as you want

- Link type: either page of the site or external link
- Page link: select the related content
- Link text: label of the link

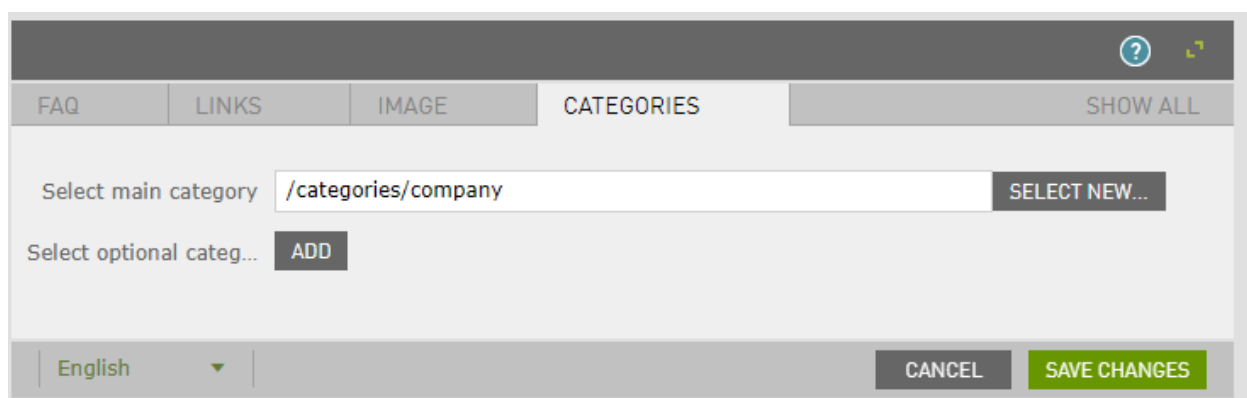

Links will be displayed below the answer

TAB IMAGE: you can add an image within a FAQ

The image will show at the end of the question. The image can be added from the asset management library or you can also upload a new one (see explanations in the section related to asset management)

TAB CATEGORIES: tag the content accordingly

You can add one main tag and optional ones as for any other content of the site.

Once done don't forget to fill in the French translation and click on SAVE CHANGES once finished.

A specific template exists for FAQ, please refer to FAQ section to get additional information about type of components you may use in this template.

BUSINESS TEMPLATES

The business module gathers the following content types:

- Business Homepage (mains section)
- Business Sector
- Business Segment
- Case Study

Button text(en)

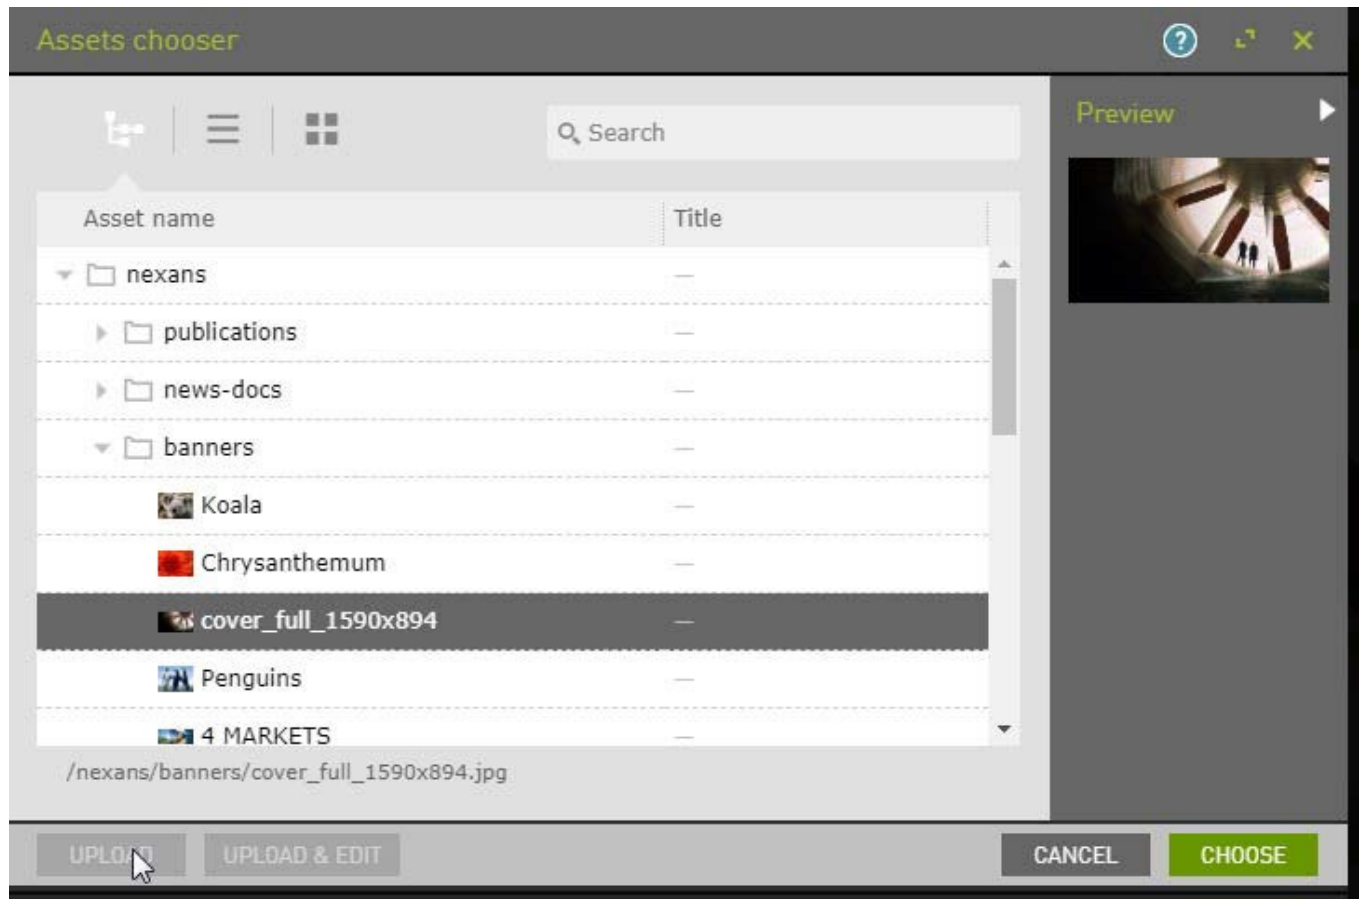

English ▼

The cover is made up of the following elements

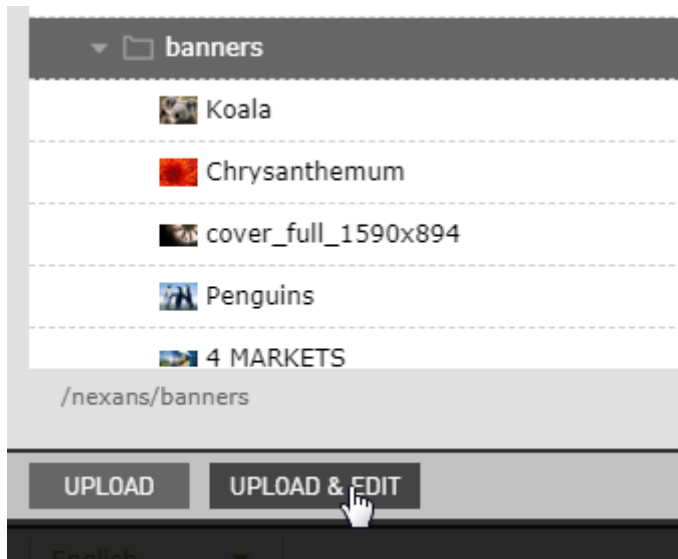

- TITLE
- INTRODUCTION
- IMAGE - Contribution: Min width: 1590px - Height: auto. 1590x894 – displayed as follows
 - "Large Desktop >1360px": 1590x818
 - "Desktop <1360px": 1360x765
 - "Tablet portrait >768px": 768x432
 - "Mobile >320px": 320x400 – mobile version to be uploaded
- BUTTON (anchor linking to first block of the page) (optional)

To upload an image, click on the button SELECT NEW:

- Either you select an existing image in the repository: select the image and click on UPLOAD

- Or upload a new one: position the mouse on the folder in which you'd like to upload the image. Then click on UPLOAD AND EDIT

The following screen will show

Upload the file at the top (MEDIA block) and then key in the relevant information.

TIP just click on the question mark icon to get the meaning of each field !

- Asset name: name of the file. By default, the system will pick up the file name, but you can add a specific name
- Caption: showing next to the asset name to get additional information about the image
- Language: use standard code for language – ex: en for ENGLISH, fr-BE for French Belgium
- Title: title of the image (picked up by Search engines)
- Subject topic of the resource / key words for ex: business segment
- Coverage: if a specific jurisdiction applies (depending on image rights for instance – only valid for a country) or spatial coverage (only applicable to one country / one territory / duration...)
- Description: usually the abstract of the image / additional information (if graph for instance). Useful for referencing

- Creation date / modification date / creator: will be filled in automatically by the system
- Publisher: person name / company responsible for making the resource available
- Contributor: entity responsible for making the contribution of the asset
- Rights: rights held over the resource, more specifically COPYRIGHT
- Source: source from which it is derived
- Relation: a related resource
- Document type: specify the document, for instance: annual report
- Tag: select appropriate tag for the asset among the list of tags defined for the site

MAIN

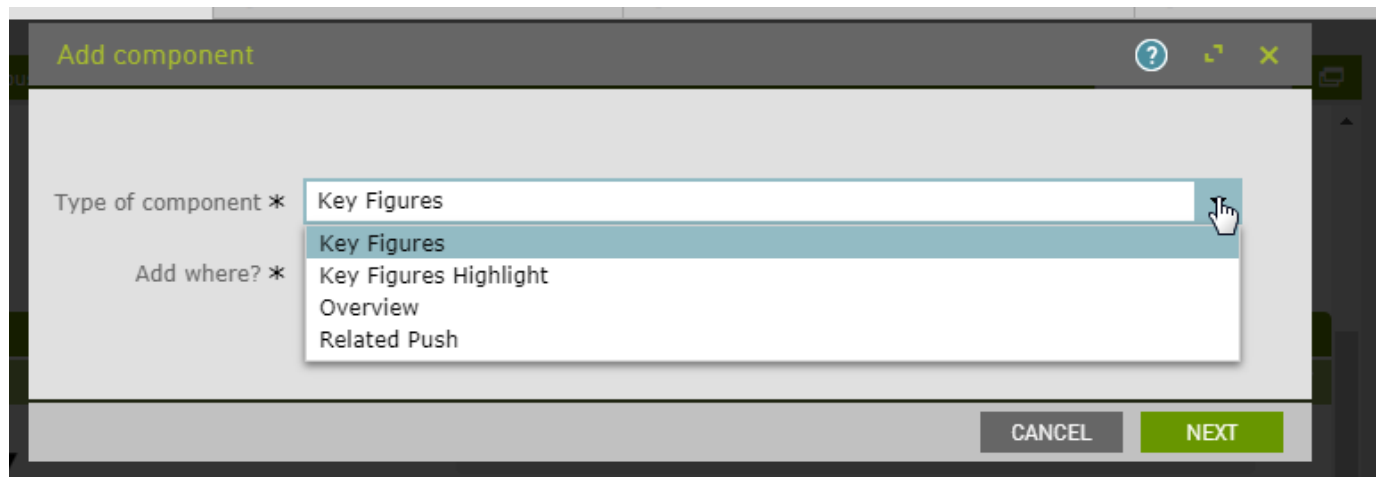

The main area section of the business home page contains the following elements

- Sector list block: mandatory – not manageable – and allowing to access to the sub levels. The block is filled up automatically based on the sub-navigations
- Free zone where you can add the following components
 - o Key figures block
 - o Key figures highlight block
 - o Overview block
 - o Related push block

To add one of the components, just select the area MAIN and click on the option Add a component in the menu on the right-hand side

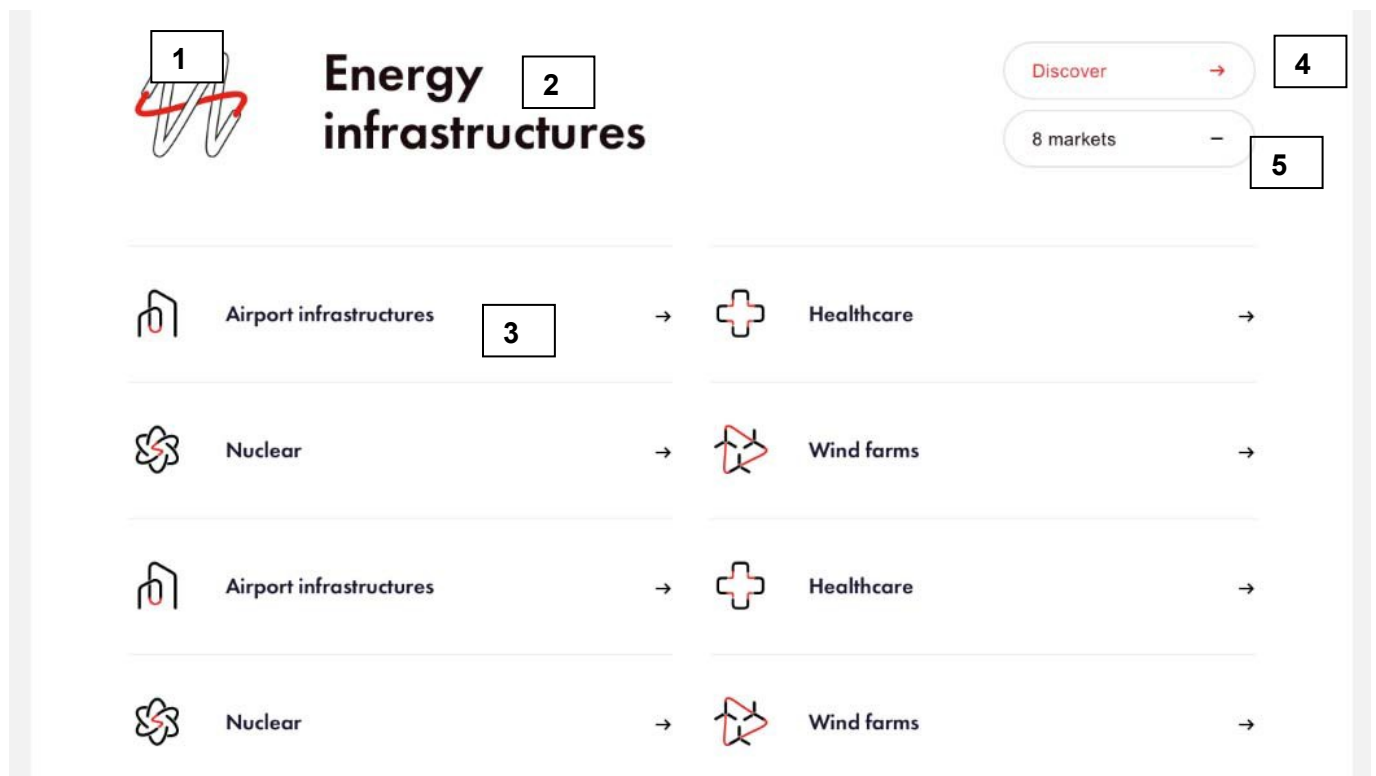

Select the block you want to add on the page – please refer to the list of blocks at the end of the document to get the corresponding options.

Once all components are laid out on the page, you can still move them around, remove them, amend them, and even add new ones by duplicating existing ones. All options are in the right-hand menu

BUSINESS-SECTOR-BLOC-LIST + SECTOR-BLOC-LIST-EXPAND

This block is fixed and mandatory on that page. It is automatically populated based on the sub-navigations.

Content characteristics

	Key		Description	Interactions / Actions / Links
1	BUSINESS-SECTOR_ICON		Defined in the sector content	
2	BUSINESS-SECTOR_NAME		Defined in the sector content	
3	BUSINESS-SEGMENT_LIST	BUSINESS-SEGMENT_ICON	Defined in the segment content	OnClick: Link to segment page
		BUSINESS-SEGMENT_NAME	Defined in the segment content	OnClick Link to segment page

Interface elements

	Element	Element interaction / Link
4	Button text: string (translatable)	Link to sector page
5	Button text: number of markets related to the sector	On Click: open/close an expand block with the list of markets related to the sector

BOTTOM MANDATORY BLOCKS

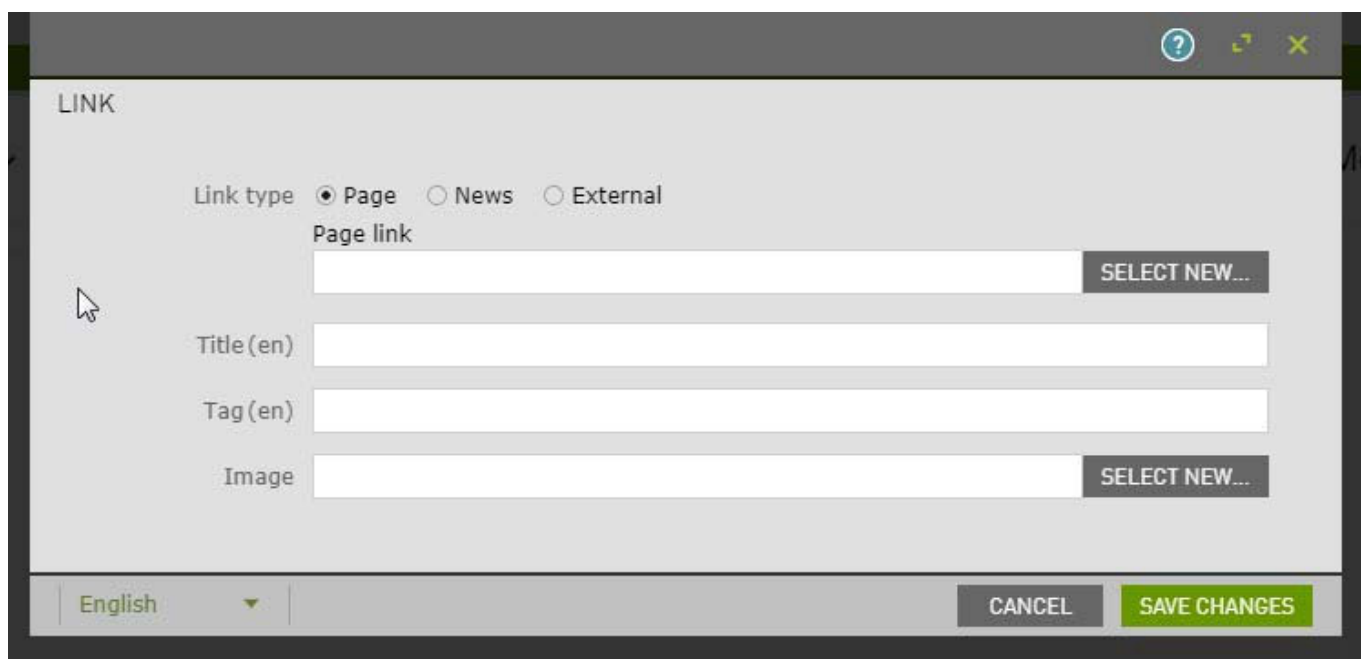

The bottom area contains links to other contents located on the site or external. Blocks containing related contents are made up of images + text and links.

RELATED-TRANSVERSAL

There can be up to 3 related at the bottom of the page. To add new related, just position the mouse on the area, on the RELATED component. Click on the + icon

The following screen will show up

You can either insert a link to a page, a news page or an external link.

Once the type of link has been set, just key in the relevant information:

- Select the page link or news link or key in the external URL for external sites
- Key in a title
- Key in a tag
- Select an image from the asset management library or upload a new one

Results with 3 links

Template structure

The sector pages display Nexans offer presented by markets. The page template is fixed according to the below and made up according to the following components

<input type="checkbox"/> > careers	We share success with our employees	Career Homepage

To open the page, double click on it or just use the right-hand menu and select EDIT PAGE.

The page will open in a new tab as follows

You can edit the page properties using the menu on the right-hand side allowing to update the information of the page. The information is split into two tabs: Main tab containing the main properties /data of the page and a META DATA tab holding the meta data you need to set for the page (SEO)

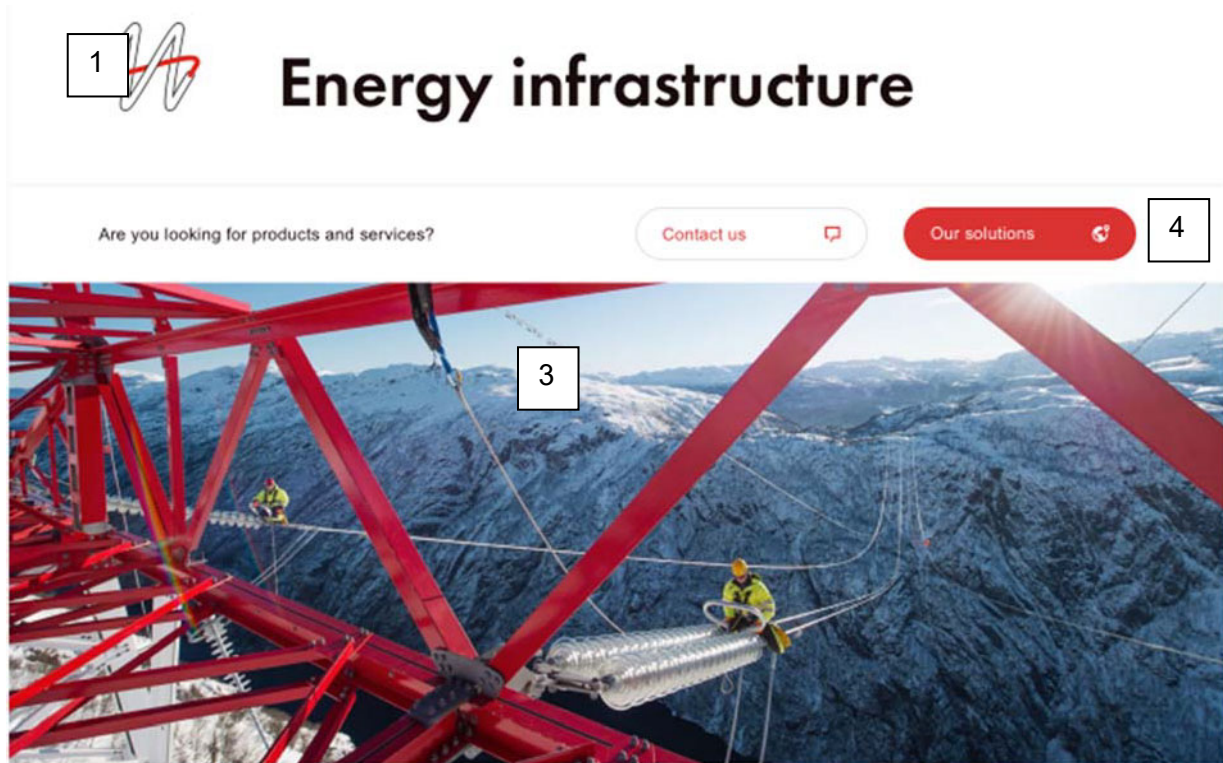

The page is made up of COMPONENTS, blocks that will contain the elements of the page.

To manage the elements of the page, just click on one of them: COVER / MAIN / BOTTOM.

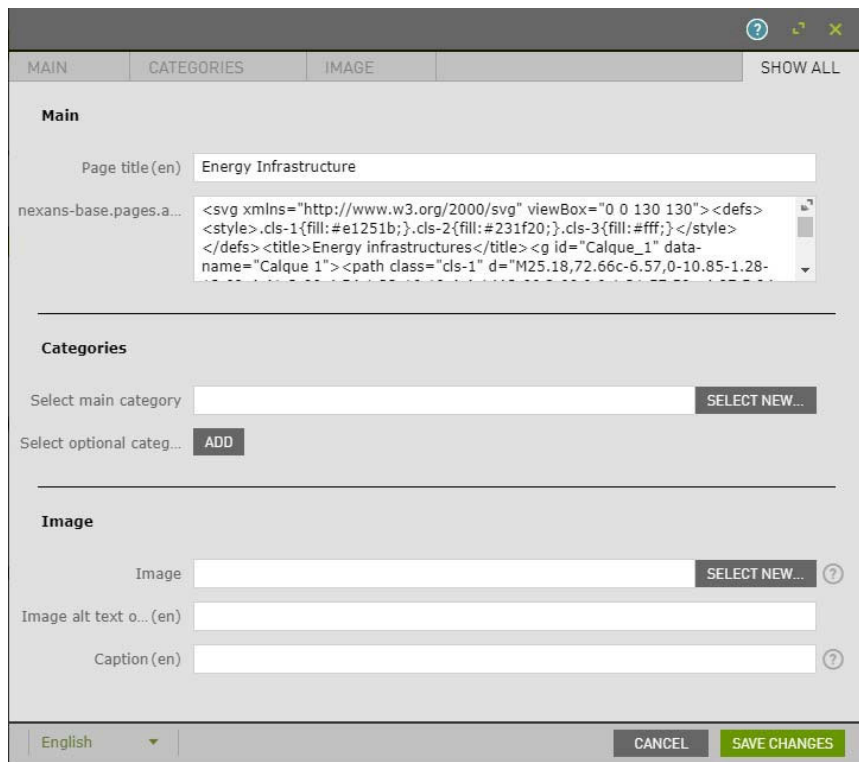

When clicking on one of the main components the right-hand menu will adapt.

COVER

COVER-BANNER

To edit the cover area, just click on it and edit the area either by clicking on the pencil icon or using the right-hand menu (edit are).

The screenshot shows a web interface for editing a page. At the top, there are tabs: 'MAIN', 'CATEGORIES', 'IMAGE', and a 'SHOW ALL' button. The 'MAIN' tab is active. Below the tabs, there's a 'Main' section with a 'Page title (en)' field containing 'Energy Infrastructure'. Below that is a text area for 'nexans-base.pages.a...' containing SVG code. The 'Categories' section has a 'Select main category' dropdown and a 'SELECT NEW...' button. Below that is a 'Select optional categ...' field with an 'ADD' button. The 'Image' section has an 'Image' field with a 'SELECT NEW...' button, an 'Image alt text o... (en)' field, and a 'Caption (en)' field. At the bottom, there's a language selector set to 'English', a 'CANCEL' button, and a 'SAVE CHANGES' button.

The cover is made up of the following elements

Main

1. PAGE TITLE
2. ICON source code for SVG format: icons and pictos must be provided in SVG format. Code will be entered in the field: nexans-base.pages...

Categories

3. Add TAG corresponding to the page – one main and several sub categories

Image

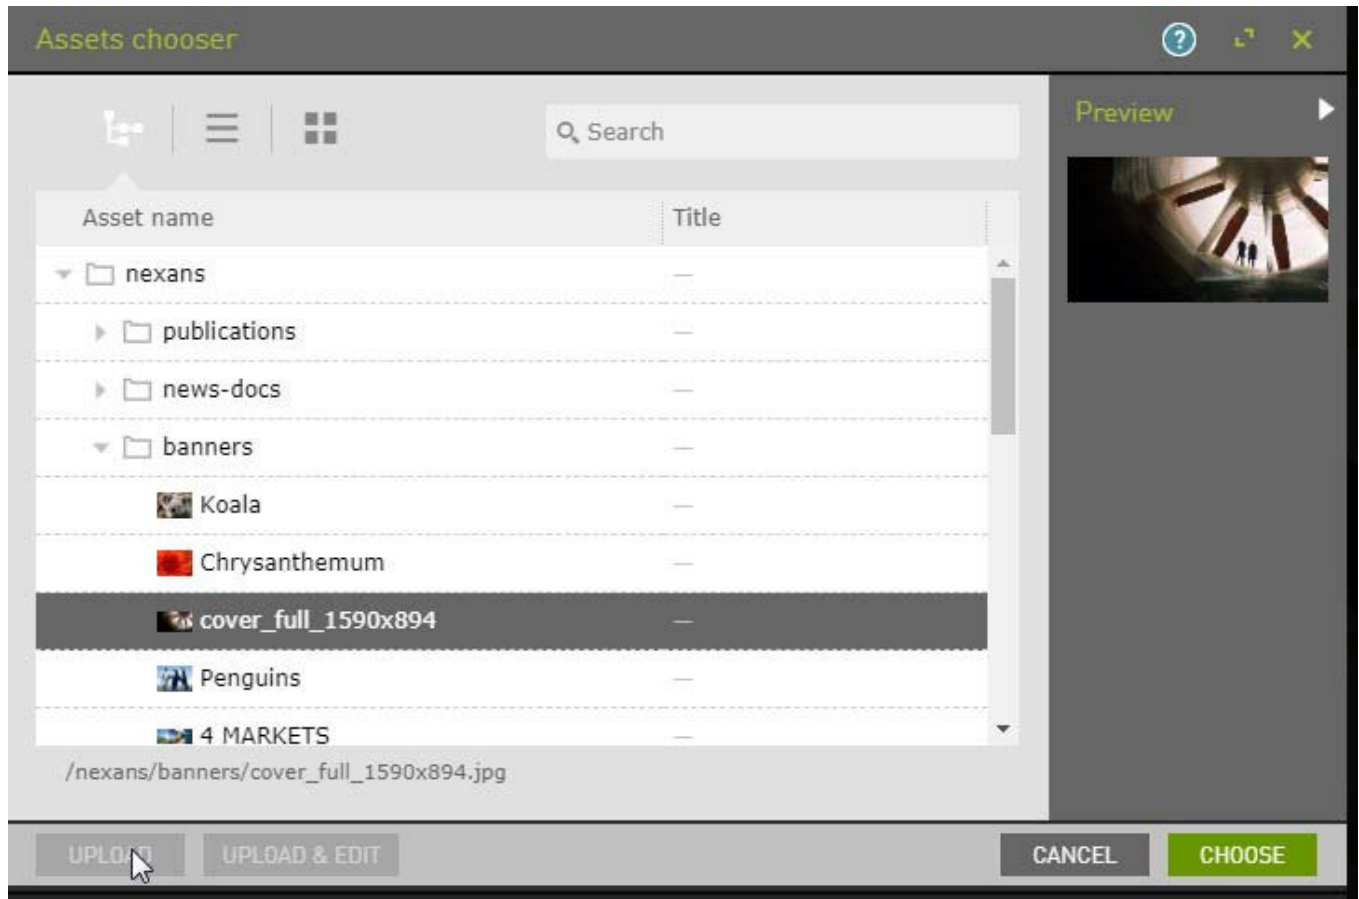

4. Select the image that will show up below the contact block. Either select one from the asset management library or upload a new one. Enter a specific text for the alt text (showing when hovering on the image) and a caption.

Dimensions of the image for this block

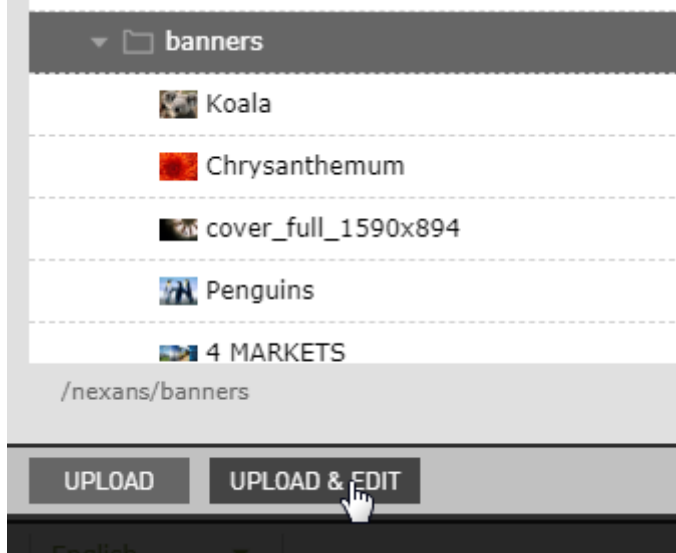

- "Large Desktop >1360px": 1590x818
- "Desktop <1360px": 1360x765
- "Tablet portrait >768px": 768x432
- "Mobile >320px": 320x400 – mobile version to be uploaded
- BUTTON (anchor linking to first block of the page) (optional)

To upload an image, click on the button SELECT NEW:

- Either you select an existing image in the repository: select the image and click on UPLOAD

- Or upload a new one: position the mouse on the folder in which you'd like to upload the image. Then click on **UPLOAD AND EDIT**

The following screen will show

Upload the file at the top (MEDIA block) and then key in the relevant information.

TIP just click on the question mark icon to get the meaning of each field !

- Asset name: name of the file. By default, the system will pick up the file name, but you can add a specific name
- Caption: showing next to the asset name to get additional information about the image

SAVE CHANGES

Key in the relevant information in the two tabs

- **PRODUCT TAB:** fill in the product name, description and category ID (will show on top of the product range that is highlighted and will be used to show other products from a similar category in the product pop in). The product categories are managed in a global repository.
- **PRODUCT COVERS:** add the related images in various dimensions
 - o One for the product list block (cover small)
 - o One for the pop in (large cover)
 - o One for mobile

Once done, fill in the translation and click on **SAVE CHANGES**

BOTTOM MANDATORY BLOCK

The bottom mandatory block contains a link to a related market. This block will be populated automatically. You just need to select the related market that will show at the bottom of the page

SEGMENT-READNEXT

To add the block, edit the area by clicking on the pen icon

The screenshot shows a configuration modal for a 'SEGMENT'. It includes a 'Segment Link' input field and a 'SELECT NEW...' button. At the bottom, there are 'CANCEL' and 'SAVE CHANGES' buttons. The modal has a dark header bar with a question mark icon, a refresh icon, and a close icon.

Select the related market in the navigation and click on save changes. The system will pick up the picto associated with the market, the name, the tag RELATED MARKET and the button DISCOVER linking to the related page.

CASE STUDY PAGE – BUSINESS: CT23_business_casestudy

The case study page is an editorial page allowing to showcase a success story on a specific market. A dedicated template was set up for this page allowing to clearly highlight the main information using a specific cover (title / Project name / location / customer-partner / market + main image). The rest of the template is made up of generic blocks (same as editorial page / News page)

COVER

COVER-NEWSROOM

To edit this area, just select the component COVER and click on Edit in the right-hand menu or on the pencil icon Key in the title and allocate the contacts to the page

MAIN

The main section contains one key element which is the news highlights block that allows you to highlight one specific news on the newsroom page.

NEWS HIGHLIGHTS

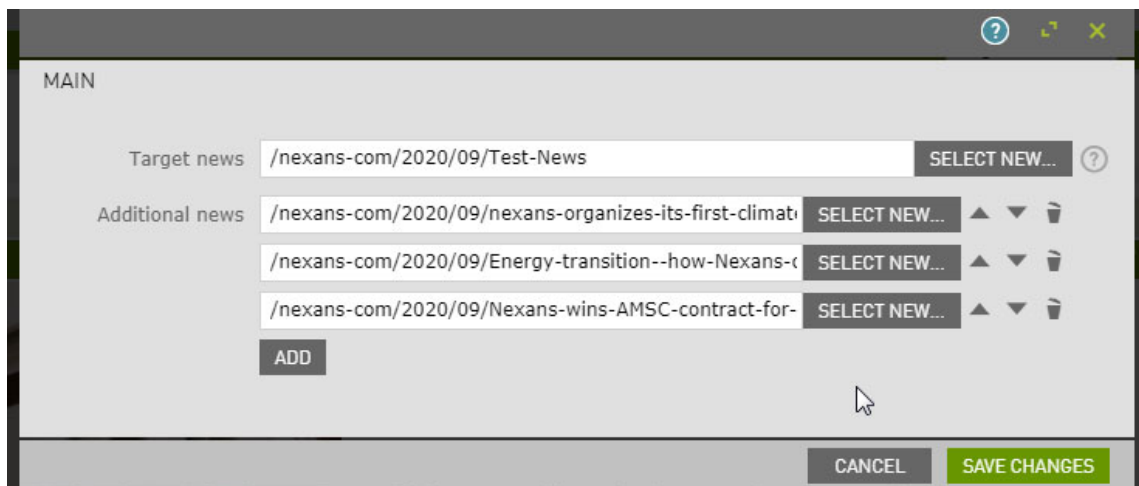

COMPANY

New face, new features, meet the new NEXANS APP

After several years of usage and proven efficiency, Nexans smartphone application NEXANS APP has undergone a major facelift and now integrates a series of new features among which our popular cable sizing tool EASYCALC

MAY 27, 2018

Select the main area and select on ADD COMPONENTS or if already added, edit it

Just pick up the news you'd like to highlight on the page using the SELECT NEW. This will open the repository containing all the news. Select the one that makes sense.

The block will then be populated automatically with the content of the selected news:

- Main image of the news
- Title
- Summary
- Tag

You can add extra news, they will show in a "standard" news list below the main one

COMPANY

New face, new features, meet the new NEXANS APP

After several years of usage and proven efficiency, Nexans smartphone application NEXANS APP has undergone a major facelift and now integrates a series of new features among which our popular cable sizing tool EASYCALC

MAY 27, 2019

CSR

Nexans organizes its first Climate Day on september 22, 2020 on the sustainable electrification of the world

SEP 2, 2020

At a time when global warming is accelerating and the energy transition is underway, the issue of sustainable electrification of the world is increasingly urgent.

CSR

Energy transition: how Nexans contributes to a resilient and sustainable electricity sector

SEP 21, 2020

Nexans attended the IEA (International Energy Agency) Clean Energy Transitions Summit on 9 July 2020 - Towards a Sustainable Recovery

Nexans wins AMSC contract for Chicago's Resilient Electric Grid project

SEP 21, 2020

Nexans has been awarded a contract by AMSC to produce a cable for the Resilient Electric Grid (REG) project in Chicago, US. The cable, together with a special jointing system, will be deployed in a Commonwealth Edison (ComEd) substation.

BOTTOM FREE ZONE

This section can be populated with the following elements

- Newslist: populated from the news list (based on latest news or on selected tag or manual selection)
- Event list: populated from the events list (based on latest events or on selected tag or manual selection)
- Publications list populated from the publications list (based on latest events or on selected tag or manual selection)
- Related push block (allowing to push key contents / events / documents)
- Related mosaic block to highlight key contents

EMAILS-ALERTS-PUSH

At the bottom of the page (harmonize on all pages that uses it)

Content characteristics

	Key	Description
1	EMAIL_ALERTS_TITLE	From resource file
2	EMAIL_ALERTS_SUBTITLE	From resource file
3	EMAIL_ALERTS_BUTTON	OnClick: open the subscription form

BOTTOM MANDATORY BLOCKS

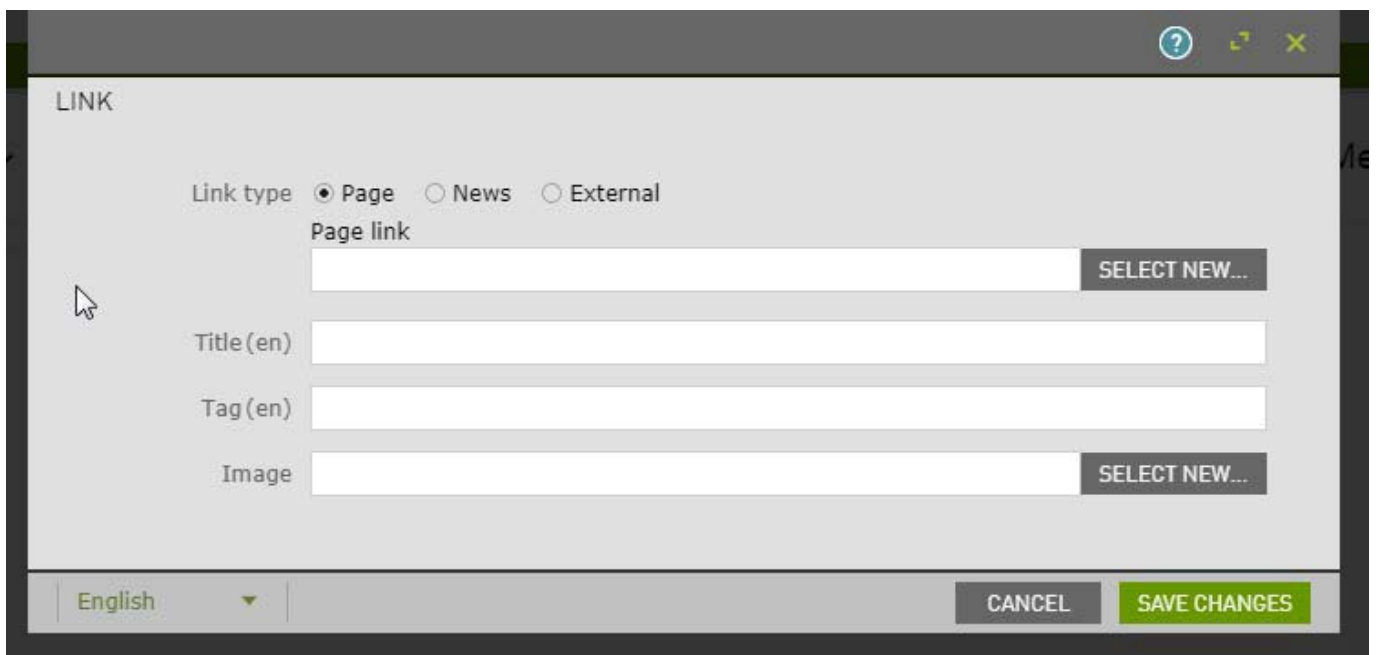

The section contains the transversal related blocks allowing you to make links to other sections of the site or external link.

RELATED-TRANSVERSAL

There can be up to 3 related at the bottom of the page. To add new related, just position the mouse on the area, on the RELATED component. Click on the + icon

The following screen will show up

You can either insert a link to a page, a news page or an external link.

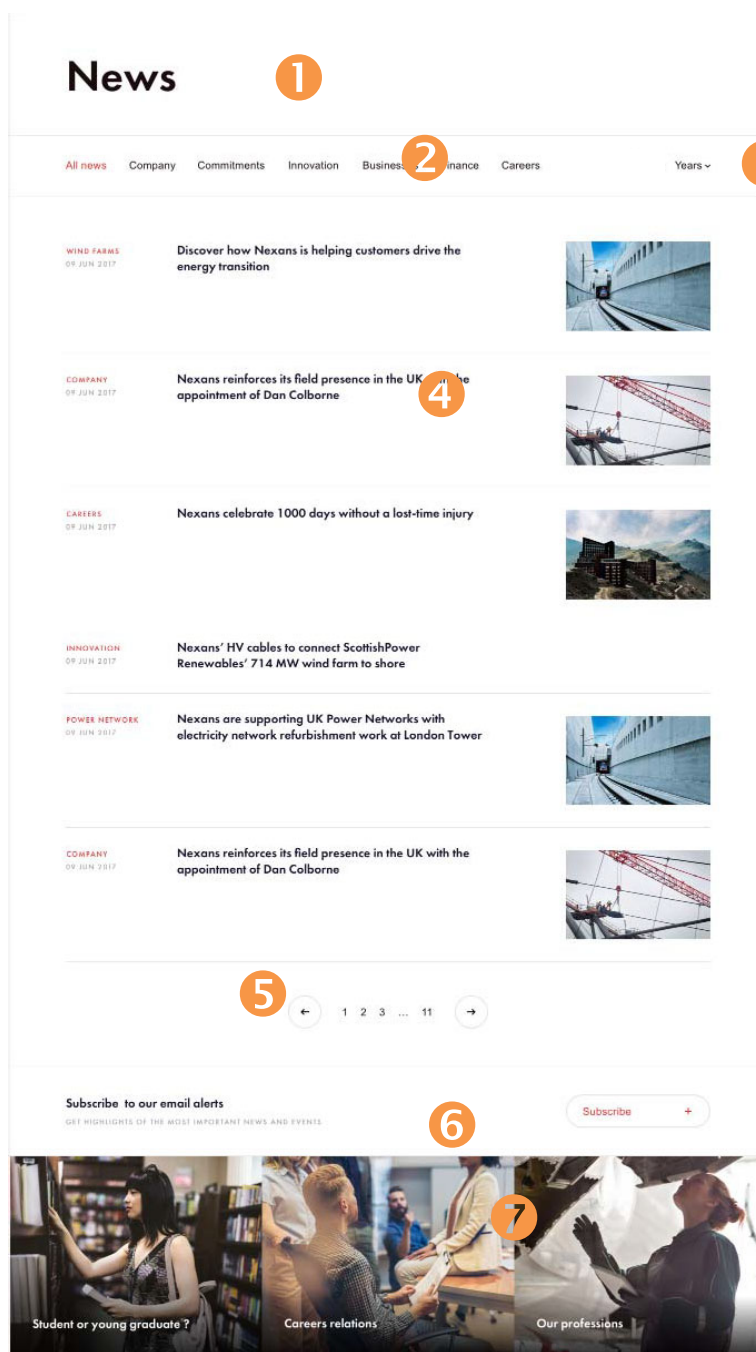

Once the type of link has been set, just key in the relevant information:

MAIN

The main section is made with generic blocks (that can be used in various page types).

- Event list
- HTML
- Key figures block
- Key figures highlight block
- News list
- Video
- Picture
- Picture Gallery
- Publication list
- Quote
- Related mosaic
- Related push
- Related slider
- Related slider / carousel
- Table
- Text
- Text with picture

To add one of the components, just select the area MAIN and click on the option Add a component in the menu on the right-hand side

BOTTOM MANDATORY BLOCKS

The section is made of the following elements.

- Documents related to the news (press release in pdf, supporting materials...)
- Contacts
- Related news (either latest news, or selected news based on tags and/or manual selection)

To add one of the components, just select the area MAIN and click on the option Add a component in the menu on the right-hand side

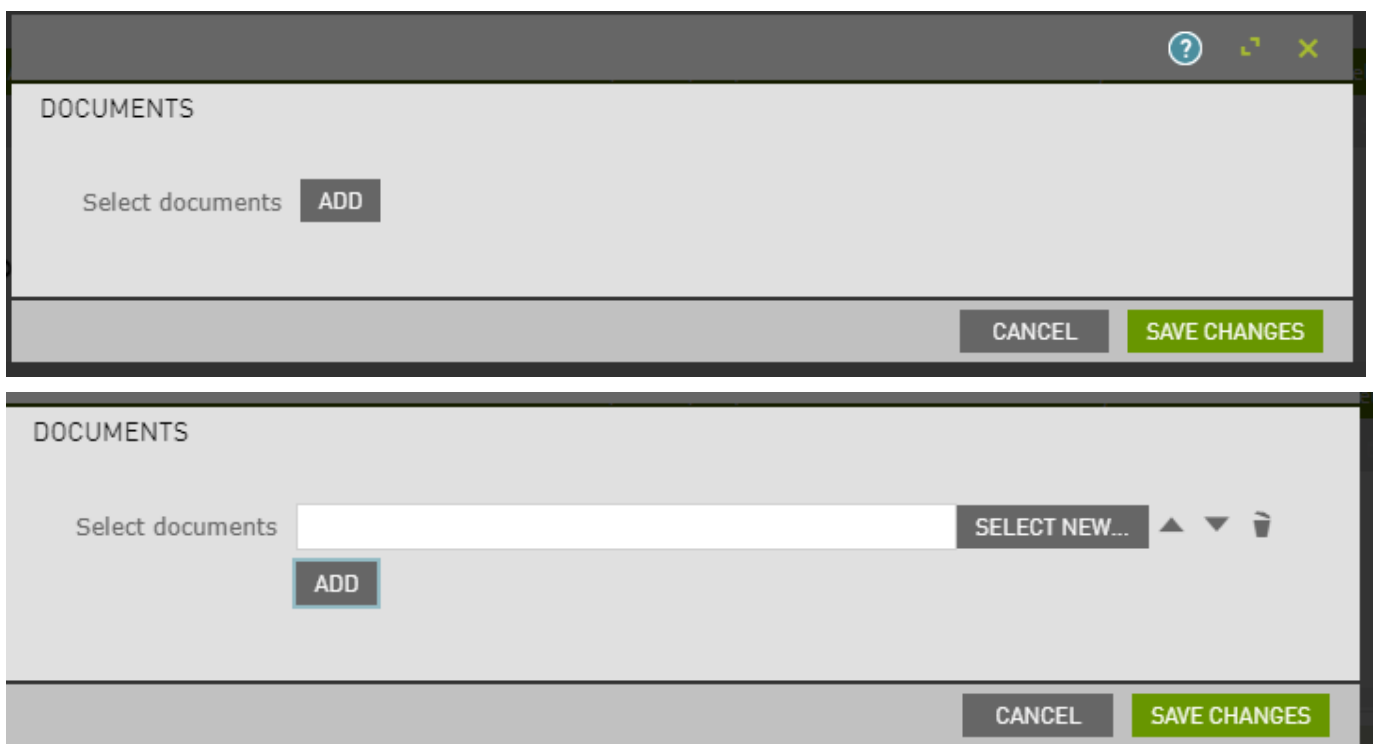

NEWS-BLOC-DOCUMENTS

Documents associated with the news will be displayed full width.

If no document is attached to the news, the block won't be displayed. To add a document to a news, click on the section area and edit it

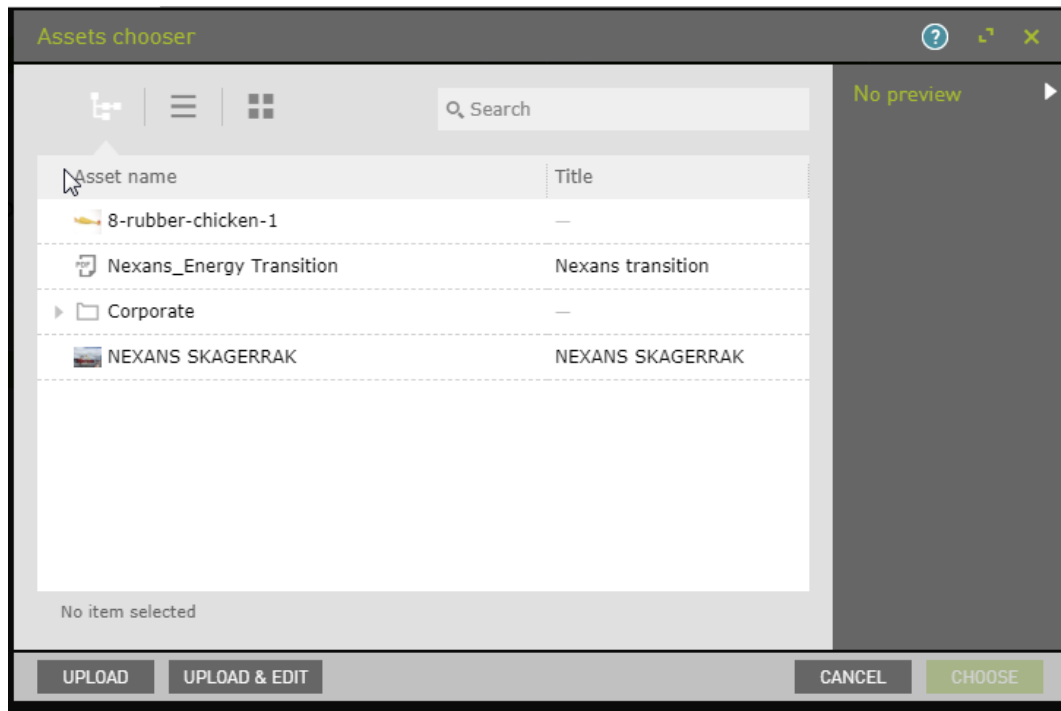

Then click on ADD to upload a document and then select new to upload a document

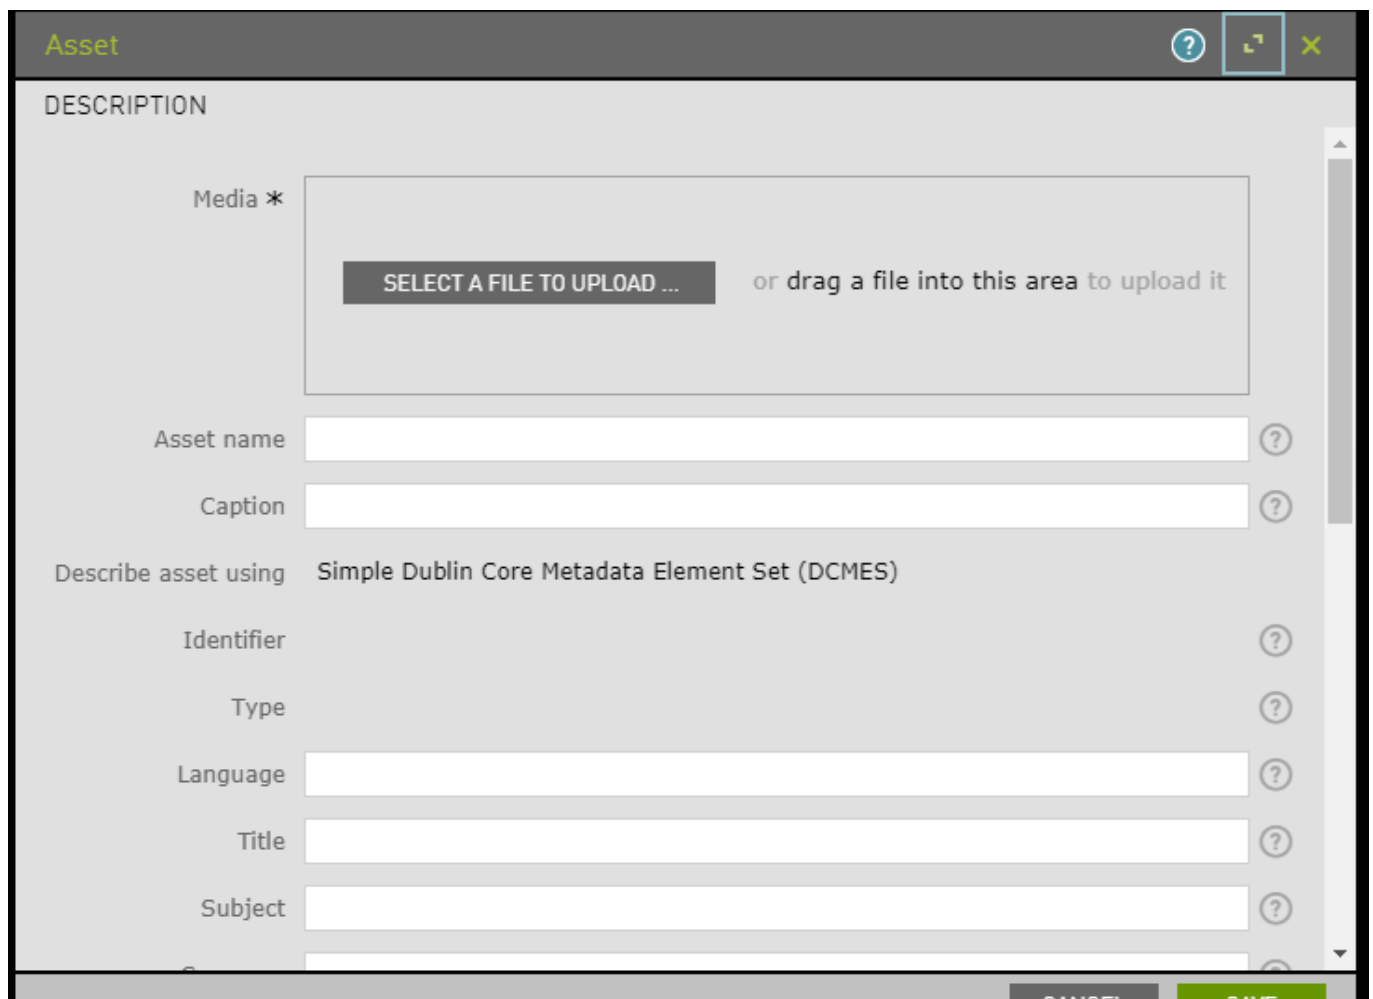

Two options

- Either you attach an existing document from the asset management library – just select the corresponding document in the library and then click on Choose
- Or upload a new document in the asset management library: click on UPLOAD AND EDIT to do so

Browse for your file on your desktop or drag in into the window and then make sure you fill in the fields correctly

The 'Asset' form is used to upload and configure an asset. It includes the following fields and options:

- Media ***: A large text area with a button 'SELECT A FILE TO UPLOAD ...' and the instruction 'or drag a file into this area to upload it'.
- Asset name**: A text input field with a help icon (?) on the right.
- Caption**: A text input field with a help icon (?) on the right.
- Describe asset using**: A dropdown menu currently set to 'Simple Dublin Core Metadata Element Set (DCMES)'.
- Identifier**: A text input field with a help icon (?) on the right.
- Type**: A text input field with a help icon (?) on the right.
- Language**: A text input field with a help icon (?) on the right.
- Title**: A text input field with a help icon (?) on the right.
- Subject**: A text input field with a help icon (?) on the right.

At the bottom right, there are buttons for 'CANCEL' and 'SAVE'.

You can upload several documents and rearrange the order as you wish using the arrows

Description (en)

English **CANCEL** **SAVE CHANGES**

EVENT: fill in the key information of the event

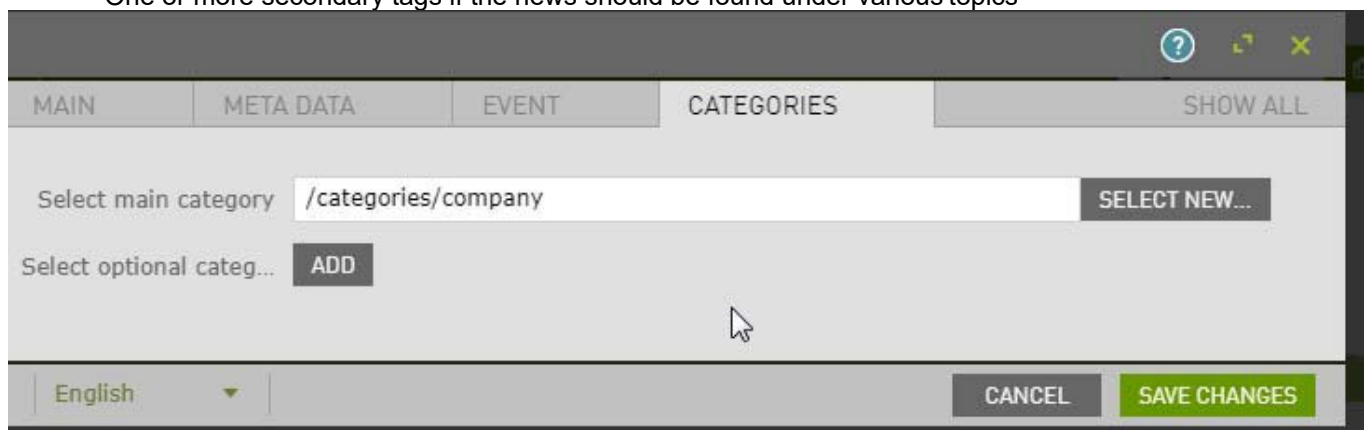

The screenshot shows a web interface for creating an event. At the top, there are tabs: MAIN, META DATA, EVENT, CATEGORIES, and SHOW ALL. The 'EVENT' tab is active. Below the tabs, there are several input fields and a checkbox. The 'Select event type' field contains '/eventTypes/conference' and has a 'SELECT NEW...' button. The 'Start date' and 'End date' fields both contain '2018-07-26' and have calendar icons. The 'Address (en) *' field contains 'NEXANS LE VINCI'. The 'City (en) *' field contains 'COURBEVOIE'. The 'Country (en) *' field contains 'FRANCE'. There is a checkbox labeled 'Show map link' which is checked, with the text 'Select to show a link to Google Maps' next to it. Below this are three empty input fields for 'Latitude', 'Longitude', and 'Registration-URL', each with a question mark icon. At the bottom, there is a language dropdown set to 'English', a 'CANCEL' button, and a 'SAVE CHANGES' button.

- Event type: select the type of event in the predefined list (will be used to allow filtering on the site)
- Start date
- End date
- Location: address / city / country
- Show map link: you can have a link to Google Maps allowing user to get directions if needed
- GPS coordinates: if known and to get precise location, you can enter GPS coordinate of the location
- Registration URL: allowing users to register for the event and get access cards

CATEGORIES: select a corresponding tag (used for filtering and searching on the site) from the list of tags

- One main tag
- One or more secondary tags if the news should be found under various topics

The screenshot shows a web interface for selecting categories. At the top, there are tabs: MAIN, META DATA, EVENT, CATEGORIES, and SHOW ALL. The 'CATEGORIES' tab is active. Below the tabs, there are two input fields. The 'Select main category' field contains '/categories/company' and has a 'SELECT NEW...' button. The 'Select optional categ...' field is empty and has an 'ADD' button. At the bottom, there is a language dropdown set to 'English', a 'CANCEL' button, and a 'SAVE CHANGES' button.

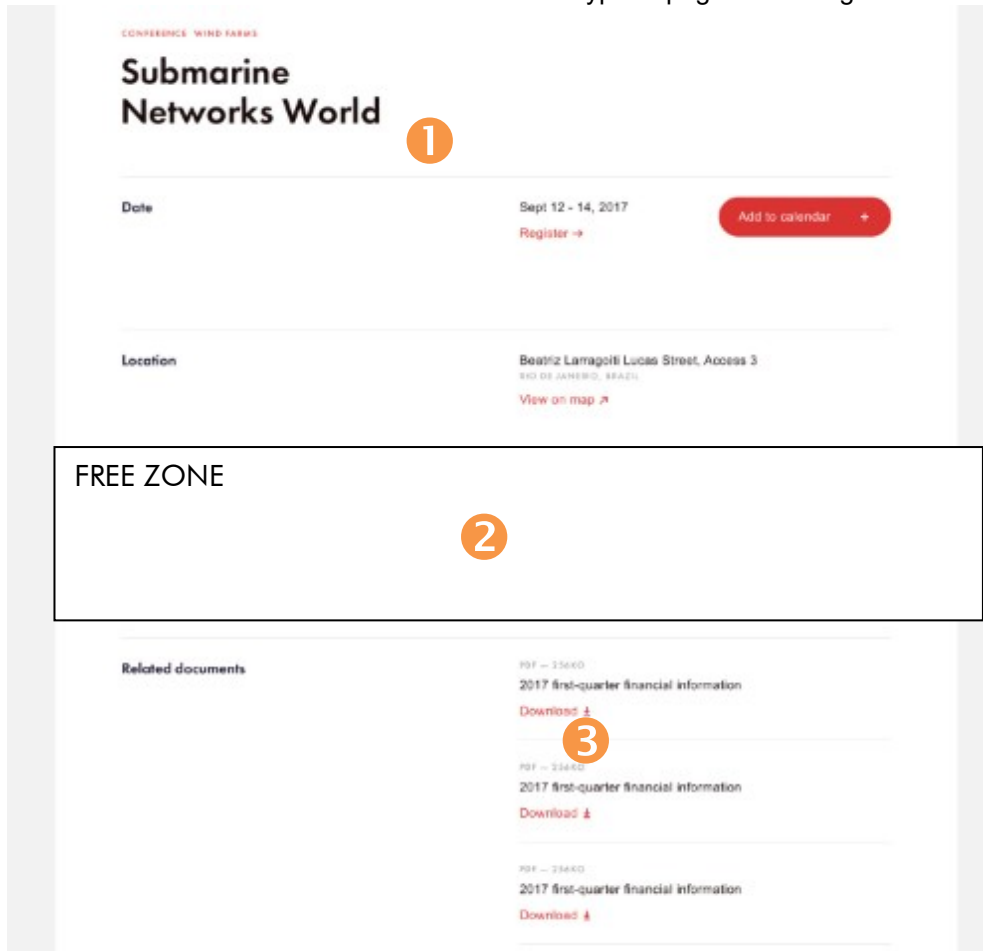

Don't forget to do it in French as well
Once done click on SAVE CHANGES

You can also duplicate an existing event to save time. To do so, from the event entry, select the event you'd like to copy and click on **DUPLICATE PAGE** in the right-hand menu. By doing so, you will inherit all information filled in the duplicated event. You then just need to update it.

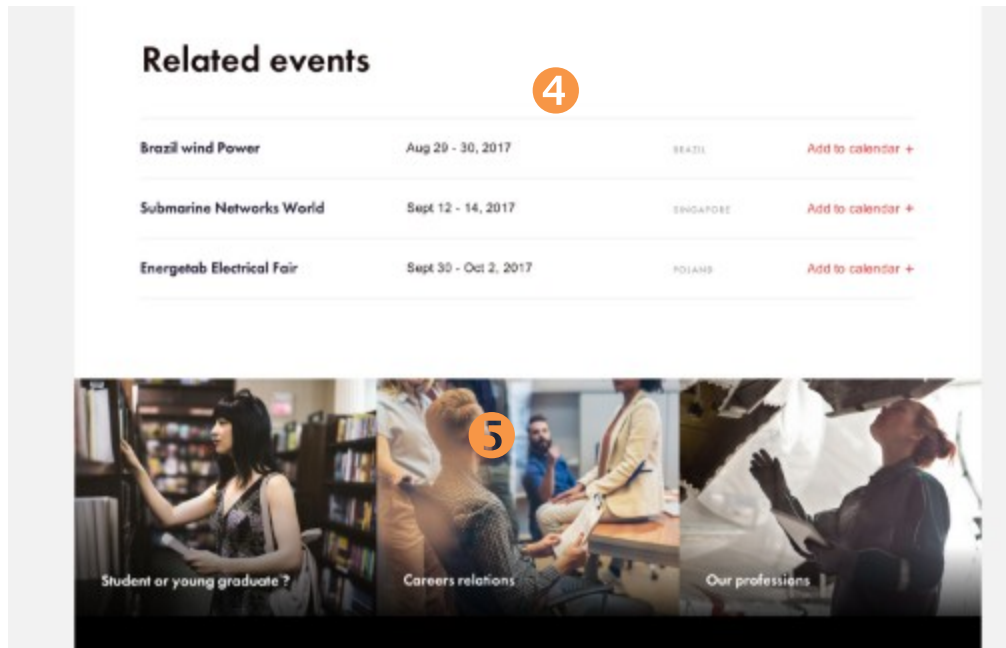

Once the page has been created in the structure, double click on it to create the content or amend it if you duplicated another event.

The template of the event is set up as follows

The event is available from the news section. An event item is a type of page containing the following elements.

The screenshot displays an event page template. At the top, the event title "Submarine Networks World" is shown with a small "1" callout. Below the title, the date "Sept 12 - 14, 2017" is displayed, along with a "Register ->" link and an "Add to calendar +" button. The location "Beaulieu Lamagotie Lucas Street, Access 3" is listed, with a "View on map" link. A large rectangular area labeled "FREE ZONE" with a "2" callout is positioned below the location information. At the bottom, a section titled "Related documents" lists three PDF files, each with a "Download" link and a "3" callout.

Zones

OVERVIEW TAB

- Key in the title. You can change the heading of the block (if the title is too long, you can adapt the size to use a smaller font and get a better rendering on the page)

TEXT TAB: you have two fields: visible text and hidden text. This is used to manage the rendering on the page: if the text is quite long, you can then split your paragraph and enter some text in the visible section and the rest in the HIDDEN TEXT field. The text from the first section will show on the page and a link READ MORE will be displayed underneath to get the full description.

About the event

The Distributors & Installers division posted sales of 906 million euros at current metal prices and 572 million euros at constant metal prices, representing a year-on-year organic decrease of 3.2%.

This performance mainly reflects an unfavorable basis of comparison with first half 2016 for the LAN cables segment in the United States and China. However, the negative trends of 2016 saw a correction in the first half of 2017, with the division's sales for the period coming in 4% higher than in the second half of 2016.

Don't forget to enter the translation (switch language at the bottom of the block) and once done, click on **SAVE CHANGES**. You can then add related links if you wish. To do so, click on the **LINKS** component within the block and then click on the **+** icon to add a new link component.

Don't forget to enter the French translation and click on **SAVE CHANGES**.

Related documents

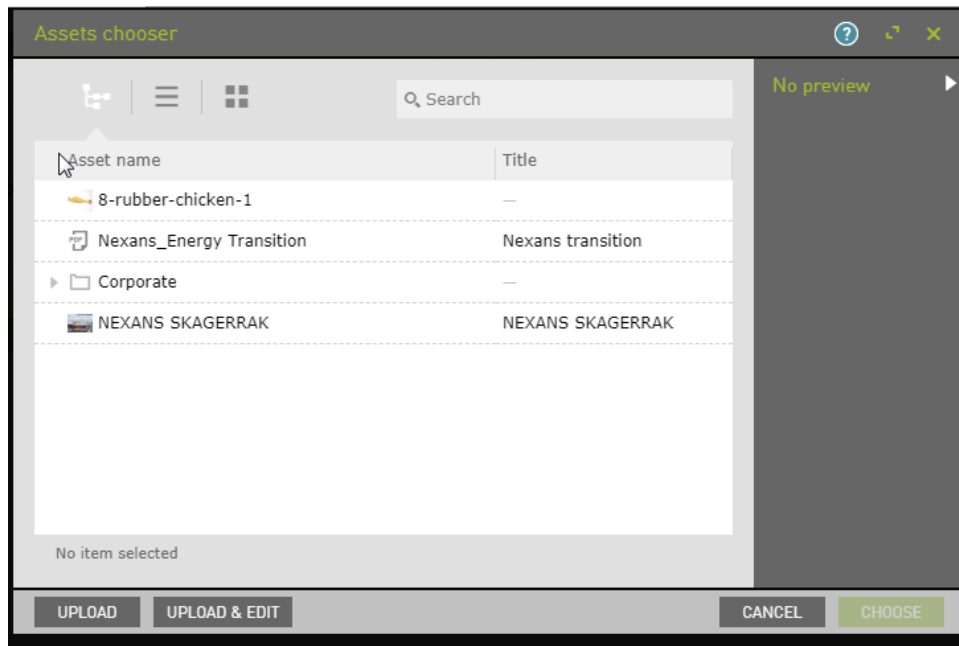

EVENT-DOCUMENT-LIST

This area is fixed and allows you to add related documents to the event (brochure / floor plan / leaflet / ...). Edit the area using the right-hand menu or by clicking on the pencil icon of the component.

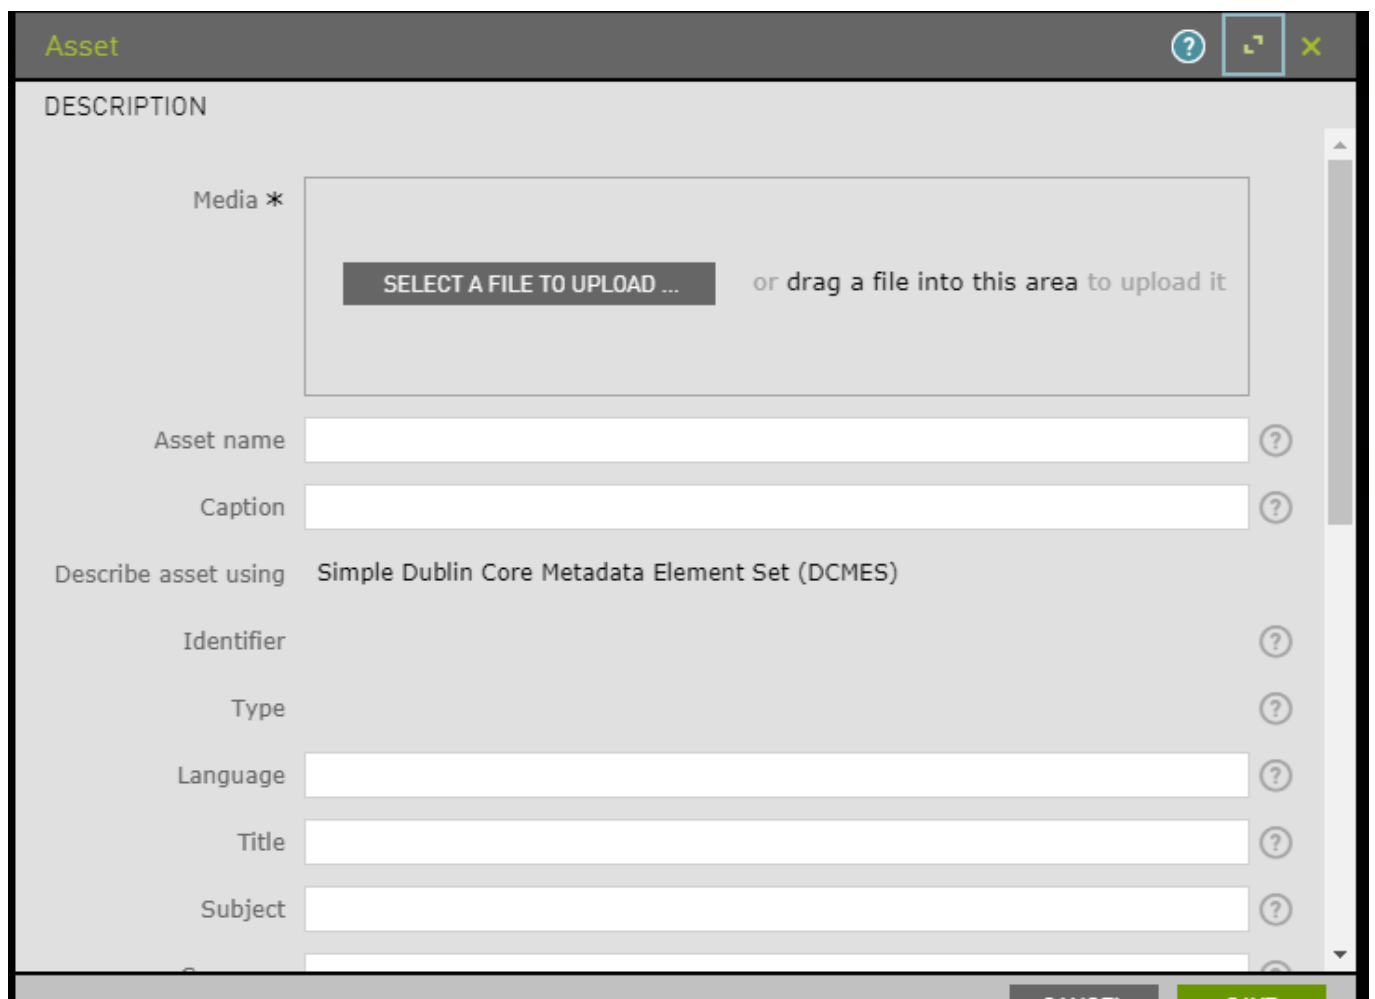

Add as many documents as you want: select them from the asset management library or upload a new one if needed. Two options:

- Either you attach an existing document from the asset management library – just select the corresponding document in the library and then click on **Choose**
- Or upload a new document in the asset management library: click on **UPLOAD AND EDIT** to do so

Browse for your file on your desktop or drag in into the window and then make sure you fill in the fields correctly

You can upload several documents and rearrange the order as you wish using the arrows

PUBLICATIONS LIST - C12_Publications_list

The template of this page is fixed and cannot be changed. It is managed automatically and contains the list of all publications published on the site.

The publications list is available from the news section. The list contains some filters at the top made up of the following elements

- Topics (corresponding to a predefined list), a document can have several tags but one main tag should be defined
- Year
- Type of publications (brochure, presentations...)

The publication list shows a list of documents with the following attributes

- Tag
- Date
- Document name – format/type and size
- Download button
- Pager at the end of the list

The screenshot shows the 'Publications' section of the Nexans website. It features a navigation bar with links to 'All publications', 'Company', 'Commitments', 'Innovation', 'Businesses', 'Finance', and 'Careers'. Below this is a list of publications, each with a title, date, and a 'Download' link. A pagination control is visible at the bottom of the list. At the very bottom, there is a 'Subscribe to our email alerts' section with a 'Subscribe' button.

BLOG TEMPLATES

The blog module gathers the following content types:

- BLOG (homepage)
- BLOG POSTS LIST
- BLOG POST (managed as an editorial page)

Key principles: the blog section can be positioned anywhere within the site and can therefore be specific to one section or one business if needed. Categorization and contacts will be specific to the blog, meaning that if there are several blog sections within the site, there can be several categorizations – each being specific to a blog.

The blog section can only be set up by Central teams, should you want to add a blog to your site or to any section of the site, please contact the central team to do so.

CATEGORY HOME PAGE – BLOG: CT01_News_section_home

This page follows the same template as the NEWSROOM MAIN SECTION PAGE and has therefore a fixed layout.

Women in Nexans: one year on

Today, Nexans is celebrating the first anniversary of the Women in Nexans (WIN) network. Launched in 2018, this initiative aims at creating a professional community of women, raising awareness about the importance of gender diversity from a business performance perspective as well as launching HR initiatives both for building a pipeline of future women managers and improving well-being at work on Group level.

The World Wide Web turns 30... what's next?

On 12 March 1989, CERN, one of the world's largest centres for scientific research, received a proposal from Tim Berners-Lee outlining an innovative way of linking and sharing information over the Internet. This laid the foundation for what we now know as the World Wide Web (WWW). Over the last 30 years, this technology has become irreplaceable almost everywhere in the world, attracting an increasing number of users and contributing to the explosion of data.

The main section is made with generic blocks (that can be used in various page types).

- Event list
- HTML
- Key figures block
- Key figures highlight block
- News list
- Video
- Picture
- Picture Gallery
- Publication list
- Quote
- Related mosaic
- Related push
- Related slider
- Related slider / carousel
- Table
- Text
- Text with picture

To add one of the components, just select the area MAIN and click on the option Add a component in the menu on the right- hand side

BOTTOM MANDATORY BLOCKS

The section is made of the following elements.

- Author: contact name, picture and short biography
- Categories: show all categories defined for the blog section

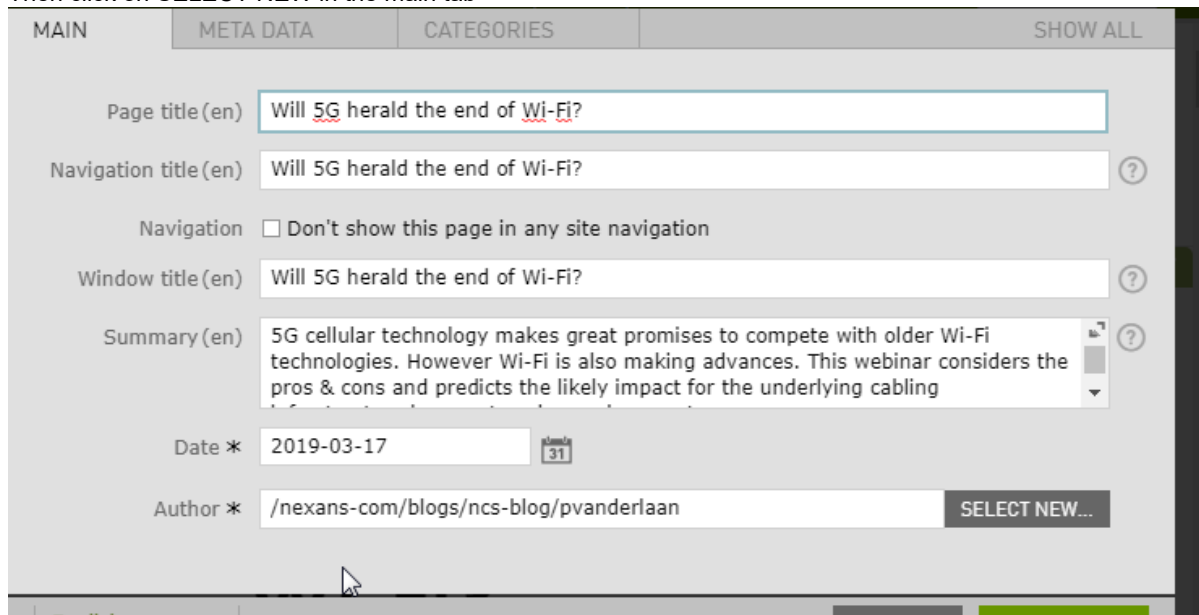

BLOG-AUTHOR

The author showing at the bottom of the blog post corresponds to the one that was associated with the post in the page properties.

To associate an author to a blog post, just edit the page properties

Then click on SELECT NEW in the main tab

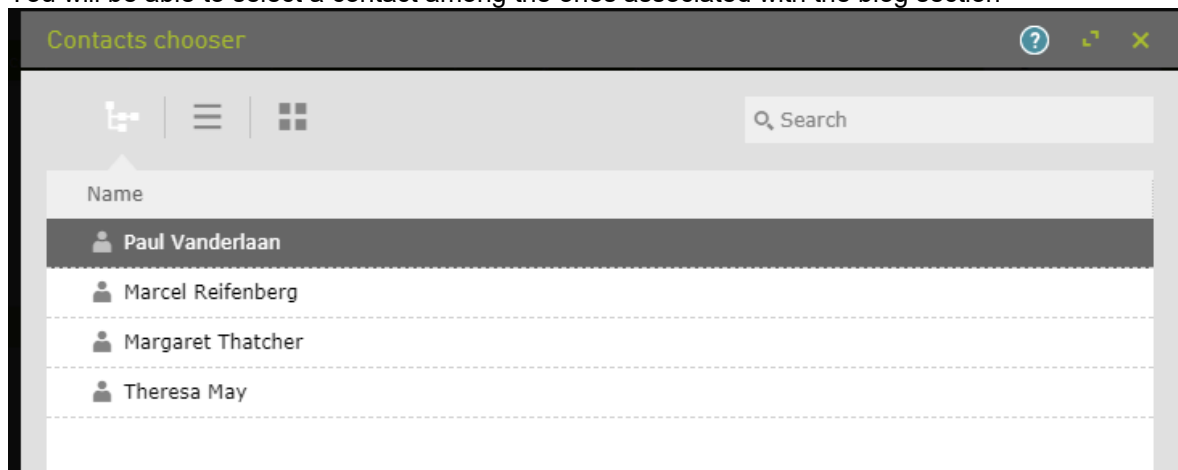

The screenshot shows the 'Edit page properties' form. The form has tabs for 'MAIN', 'META DATA', 'CATEGORIES', and 'SHOW ALL'. The 'MAIN' tab is active. The form contains the following fields:

- Page title (en): Will 5G herald the end of Wi-Fi?
- Navigation title (en): Will 5G herald the end of Wi-Fi?
- Navigation: ☐ Don't show this page in any site navigation
- Window title (en): Will 5G herald the end of Wi-Fi?
- Summary (en): 5G cellular technology makes great promises to compete with older Wi-Fi technologies. However Wi-Fi is also making advances. This webinar considers the pros & cons and predicts the likely impact for the underlying cabling
- Date *: 2019-03-17
- Author *: /nexans-com/blogs/ncs-blog/pvanderlaan

A 'SELECT NEW...' button is located next to the Author field.

You will be able to select a contact among the ones associated with the blog section

Click on the contact you want to associate to the blog.

If the author hasn't been created already, you will have to create it under the CONTACT ENTRY. To do so go to the CONTACT ENTRY

Go to the folder in which the contacts shall be created.

About the author

1

Paul Vanderlaan

2

Based in the US, Paul has over 25 years of structured cabling experience serving in a variety of engineering and product line management roles. An expert in component and application standards, especially in augmented Category 6 specifications, he represented Nexans in his role as Technical Manager of standardization and technology on several IEEE task forces. Paul is co-author of multiple patents related to the design of copper and fibre cabling for the premises.

Title (en)

Fill in the relevant information

- Title of the block
- Reasons: you can add as many as you want (click on the button add below to add other lines to the block).
For each reason, just enter
 - o Title
 - o Text (summary)
 - o The link to the targeted page within the site
 - o Link text: text that will be displayed for the link

You can arrange the reasons in the order you want.

Don't forget to key in the translation, and once done, click on SAVE CHANGES

BOTTOM FREE ZONE

The area can contain the following elements (generic blocks that can be put on various pages of the site)

- Event list
- News list
- Publication list
- Related mosaic
- Related push
- Related slider

BOTTOM MANDATORY BLOCKS

The section contains the transversal related blocks allowing you to make links to other sections of the site or external link.

RELATED-TRANSVERSAL

There can be up to 3 related at the bottom of the page. To add new related, just position the mouse on the area, on the RELATED component. Click on the + icon

The following screen will show up

You can either insert a link to a page, a news page or an external link.

Once the type of link has been set, just key in the relevant information:

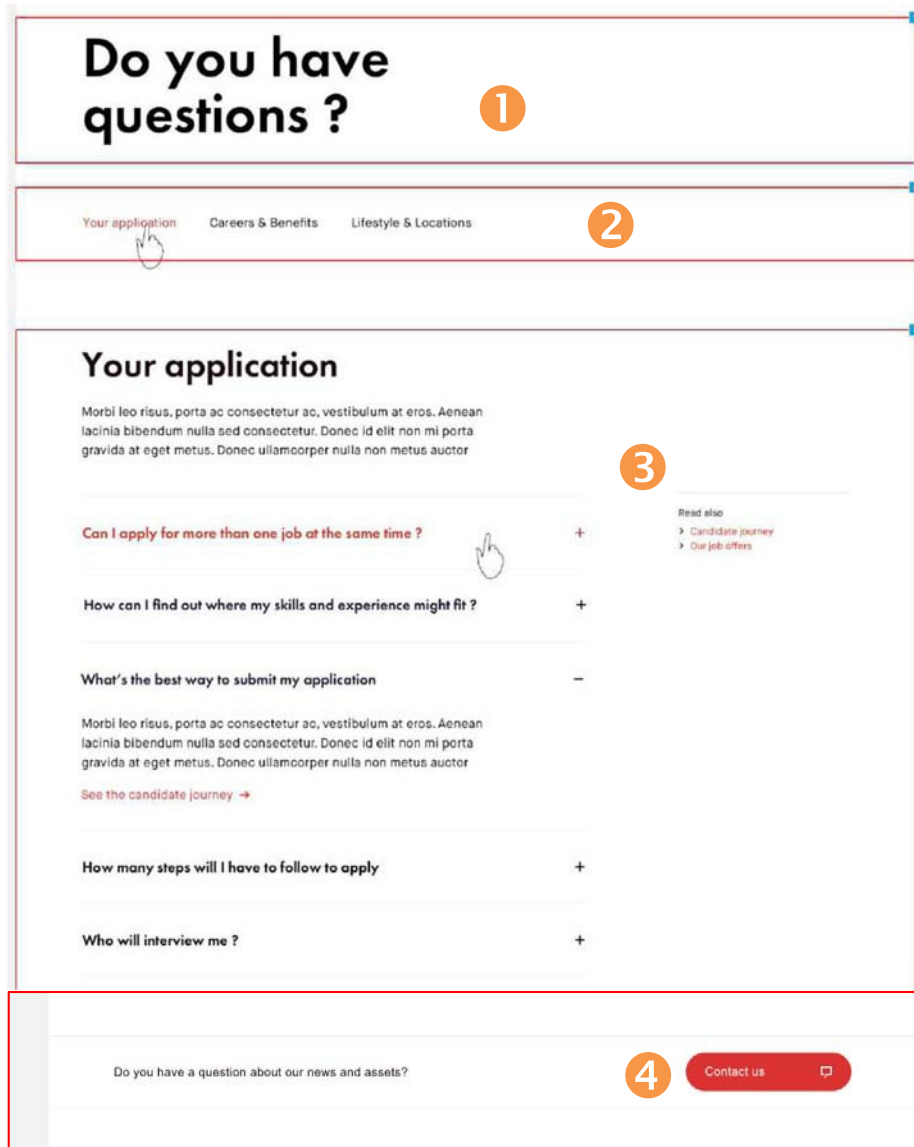

- Select the page link or news link or key in the external URL for external sites
- Key in a title
- Key in a tag
- Select an image from the asset management library or upload a new one

Results with 3 links

FAQ page - CT07_HR_FAQ

The FAQ page is very specific and could potentially be made available from any section of the site. The FAQ page consists of a list of question topics/categories, and for each a corresponding list of questions and answers. Some related links to other sections of the page or documents could be added to the answers to allow users to get additional information from other sources within the site

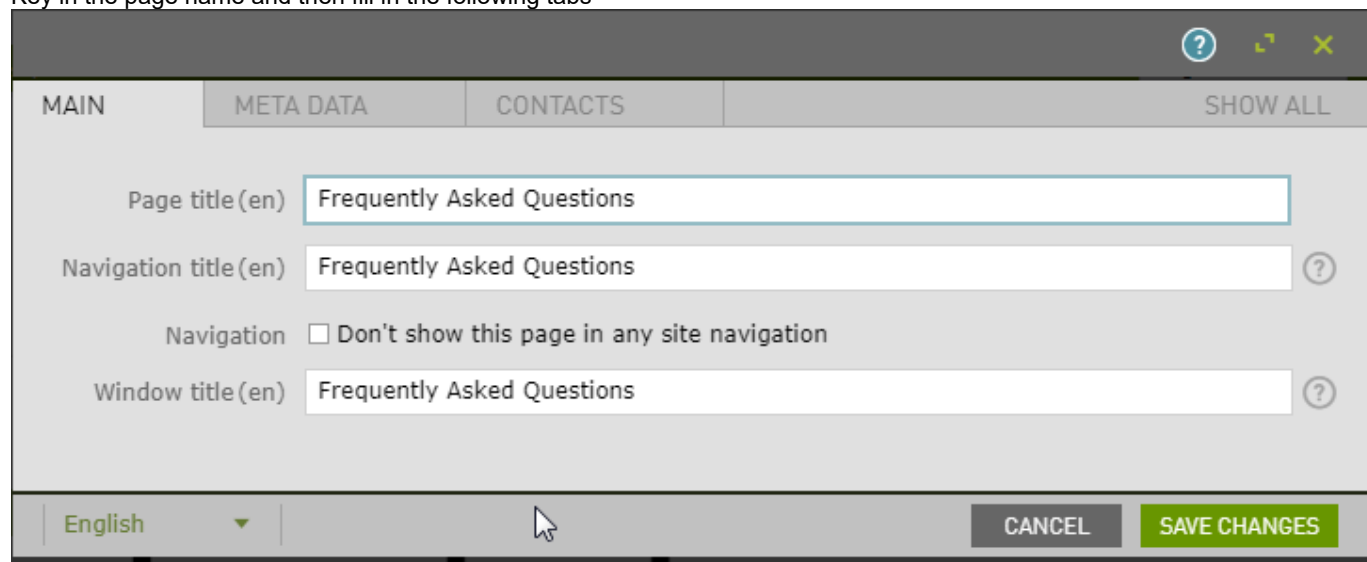

Zones

Footnote	Title	Management rules	Order	Block(s) used
1	FAQ_TITLE	Manual contribution		
2	FAQ_TOPIC	List of categories (free) as anchors on the page - If more than 6 categories are created then a SHOW more button should be displayed at the top. When clicking on one of the category name, then scroll to corresponding page		

Footnote	Title	Management rules	Order	Block(s) used
3	FAQ_TOPIC_DETAIL	A topic will contain the following elements <ul style="list-style-type: none"> - Title of category - Introduction - List of questions: when clicking on a specific question, the block expands to open to view the answer. Related links will show on right per category - Possibility to have an image in the FAQ (fixed position, at the end of the answer) 		
4	FAQ_CONTACT	CONTACT US BLOCK located at the bottom of the page and with similar layout as the news contact us block OnClick: open the related contact form => email sent to contact that was associated with FAQ page		

Before creating a FAQ page, make sure you created all FAQs in the dedicated section (see dedicated chapter).

Position the mouse in the section under which you'd like to set up a FAQ, click on ADD PAGE and select the FAQ template. Key in the page name and then fill in the following tabs

MAIN: key in the page, navigation and window titles

META DATA: key in the keywords and description (useful for SEO)

CONTACTS: associate the contact to the FAQ page – in case the user didn't find any answer, he should be able to send out his/her questions. The contact will be selected from the contact repository.

Make sure you fill in the translations and once done, click on SAVE CHANGES.

The FAQ template is a fixed template divided into three main areas

- COVER containing the page name. Edit the area to update the page name in both languages
- MAIN: containing the list of all questions and answers – divided by section if needed
- BOTTOM MANDATORY BLOCKS: containing the contact information (assigned to the FAQ page)

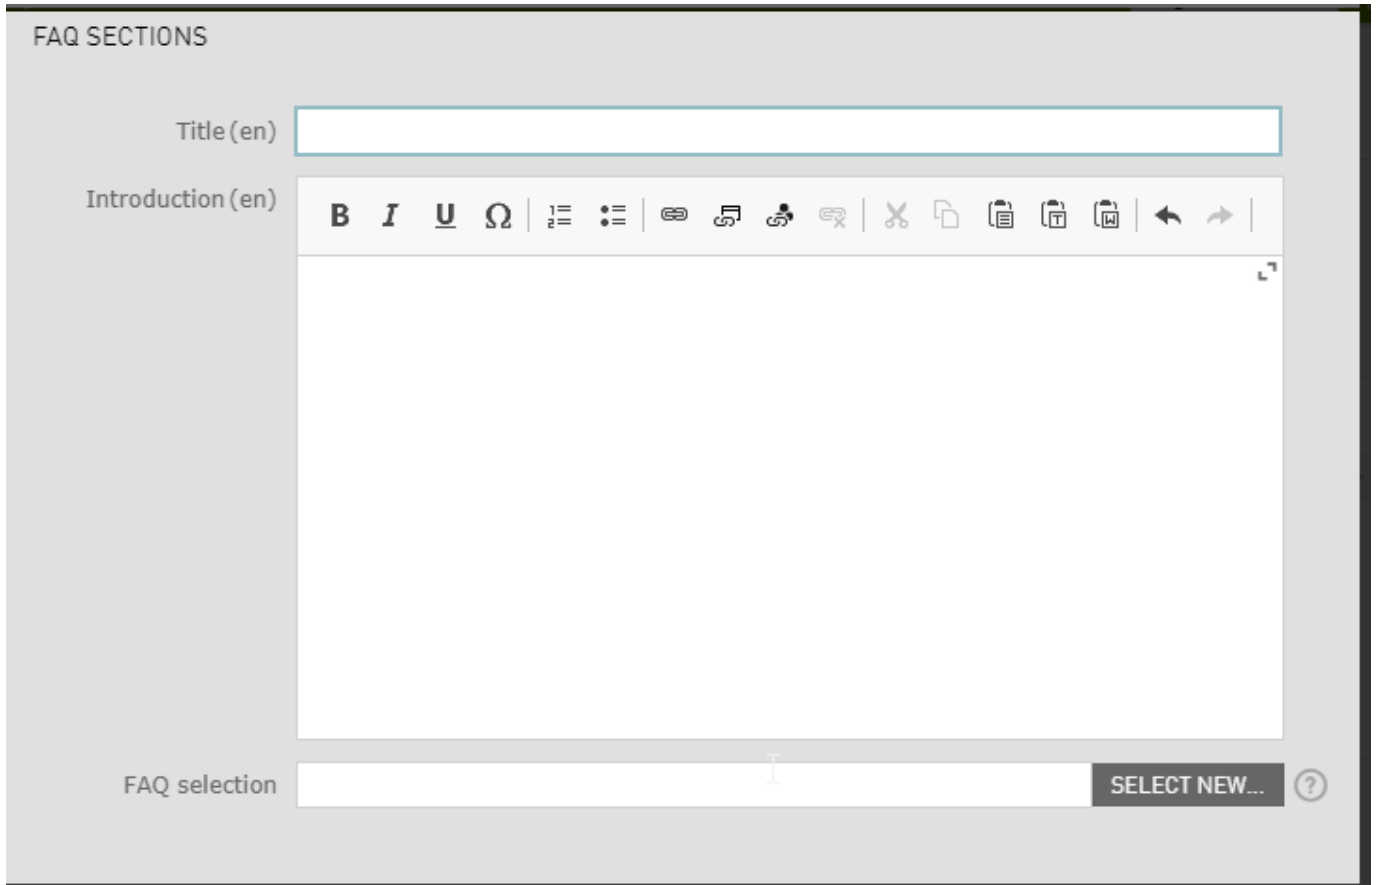

MAIN

To add the Q&A from the FAQ repository, select the main area. The FAQ can be divided into different sections.

Create the first section by clicking on NEW MAIN COMPONENT and then click on NEW FAQ COMPONENT

The following screen will show up

Key in the relevant information

- Title: name of the section (will be displayed at the top of the page allowing users to go directly to the right section)
- Introduction: if you want to add a description of the content of that section
- FAQ selection: associate the corresponding list of questions and answers (hence the fact they should be gathered in one main folder if possible)

Don't forget to key in the translation and once done, click on SAVE CHANGES.

To add another section, click on NEW FAQ COMPONENT just below the first section and proceed in the same way

Once done, all sections will show at the top of the page

Frequently Asked Questions

Let's try and attract you to our company

how to join

SECTION 2

And will allow to have quick links to the corresponding section.

If you have many sections to cover, you can create a second level of components. When editing the page and the MAIN section, click on NEW MAIN COMPONENT at the very bottom of the page

You will then create a subsection. Proceed in the same way as described above.

The newly created section will show after the first series of Q&A.

sub section 1

SUB SECTION 2

sub section 1

BJKLBJQMLK

BOTTOM MANDATORY BLOCKS

This area is fixed and will contain the contact us block (contact associated with the FAQ page)

CAREERS - TESTIMONY - CT08_HR_testimony

The testimonial page is similar to that of an editorial page allowing to showcase an employee working at Nexans.

The only specificity is the cover

Zones

Footnote	Title	Management rules	Order	Block(s) used
1	COVER	Cover contains the following elements: title, items related to the person (country, name, job title) and quote		CAREER-TESTIMONIAL-BLOC-COVER

 - o Portrait picture: showing on the board page. Select the picture from the asset management library if already uploaded, if not, you can upload a new image
 - o Banner: showing in the pop up (landscape format). Select the picture from the asset management library if already uploaded, if not, you can upload a new image

Proceed as such for each member. Don't forget to enter the translations and click on SAVE CHANGES once done.

If you need to create another board/organization, select the main area of the page and at the bottom click on NEW MAIN COMPONENT

Then proceed as described above.

BOTTOM MANDATORY BLOCKS

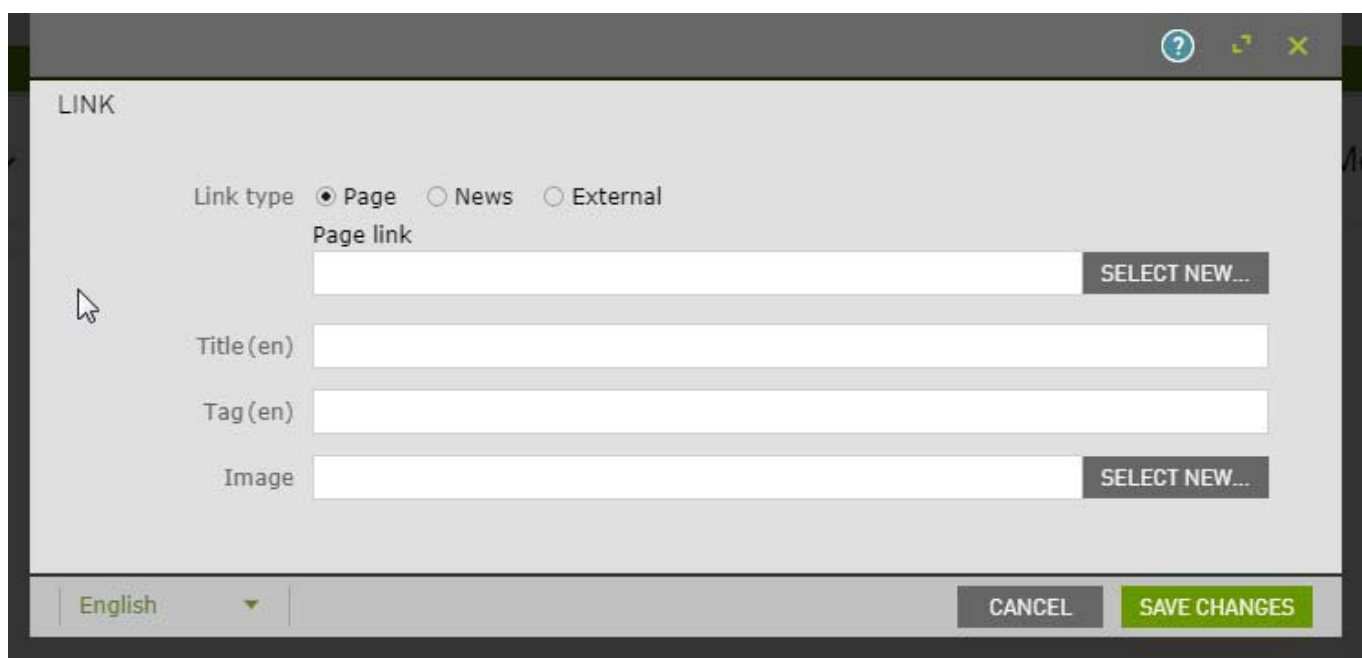

The section contains the transversal related blocks allowing you to make links to other sections of the site or external link.

RELATED-TRANSVERSAL

There can be up to 3 related at the bottom of the page. To add new related, just position the mouse on the area, on the RELATED component. Click on the + icon

The following screen will show up

The 'LINK' form contains the following fields and controls:

- Link type:** Radio buttons for ☒ Page, ☐ News, and ☐ External.
- Page link:** A text input field with a 'SELECT NEW...' button.
- Title (en):** A text input field.
- Tag (en):** A text input field.
- Image:** A text input field with a 'SELECT NEW...' button.
- Language:** A dropdown menu currently set to 'English'.
- Buttons:** 'CANCEL' and 'SAVE CHANGES' buttons at the bottom right.

You can either insert a link to a page, a news page or an external link.

Once the type of link has been set, just key in the relevant information:

- Select the page link or news link or key in the external URL for external sites
- Key in a title

- Key in a tag
- Select an image from the asset management library or upload a new one

Results with 3 links

COMPANY - CT19_about_governance_member

The profile card displays a portrait of Anne-Marie Cambourieu, a woman with blonde hair and red glasses, wearing a blue top and a black leather jacket. The card includes her name, title, and a 'Close' button. Numbered callouts 1 through 4 point to specific elements: 1 points to the image, 2 points to the name, 3 points to the title, and 4 points to the bio section.

Content characteristics

COVER

COVER-FINANCE-HOMEPAGE

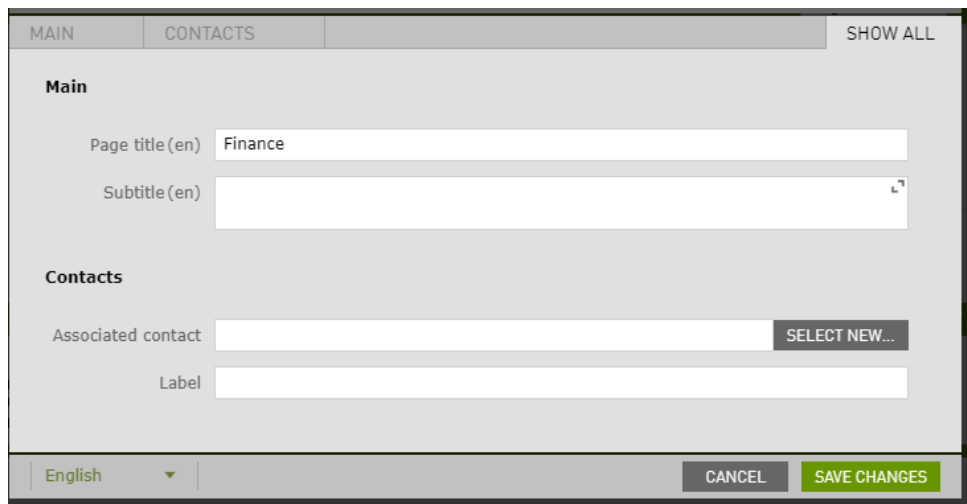

Content characteristics

Footnote	Key	Description	Interactions / Actions / Links
1	HPFINANCE_TITLE		
2	HPFINANCE_SUBTITLE	Optional – introduction to the section	
3	HP_FINANCE_QUICKLINKS	Link to related content (manually defined). 4 links max	OnClick: goes to related content
4	HP_FINANCE_CONTACT	Contact associated with the section. Text from resource files	

Interface elements

	Element	Element interaction / Link
3	Link (button)	OnClick: open the related page
4	Contact us (button)	Open the contact panel form with subject of the contact form prefilled with FINANCE as main topic. Contact is an attribute of the page (contact associated to the content – can be different from one page to another)

Edit the area to amend the cover

The screenshot shows the 'MAIN' tab selected. Under the 'Main' section, there are two text input fields: 'Page title (en)' with the value 'Finance' and 'Subtitle (en)' which is empty. Below these, under the 'Contacts' section, there is an 'Associated contact' field with a 'SELECT NEW...' button next to it, and a 'Label' field which is also empty. At the bottom, there is a language dropdown set to 'English', and two buttons: 'CANCEL' and 'SAVE CHANGES'.

Key in the relevant information

MAIN TAB

- Page title
- Subtitle

CONTACTS TABS

- Select the contact associated with the page (from the contact repository)
- Label: text to be displayed near the contact button

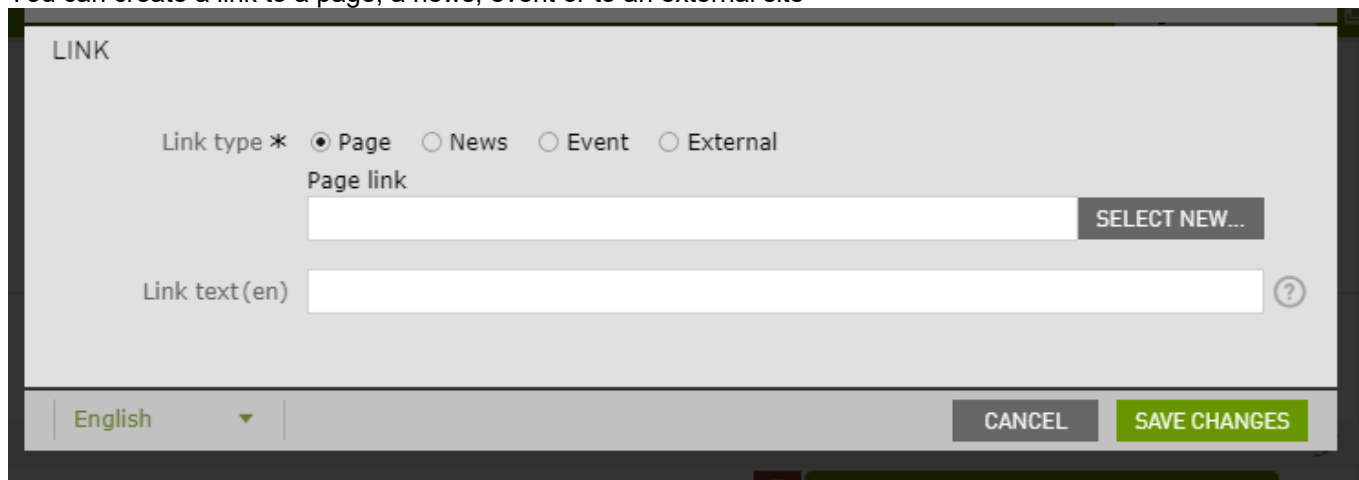

Don't forget to key in the translation and click on SAVE CHANGES once done.

Quick links can be added to the cover – optional. To do so, click on the LINKS COMPONENT

And click on NEW LINKS COMPONENT to add a link in the block (make sure the relevant pages have been created first)

You can create a link to a page, a news, event or to an external site

The screenshot shows the 'LINK' form. It has a 'Link type *' section with four radio buttons: 'Page' (selected), 'News', 'Event', and 'External'. Below this, there is a 'Page link' field with a 'SELECT NEW...' button next to it. The 'Link text (en)' field is empty and has a help icon (?) to its right. At the bottom, there is a language dropdown set to 'English', and two buttons: 'CANCEL' and 'SAVE CHANGES'.

MAIN

The main section contains the following areas

- Share price highlight: combining a news highlight + the share price
- Overview block

SHARE-PRICE-HIGHLIGHT

GENERIC BLOCKS

A series of blocks are meant to be generic and can be used across the whole site

Inline cover

The inline cover is similar to the covers that can be found on editorial pages (cover area) but can be positioned within the page. This allows to break a long page and can be used as a transition within a page dealing with various topics and therefore displaying various contents (for example: CSR page showcasing our commitments in various areas or within a campaign page highlighting various thematics). The inline cover can be two-fold

- Banner type with text showing on the cover (make sure your image has a dark background)

- Editorial cover type with main title and introduction text

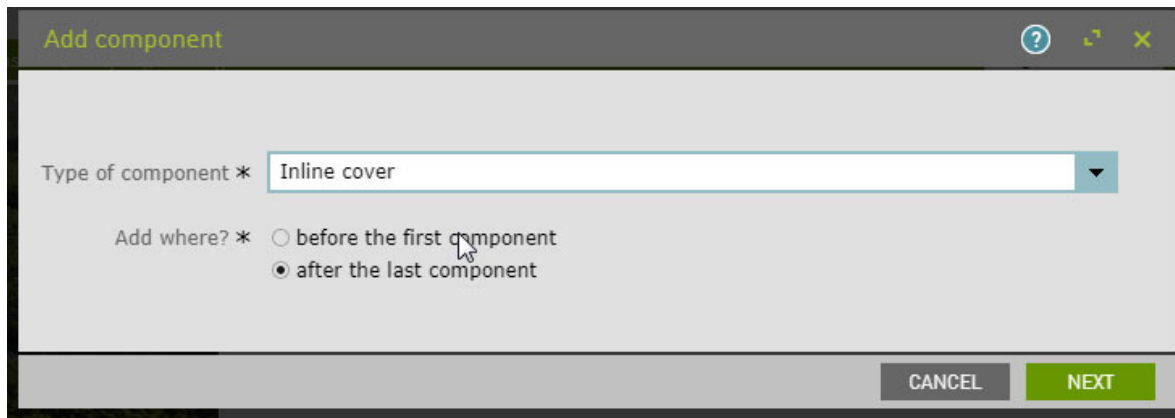

Content characteristics

Footnote	Key	Description	Interactions / Actions / Links
1	Title	Manual	
2	Introduction	Manual	
3	Image	Manual	

The inline cover can be used within editorial pages.

Position the mouse where you'd like to add the block on the page and click on NEW COMPONENT: select the type INLINE COVER component and click on Next

Add component

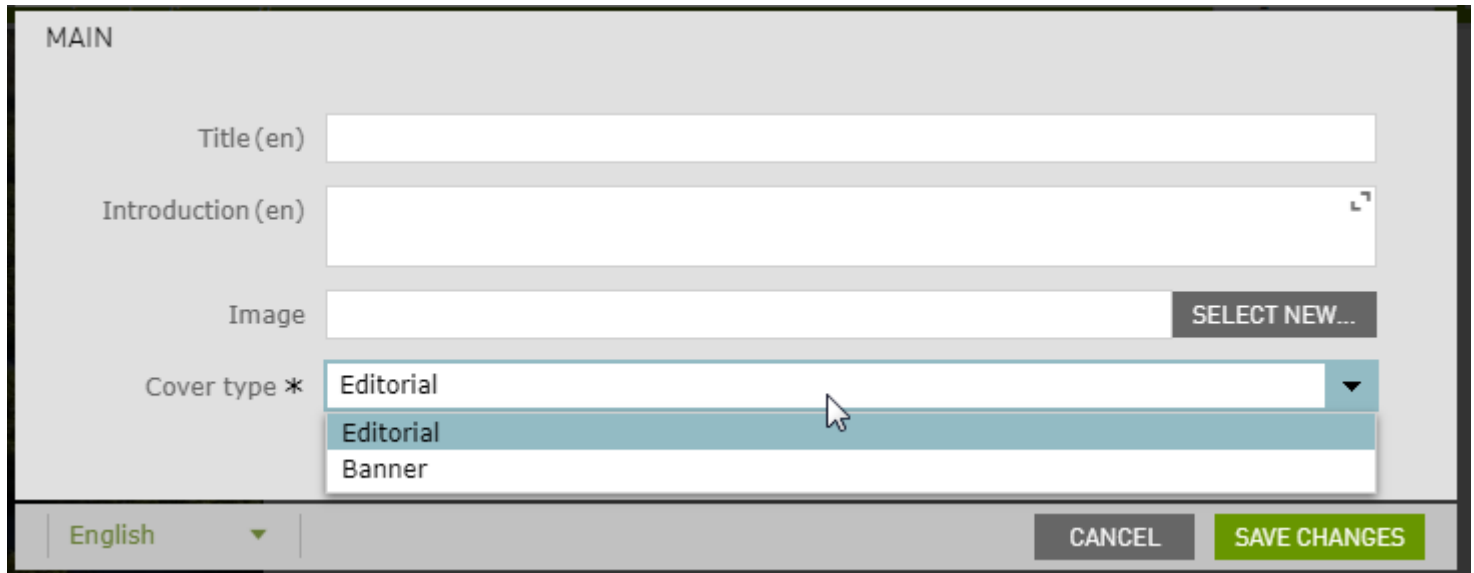

Type of component *

Add where? * ☐ before the first component ☒ after the last component

CANCEL **NEXT**

Key in a title, introduction and select your image (from the asset management library: either existing one or upload a new one). Select the cover type: editorial or banner

Click on Save changes – don't forget to key in the translation in local language

1

Content characteristics

Footnote	Key	Description	Interactions / Actions / Links
1	Title	Manual	
2	Slider item	Cover image	On click: link to any content
		Title	
		Tag	

Similar as slider for testimonial but tag should be positioned above title- start sliding on 4

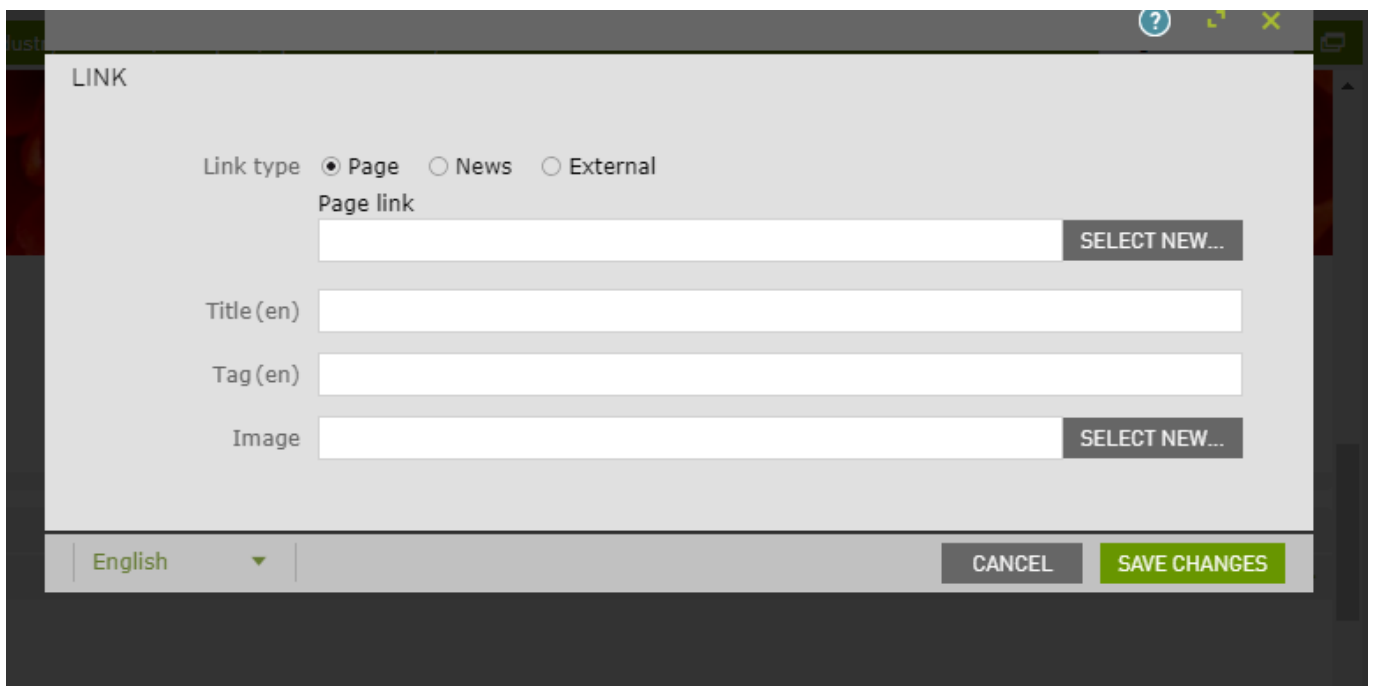

Position the mouse where you'd like to add the block on the page and click on **NEW COMPONENT**: select the type **RELATED SLIDER** component and click on **Next**

Add the related links: ideally up to 3 to have a well-balanced display at the bottom of the page.

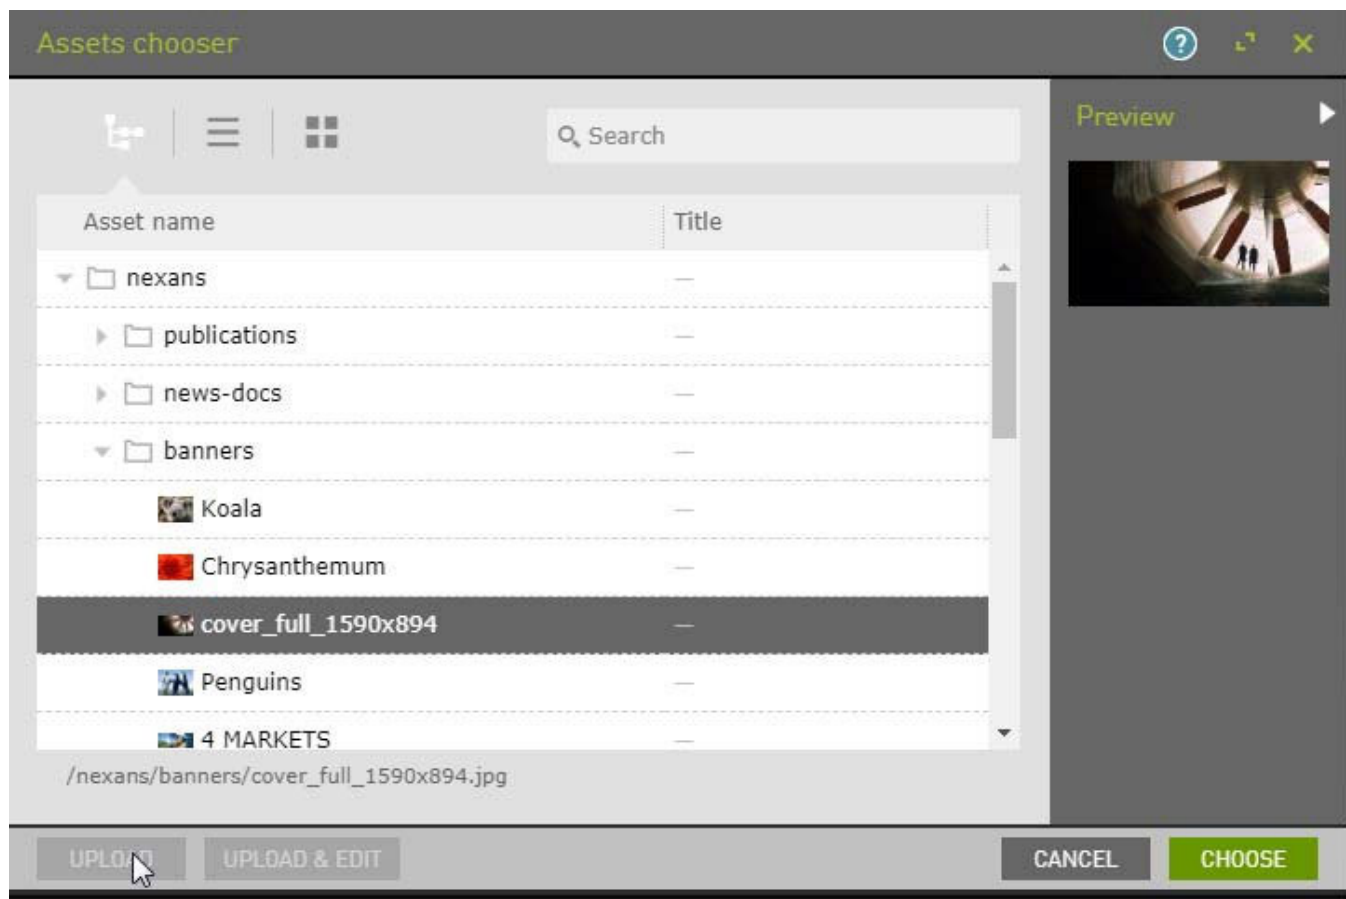

For each link, specify

- Link type: page / news / external. Then depending on the chosen link, browse for the relevant content.
- Title of the link
- Tag (showing on the image)
- Select the image from the asset management library or upload a new one (in the asset management library)

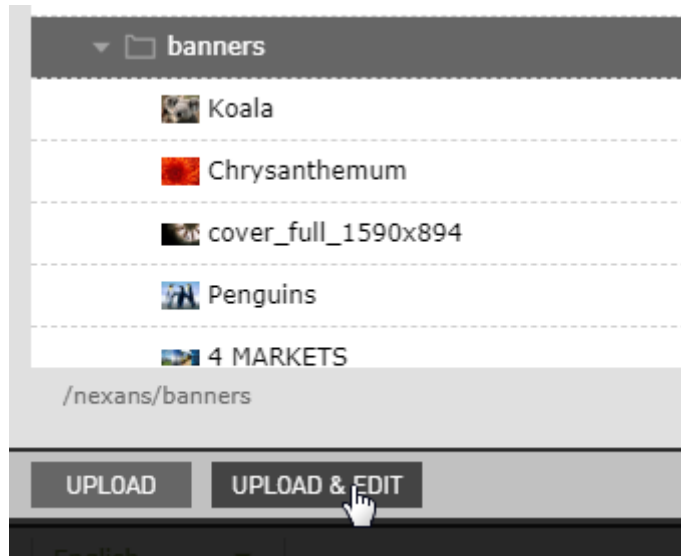

To upload an image, click on the button SELECT NEW:

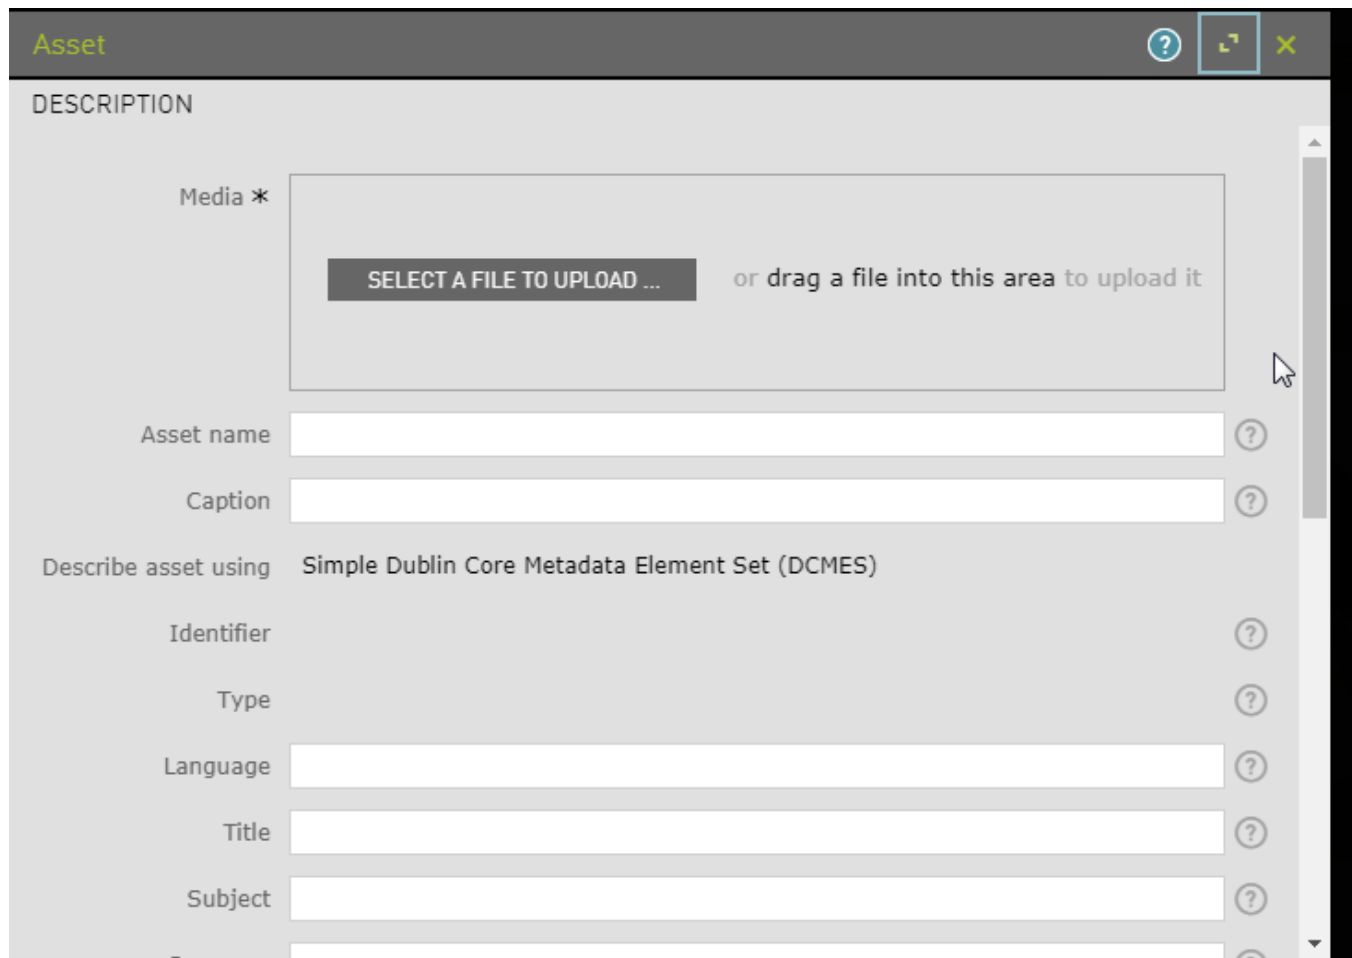

- Either you select an existing image in the repository: select the image and click on UPLOAD

- Or upload a new one: position the mouse on the folder in which you'd like to upload the image. Then click on **UPLOAD AND EDIT**

The following screen will show

Asset

DESCRIPTION

Media ✖

SELECT A FILE TO UPLOAD ... or drag a file into this area to upload it

Asset name

Caption

Describe asset using Simple Dublin Core Metadata Element Set (DCMES)

Identifier

Type

Language

Title

Subject

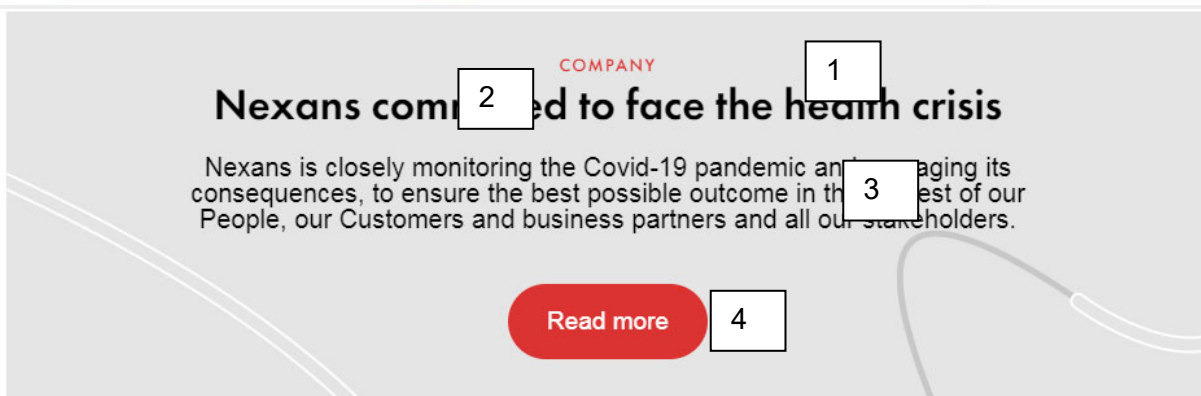

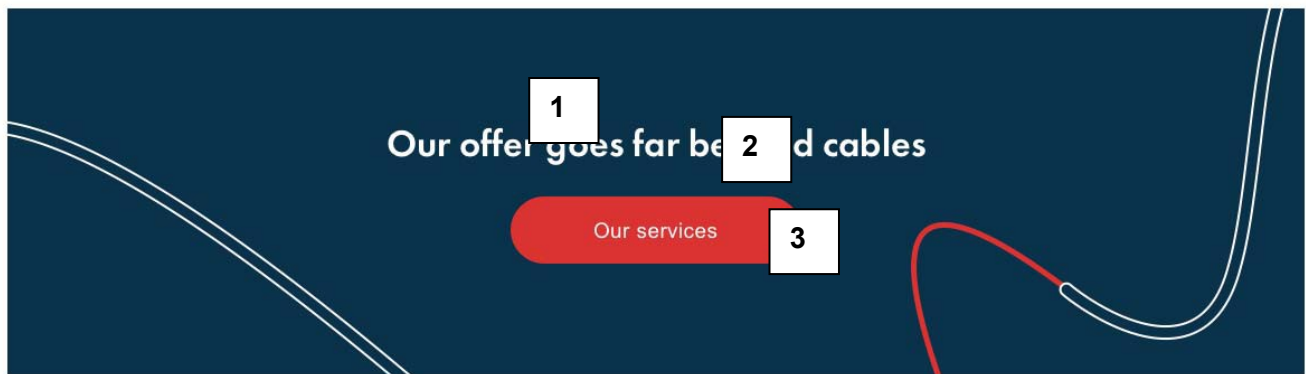

Upload the file at the top (MEDIA block) and then key in the relevant information.

TIP just click on the question mark icon to get the meaning of each field !

- Asset name: name of the file. By default, the system will pick up the file name, but you can add a specific name
- Caption: showing next to the asset name to get additional information about the image
- Language: use standard code for language – ex: en for ENGLISH, fr-BE for French Belgium
- Title: title of the image (picked up by Search engines)
- Subject topic of the resource / key words for ex: business segment
- Coverage: if a specific jurisdiction applies (depending on image rights for instance – only valid for a country) or spatial coverage (only applicable to one country / one territory / duration...)
- Description: usually the abstract of the image / additional information (if graph for instance). Useful for referencing
- Creation date / modification date / creator: will be filled in automatically by the system
- Publisher: person name / company responsible for making the resource available
- Contributor: entity responsible for making the contribution of the asset
- Rights: rights held over the resource, more specifically COPYRIGHT
- Source: source from which it is derived
- Relation: a related resource
- Document type: specify the document, for instance: annual report
- Tag: select appropriate tag for the asset among the list of tags defined for the site

Related Link - Push

This block allows you to link to a specific content of the site – case study or else.

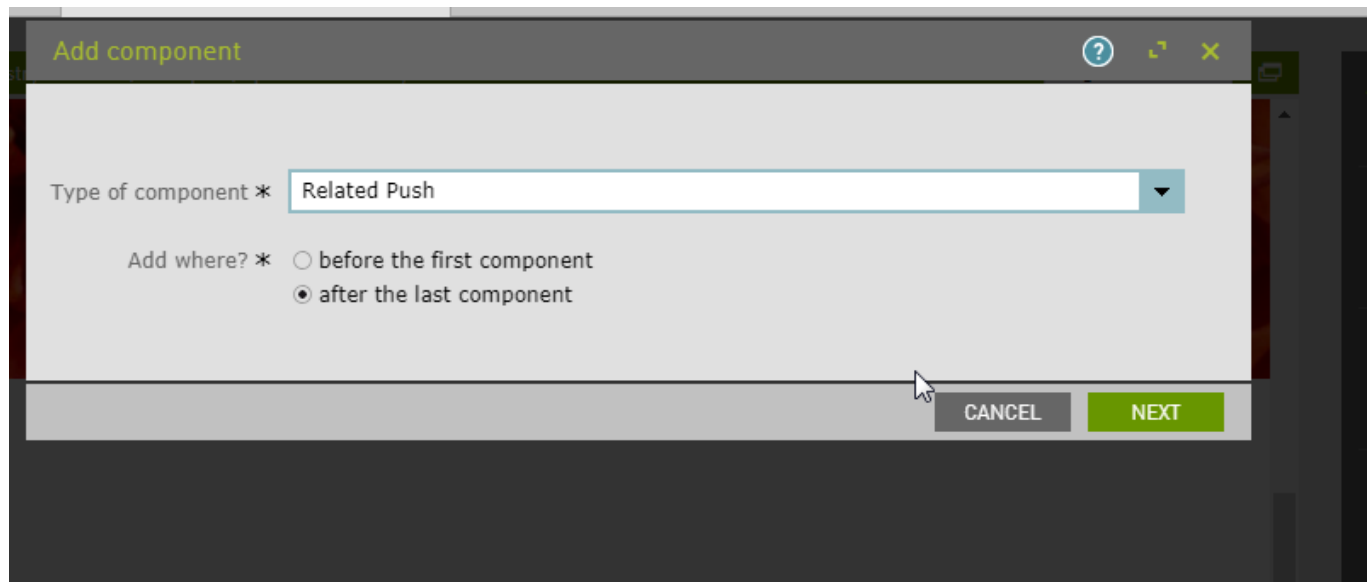

Content characteristics

To add an overview block, select NEW COMPONENT in the area where you'd like to add it and select type OVERVIEW in the list. Then click on NEXT

TAB OVERVIEW

Once done, key in the title (you can choose the heading style: if title is too long, you can amend the style by taking a smaller font then: like H3 or H4). By default, the system will pick the one defined for the page.

TAB TEXT

The text tab is divided into two elements:

- One visible text that will show on the page
- One hidden text that will show if user clicks on READ more button

That allows you to balance the text if too long without having to summarize it if needed.

Don't forget to key in the translations for all fields and then click on SAVE CHANGES

The overview block can contain some links. On the page itself, when editing the blocks you'll see after the text the possibility to add some related links. Click on the LINKS components

TEXT

This block allows you to add some text within news pages / editorial pages.
It's a standard text block.

East Anglia ONE offshore wind farm will power half a million homes in the UK while supporting jobs in the region. 1

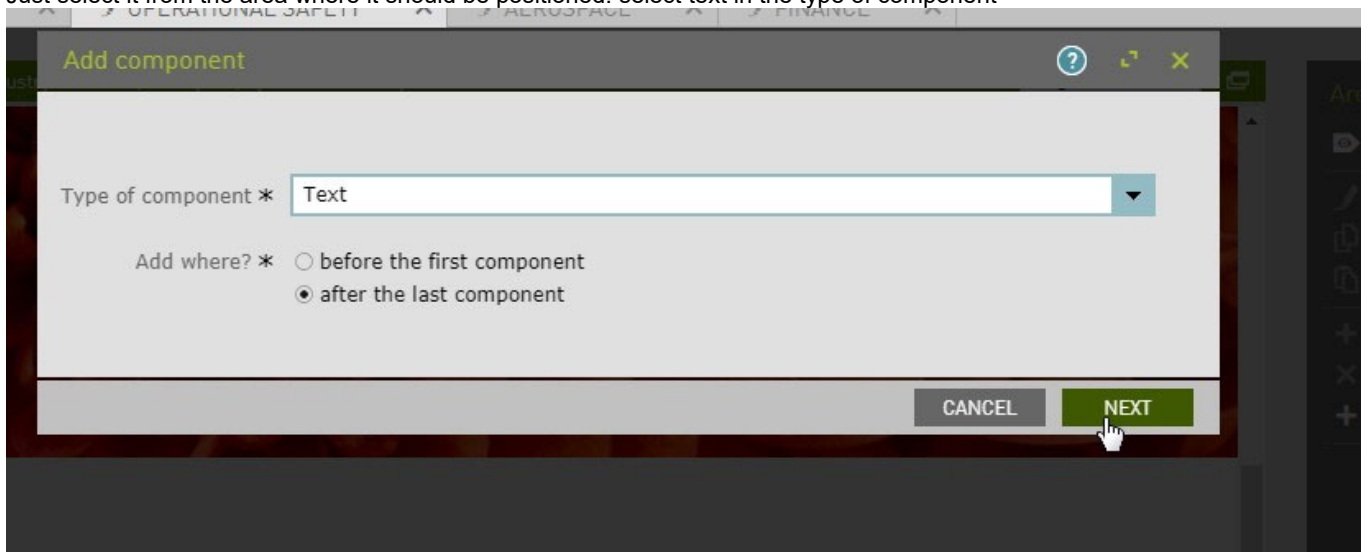

Nexans' HV cables to connect ScottishPower Renewables' 714 MW wind farm to shore. The new wind farm, due to be finished in 2020, will be made of up 102 wind turbines with a capacity to power around 500,000 homes. The entire project is worth nearly €3 billion. East Anglia ONE will stimulate the East region and support thousands of skilled jobs. 2

Nexans will type test, manufacture and then install the high voltage cables and accessories at the 300 km² site. The turnkey contract includes a pre-installation survey and cable protection by burying. Delivery of the cables will begin in Summer 2018.

Nexans' HV cables to connect ScottishPower Renewables' 714 MW wind farm to shore. The new wind farm, due to be finished in 2020, will be made of up 102 wind turbines with a capacity to power around 500,000 homes. The entire project is worth nearly €3 billion. East Anglia ONE will **2** the East region and support thousands of skilled jobs.

Nexans will type test, manufacture and then install the high voltage cables and accessories at the 300 km² site. The turnkey contract includes a pre-installation survey and cable protection by burying. Delivery of the cables will begin in Summer 2018.

Efficient **1** transmission and careful installation in the Wadden Sea

The geographical location of the offshore wind farm to be connected means that the offshore grid connections run via the ecologically sensitive Wadden Sea. This is also the case with the DolWin6. On the **2** from the DolWin Kappa converter station, where the three-phase current generated at sea is converted to direct current, to Hilgenriedersiel on the mainland, around 45 kilometres away, the cables will cross the island of Norderney.

ScottishPower Renewables has chosen Nexans' submarine cables

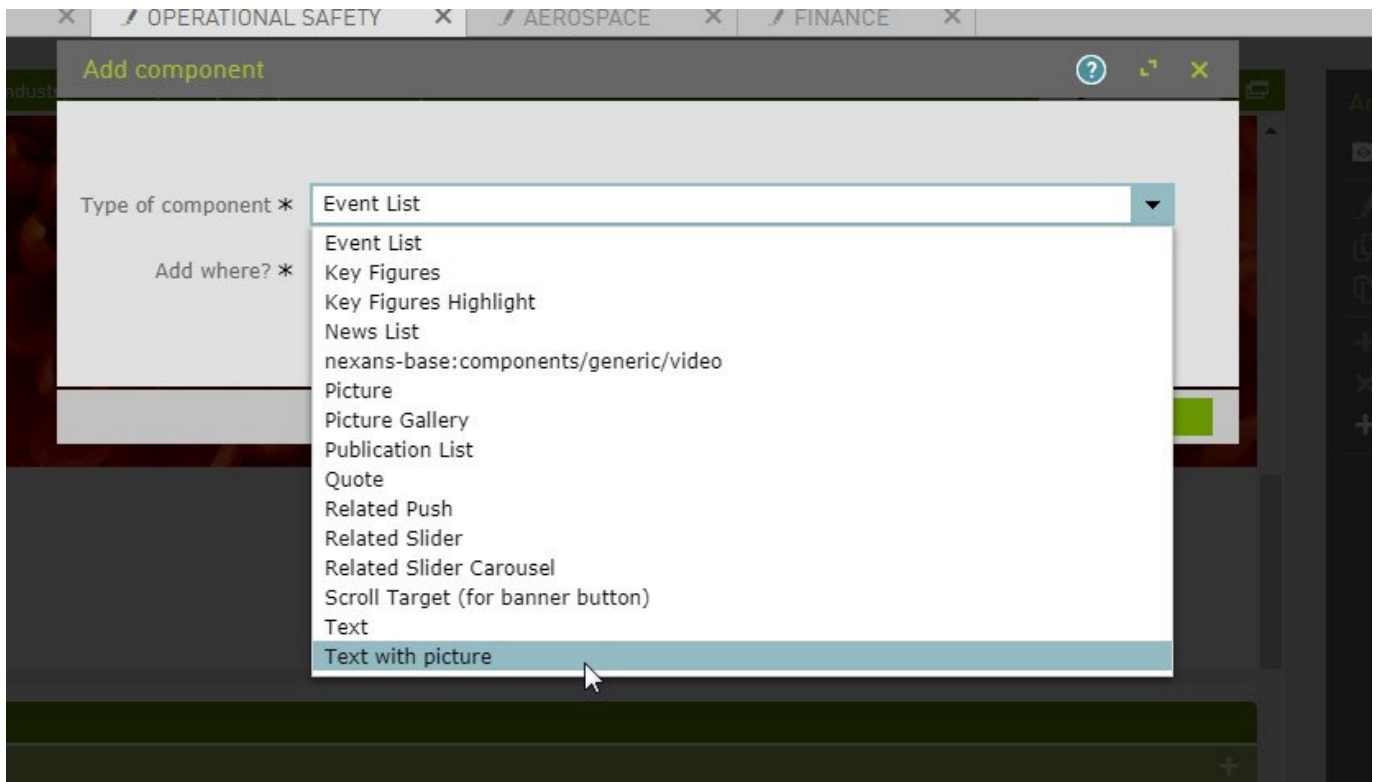

Carry energy onshore from its new 714 MW East Angles ONE offshore windfarm. Nexans will supply and install two 85 km 3-core submarine cables with embedded fibre optics, as well as accompanying accessories, for the wind farm in the North Sea. The contract is worth more than 180 million euros.

PICTURE

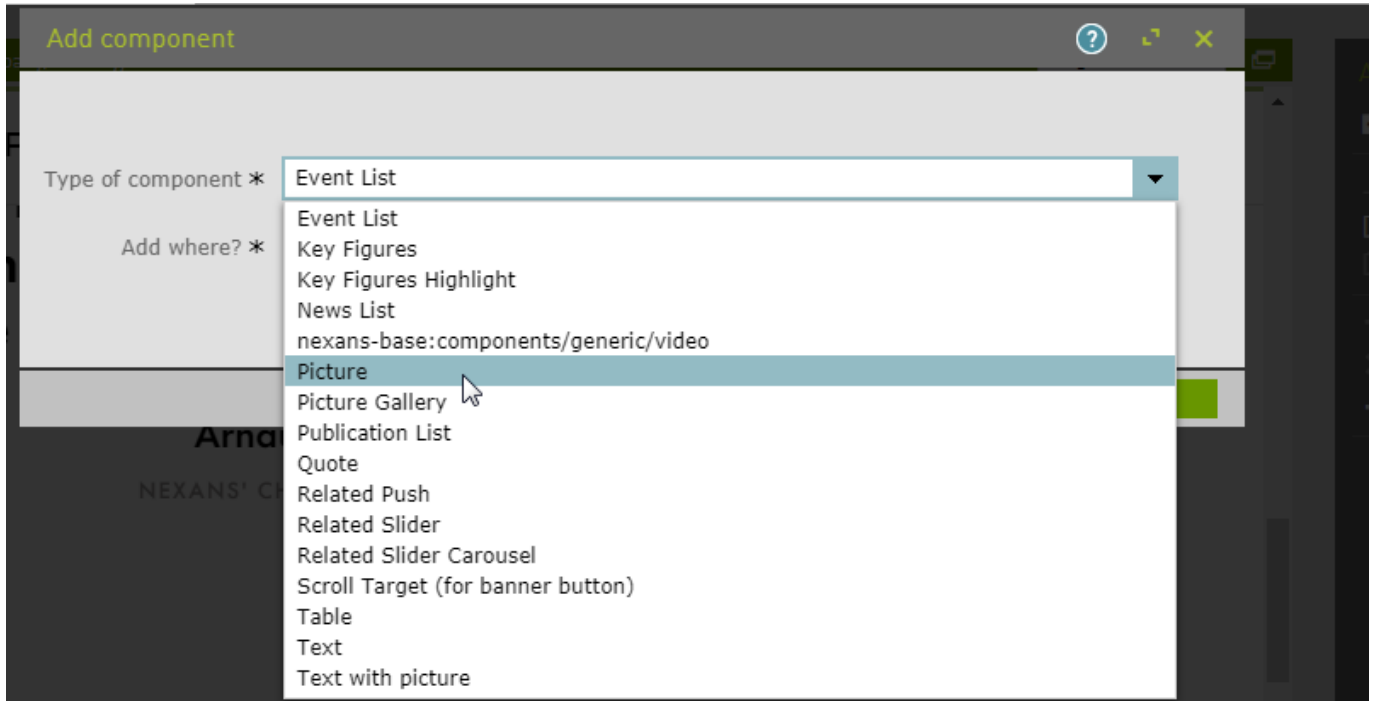

In July 2017, transmission system operator TenneT awarded Nexans the contract to supply and install the cables

Content characteristics

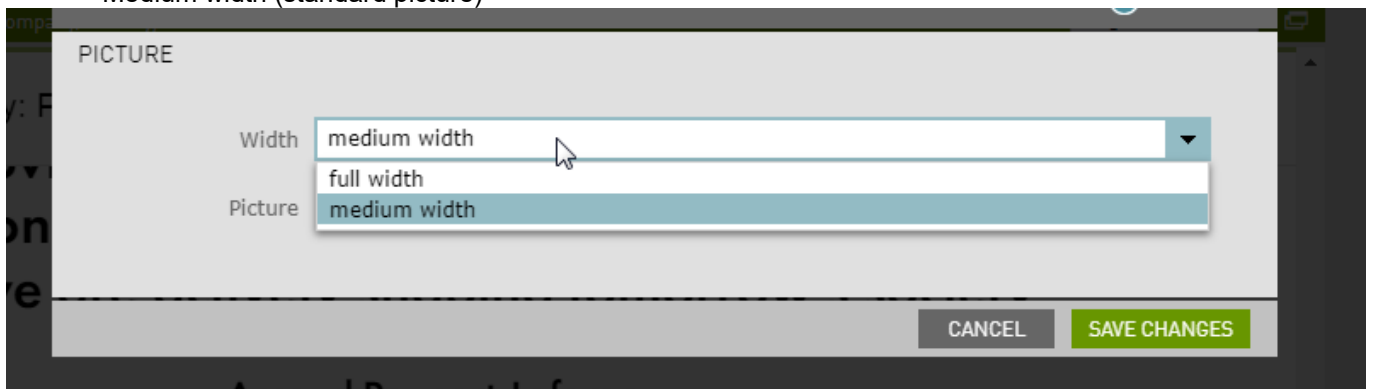

Footnote	Key	Description	Interactions / Actions / Links
0	G03_TITLE (optional)	Title should be displayed in bold	
1	G03_IMAGE	3 sizes possible: <ul style="list-style-type: none"> - Adjusted to content in EDITORIAL BLOCK TEXT (same width) - Medium: corresponding to image above (larger than text) - Full width: display image in full width of the page 	
2	G03_LEGEND	Left aligned (optional)	

Select the picture block in the list of component type

The following options will then show

- Either full width (the full width of the page, just like covers)
- Medium width (standard picture)

Select the option you need and then select your picture from the asset management library (if already uploaded) or upload a new one if needed
Once done, click on **SAVE CHANGES**

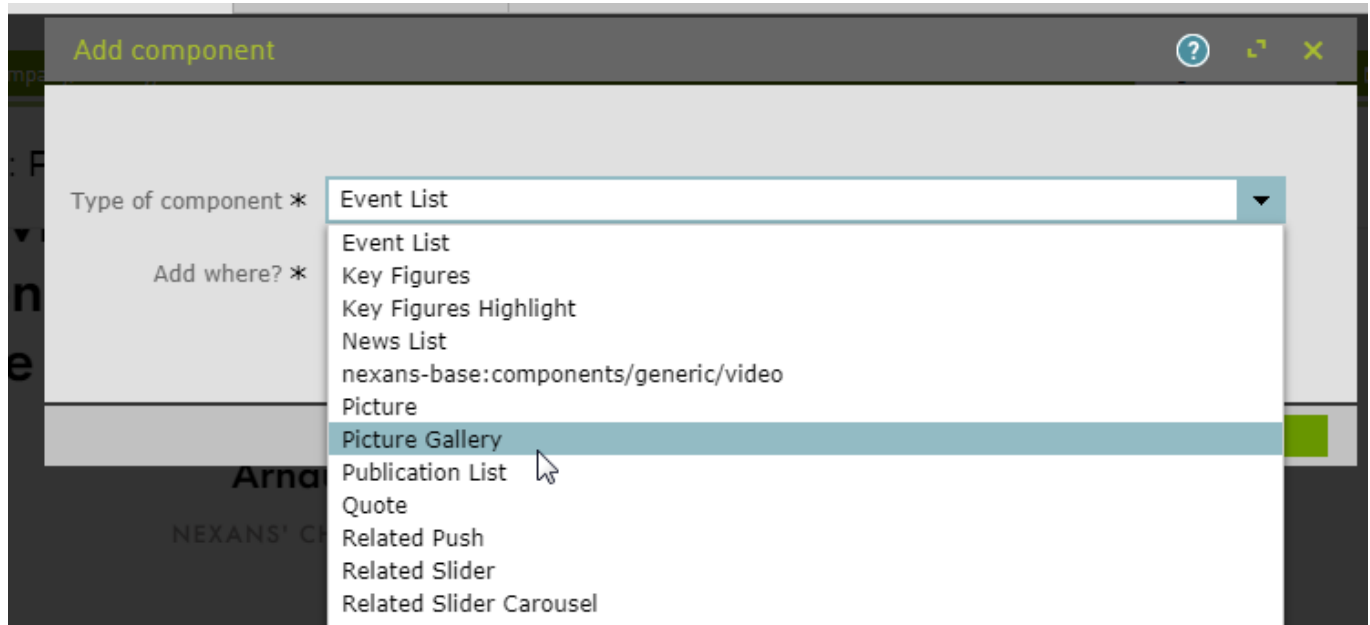

PICTURE-GALLERY

This block will allow to add several pictures within an editorial content, a news or a success story, and set up as a gallery.

Two display options are possible

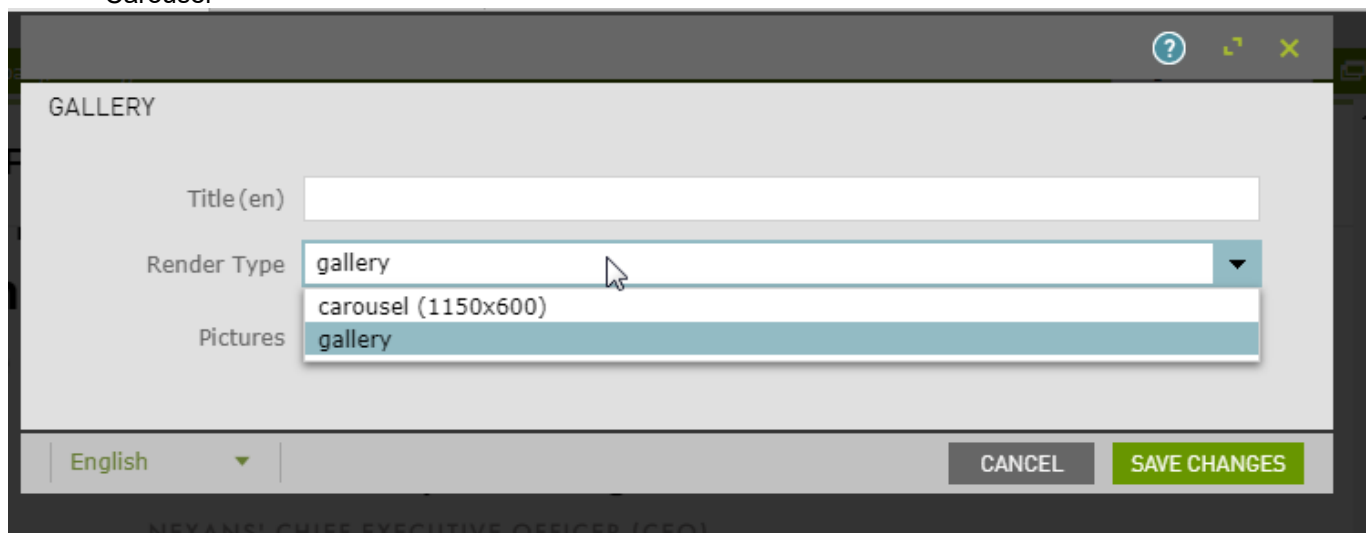

- Either a gallery
- Or a carousel

To add a picture gallery block, just select **PICTURE GALLERY** from the component types list

Then give it a title and specify which option you want

- Gallery
- Carousel

1. GALLERY

Choosing the gallery allows you to present the picture in two columns – width will be fixed and height will adjust per image height. The block can contain an unlimited number of pictures that will be displayed from left to right and then top to bottom

Project Gallery

Content characteristics

Footnote		Key	Description	Interactions / Actions / Links
0	G08_TITLE		Title of the block	
1	G08_IMG properties: images displayed over two columns with fixed width	G08_IMG1	Fixed width. Picture number one will show on the top left. Height depends on the height of the picture	On click: open a popin to show full picture
2		G08_IMG2	Fixed width. Picture number two will show on the top right. Height depends on the height of the picture	On click: open a popin to show full picture
3		G08_IMG3	Fixed width. Picture number two will show on the left (below picture 1), height depends on the height of the picture	On click: open a popin to show full picture
...		

2. CAROUSEL

The carousel allows for a more classical presentation: pictures will be presented in the center and the arrows on both sides will allow you to slide from one to the other. By clicking on the picture, you can enlarge it.

Content characteristics

Footnote		Key	Description	Interactions / Actions / Links
0	G08_TITLE		Title of the block	
1	G08_IMG properties: images displayed over two columns with fixed width	G08_IMG1	Free x 720	On click: open a popin to show full picture
2		G08_IMG2	Free x 720	On click: open a popin to show full picture
3		G08_IMG3	Free x 720	On click: open a popin to show full picture
...		

Add as many pictures you want in the carousel – arrows will show from both sides to allow users to view all images

RELATED TRANSVERSAL

Content characteristics

Footnote	Key	Interactions / Actions / Links
1	PAGE_COVER	On click: link to the page
2	PAGE_TITLE	On click: link to the page
3	PAGE_SUBTITLE	On click: link to the page

3 images at the bottom of page, just above footer. Min 2 images visible – format will be adjusted

This block is available from nearly all pages – in the bottom area

Select the Related transversal type of component from the list if not mandatory

There can be up to 3 related at the bottom of the page. To add new related, just position the mouse on the area, on the RELATED component. Click on the + icon

The following screen will show up

1	TABLE ITEM	TABLE_COLUMN_HEADER	Header displayed in caps, bold black
		TABLE_COLUMN_FIRST COLUMN	Text in normal caps, bold black
		TABLE_COLUMN_CONTENT body cell	Capital letters, grey

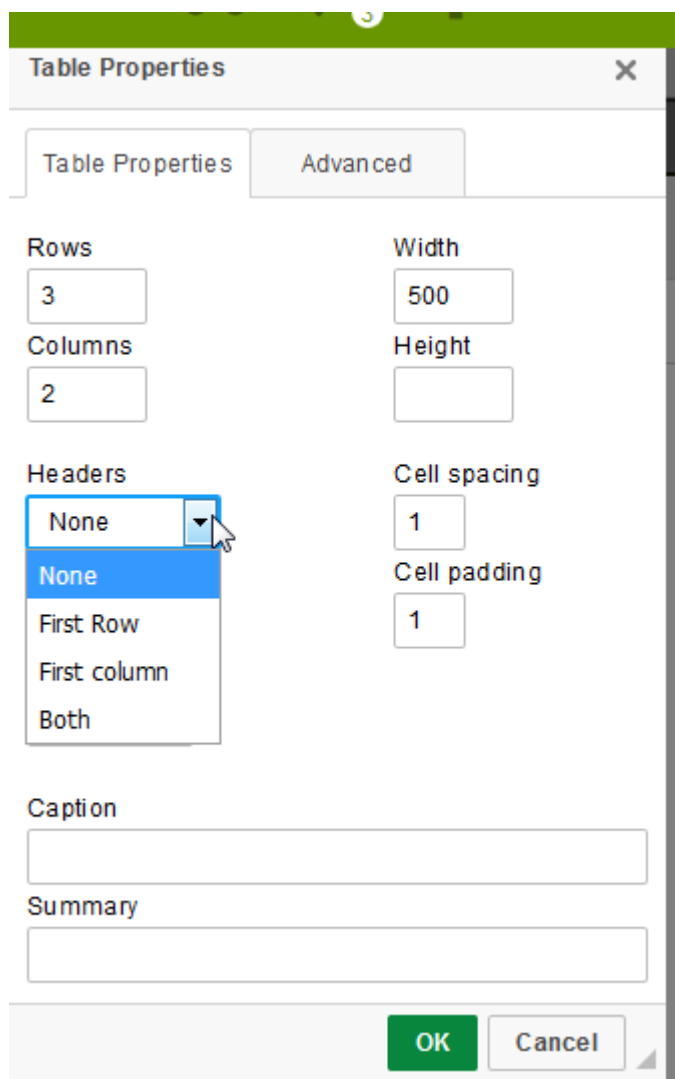

Lines borders visible in light grey

Border not visible between columns

To use that block, select it in the list of components available from the template you are in Then just create your table using the shortcut in the menu

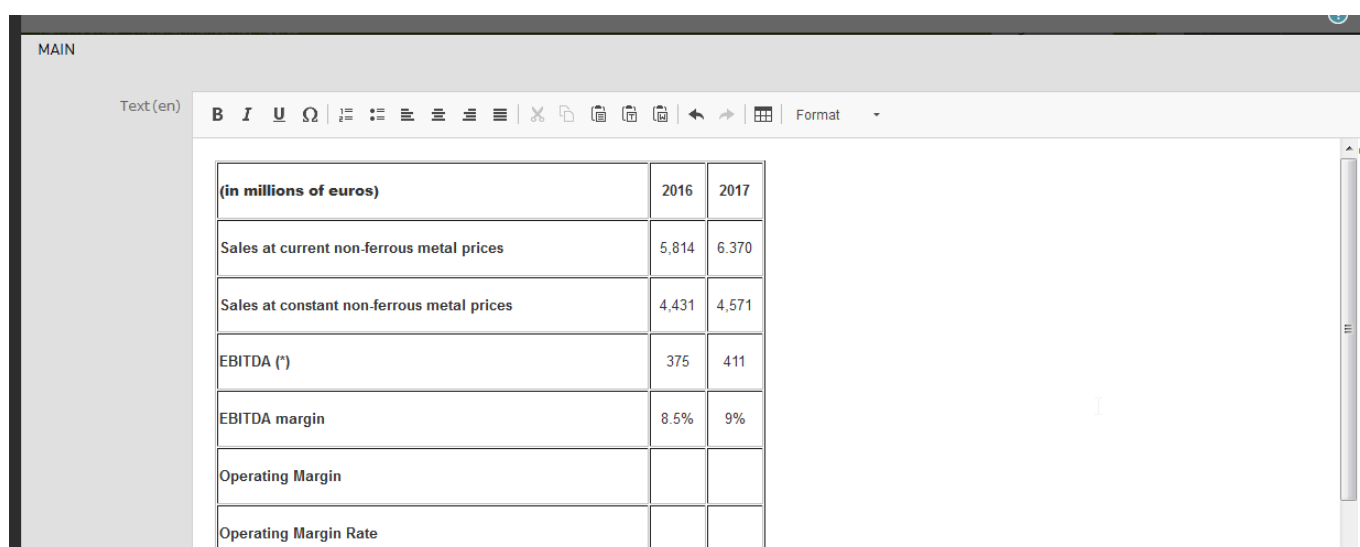

Key in the basic fields for the table

The 'Table Properties' dialog box is shown with the 'Table Properties' tab selected. It contains the following fields:

- Rows:** 3
- Columns:** 2
- Width:** 500
- Height:** (empty)
- Headers:** A dropdown menu is open, showing options: 'None' (selected), 'First Row', 'First column', and 'Both'.
- Cell spacing:** 1
- Cell padding:** 1
- Caption:** (empty text box)
- Summary:** (empty text box)
- Buttons:** 'OK' and 'Cancel' at the bottom right.

You can apply a style to the headers of the table (only first rows and/or first columns)

The screenshot shows the Magnolia editor interface with a table created. The table has 3 columns: a header column and two data columns for the years 2016 and 2017. The table content is as follows:

(in millions of euros)	2016	2017
Sales at current non-ferrous metal prices	5,814	6,370
Sales at constant non-ferrous metal prices	4,431	4,571
EBITDA (*)	375	411
EBITDA margin	8.5%	9%
Operating Margin		
Operating Margin Rate		

Then create your table

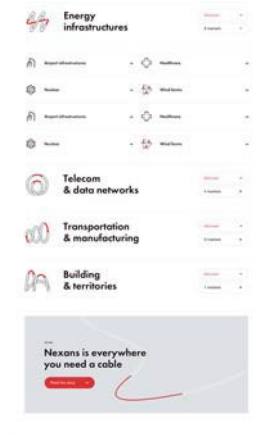

Once done, don't forget to key in the translations and click on **SAVE CHANGES**

(IN MILLIONS OF EUROS)	2016	2017
Sales at current non-ferrous metal prices	5,814	6,370
Sales at constant non-ferrous metal prices	4,431	4,571
EBITDA (*)	375	411
EBITDA margin	8.5%	9%
Operating Margin

Nexans' HV cables to connect ScottishPower Renewables' 714 MW wind farm to shore. The new wind farm, due to be finished in 2020, will be made of up 102 wind turbines with a capacity to power around 500,000 homes. The entire project is worth nearly €3 billion. East Anglia ONE will stimulate the East region and support thousands of skilled jobs.
